**MEMORANDUM**

TO: Mayor, Vice Mayor and Commissioners  
 DATE: May 26, 2021  
 FROM: Commissioner Beam Furr  
 CC: Bertha Henry, County Administrator  
 RE: June 1, 2021, Commission Meeting – Item #23 MOTION TO APPROVE updated Broward County Climate Change Action Plan (2020)

The Broward County Climate Change Task Force (CCTF) approved the 2020 Climate Change Action Plan (CCAP) at its May 5, 2021, meeting, with provisos to allow staff to insert a page of overarching recommendations and make corrections to typographical, grammatical, and design errors.

However, in addition to staff edits, I request amendment to Recommendation #94 for consistency with Recommendation EF-04 of the Southeast Florida Regional Climate Change Compact Regional Climate Action Plan 2.0 (approved April 10, 2018, Item 32).

The amendment is as follows:

94. Advocate for strong climate, energy and resilience policies at the state and federal levels.

Support:

- Clean energy standards at the state and federal level.
- ~~Third-party retail power purchase agreements.~~ State laws and programs that expand all opportunities for solar energy deployment statewide.
- *[remaining bulleted items are unchanged]*

This change expands the potential scope of such policy positions to include a larger range of options than provided with the original text.
