Answer: Yes

Plat Comments, as needed:

1. Review of available information by staff of the Water and Environmental Licensing Section (WAEL) of the Broward County Environmental Engineering and Permitting Division indicates that, at this time, there are no wetlands within the boundaries of the plat. Therefore, a Conceptual Dredge and Fill Review Report is not required.
2. Based upon the present conditions within the site, filling of the land area will not require an Environmental Resource License. Other activities, e.g., lake or canal excavation, regulated under Article XI of the Natural Resource Protection Code may require a license. The applicant is encouraged to contact WAEL at the earliest time to determine if, and what type of, license may be required prior to undertaking surface disturbing activities.
3. WAEL encourages all invasive exotic vegetation including Melaleuca, Brazilian-pepper, Australian pine and others as listed in the Exotic Pest Plant Council's List of Florida's Most Invasive Species to be removed during the development process, and a management plan may be necessary to control re-invasion of same. In addition, landscape material should not include any plants considered to be invasive of south Florida's native plant communities. The Exotic Pest Plant Council's List of Florida's Most Invasive Species is available from WAEL.
4. An Environmental Resource License may be required for any activities regulated under Article XI of the Natural Resource Protection Code. Contact WAEL at 954-519-1483 for specific license requirements.
