NFI Parts will provide a first-bus Recommended Stocking List (RSL) during customer's first-bus delivery.

This RSL parts listing will include part number, item description, stocking status, lead time and 30-day pricing information

which will assist the customer in stocking parts that will support both the customer's regular and preventive bus maintenance programs.

This abbreviated list is compiled using the actual bus build information that is available in the customers bus production Bill of Material (BOM)

NFI Parts will also provide the customer with a more inclusive Parts Provisioning List following last-bus delivery.

This listing will be compiled using further part assembly breakdown information identified in the customers

Parts manual and will assist in stocking additional parts that further support new bus operations and maintenance over the next 2-3 years.
