Timely delivery of a petition for alternative dispute resolution and completion of the negotiation process shall be a condition precedent to any legal action by the **Provider** concerning this Agreement.

After timely delivery of a petition for alternative dispute resolution, the parties may employ any dispute resolution procedures described in the exhibits or other attachments or mutually agree to an alternative binding or nonbinding dispute resolution process, the terms of which shall be reduced to writing and executed by both parties. Attachment B Scope of Work

The **Provider** agrees to:

1. Clinically screen, medically assess, and administer FDA-approved medications to treat alcohol or opioid-addicted individuals who are eligible as defined in this attachment,
2. Secure and maintain documentation of all services and costs related to the program,
3. Report services using the **FADAA Data Portal** in an accurate and timely manner, and
4. Provide MAT as an adjunct to and in coordination with behavioral health treatment, including individual and/or group counseling as determined appropriate.

A. **Patients can be enrolled in one of two programs. The Provider** will ensure that patients meet the listed eligibility requirements to receive MAT and the appropriate medication.

Program A - Extended-release injectable naltrexone

Covered Medications: Extended-release injectable naltrexone

Patient Eligibility:

1. Patients shall be 18 years of age or older
2. Patients shall have a primary diagnosis of opioid use disorder, alcohol use disorder or combination of alcohol and opioid use disorders as determined by the **Provider** using appropriate diagnostic protocols.
3. Patients shall be court-involved with drug court, mental health court, veterans' court, criminal court, state or local probation, or be determined to have a "high-likelihood" of becoming court-involved based prior court/criminal justice involvement; current diversion/pre-trial intervention involvement; illicit activity related to substance use; peer environment (illicit use or activity); or required to participate in treatment through the Impaired Professional Network (IPN).
4. **Provider** shall review any prospective patients with the **Association** in situations where the presenting circumstances are not explicitly outlined in this document. The **Association** will have final say in the determination of eligibility in these cases.

Program B: Medication Assisted Treatment

Covered Medications: Extended-release injectable naltrexone, oral naltrexone, methadone, buprenorphine, or injectable buprenorphine.

Patient Eligibility:

1. Patients shall be 18 years of age or older to be eligible for this program.
2. Patients shall have a primary diagnosis of opioid use disorder or combination of opioid and alcohol use disorders as determined by the Provider using appropriate diagnostic protocols.
3. Patients shall be court-involved with drug court, mental health court, veterans' court, criminal court, state or local probation, or be determined to have a "high-likelihood" of becoming court-involved based prior court/criminal justice involvement; current diversion/pre-trial intervention involvement; illicit activity related to substance use; peer environment (illicit Use or activity); or

required to participate in treatment through the Impaired Professional Network (IPN).

4. **Provider** shall review any prospective patients with the **Association** in situations where the presenting circumstances are not explicitly outlined in this document. The Association will have final say in the determination of eligibility in these cases.

B. **Provider** will provide the following to patients in collaboration with the **Association**:

1. **Screening** – clinical evaluation and interview with a prospective patient to determine the existence of an opioid use disorder and/or alcohol use disorder, provide education regarding Medication Assisted Treatment (MAT) and use of extended-release injectable naltrexone, oral naltrexone, methadone, buprenorphine, and injectable buprenorphine, and determine the readiness and willingness to use a MAT protocol in conjunction with counseling and recovery support. Patients can only receive one screening service funded by this program.

The screening should not be the initial contact with the individual – the Provider shall select potential MAT participants from among its existing clientele that is currently engaged in and actively participating in substance abuse counseling and/or recovery support services and demonstrate motivation to follow through on MAT protocols. The Provider shall ensure that a minimum of two-thirds (66%) of individuals screened for MAT receive medication services for their alcohol and/or opioid disorders.

2. **Medical Assessment/Lab Work** – involves blood specimen lab work to determine a prospective patient's kidney and liver function, and any ailments that would preclude the use of extended-release injectable naltrexone, methadone or buprenorphine. Includes a pregnancy test for female patients to determine the appropriateness of MAT medications, specifically medications that contain naltrexone or naloxone. Initial lab work and physical exam for methadone shall be done pursuant to s. 65D-30.0142, F.A.C., prior to induction.

Physician reviews lab work and writes orders for medication. Nursing staff provide overview of the selected medication's benefits and side effects to the patient, and expectations for MAT participation on the part of the patient. Patients can only receive one medical assessment service funded by this program.

3. **Medication Administration** – Dose administration and management by medical personnel as well as any additional lab work.

Extended-release injectable naltrexone, buprenorphine and injectable buprenorphine should be provided as an adjunct to, and in coordination with, behavioral health treatment, including individual and/or group counseling as determined appropriate by the **Provider**.

The unit rate for methadone is all-inclusive. The **Provider** shall provide required services pursuant to s. 65D-30.0142, F.A.C. and federal rules stipulated by the Drug Enforcement Administration (DEA) and Substance Abuse and Mental Health Services Administration (SAMHSA).

Oral naltrexone may be provided as a short-term MAT option for opioid patients as a precursor to extended-release injectable naltrexone to determine tolerability or potential allergy, while the patient is in an inpatient/residential treatment setting where medication compliance can be monitored, or as a short-term transition following a period of successful adherence to the extended-release injectable naltrexone protocol. Since the FDA has not approved oral naltrexone as a maintenance MAT option for opioid use disorders, the **Association** will not approve use of this medication as the primary maintenance MAT for opioid use disorders in outpatient settings.

4. **Readmission Screening** – patients that completed or were terminated or transferred from MAT may

be readmitted to the **Provider's** MAT program using an abbreviated screening process to evaluate the patients' current substance use status and any changes in key life areas of interpersonal relationships, employment, and court/criminal justice involvement. Patients must have been out of MAT services for at least 90 days to use this service; patients returning to MAT sooner than 90 days shall just be reengaged in the MAT protocol.

5. **Readmission Medical Assessment/Lab Work** – patients that completed or were terminated or transferred from MAT shall be reevaluated by medical staff to update patients' records to note changes in physical health status and to perform any lab work, urine drug screens, or pregnancy tests, as needed, to determine the appropriateness of reinitiating medication protocols. Patients must have been out of MAT services for at least 90 days to use this service; patients returning to MAT sooner than 90 days shall just be reengaged in the MAT protocol.

C. **Provider** will establish local program goals and submission of monthly, quarterly, and annual reports to the **Association** and document the following:

1. Medication purchases for each fiscal year detailing the number of doses of each medication purchased and the total cost paid to pharmacies or pharmaceutical distributors. Reports are due by July 30, 2023 for the service period of July 2022 through June 2023.
2. Monthly patient data program activity and outcomes. Data will include, but may not be limited to:
 - a. Number of patients screened and educated on the use, benefits, and risks of extended-release injectable naltrexone, oral naltrexone, methadone, buprenorphine, and/or injectable buprenorphine;
 - b. Number of patients assessed (received physical exam and/or lab work) for use of extended-release injectable naltrexone, oral naltrexone, methadone, buprenorphine and/or injectable buprenorphine;
 - c. Number of patients who received one or more doses of extended-release injectable naltrexone, oral naltrexone, methadone, buprenorphine, and/or injectable buprenorphine;
 - d. Demographics of individuals served, including race; ethnicity; gender; alcohol or opioid as drug of choice; and current treatment modality (outpatient, inpatient, aftercare, case management, etc.);
 - e. Patient outcomes, including urge to drink and/or use opiates; number days in the month that patient drank or used opiates; current status of patient participation in psychosocial treatment (treatment retention); and completion of the Patient Survey in the FADAA Data Portal once the patient has completed three (3) months of a medication protocol; and,
 - f. Discharge status for individuals that complete or withdraw from services. Individuals that do not initiate a medication protocol shall be discharged under the Immediate Case Closeout field. Individuals that receive one or more doses of medication shall be discharged under the MAT Outcome field. Individuals that go 40 or more days without a service shall either be re-engaged in services or processed for discharge.
3. Negotiate a mutually agreeable Agreement with Besse Medical, 9075 Centre Point Drive, Suite 140, West Chester, OH 45069, to request and receive extended-release injectable naltrexone directly for the services provided under the Agreement at www.besse.com.

If the **Provider** has an agreement with another wholesale pharmacy vendor or is eligible for other discount purchasing programs including the Federal 340b drug-pricing program or the Minnesota Multistate Contracting Alliance for Pharmacy (MMCAP) they may purchase extended-release injectable naltrexone through this arrangement.

4. There are no requirements for pharmacy or pharmaceutical distributor agreements regarding the purchase of methadone, buprenorphine, injectable buprenorphine, or oral naltrexone. The **Provider** may negotiate arrangements with pharmacies and distributors of its choosing.
5. Compliance with all applicable federal, state, and local laws, rules, and regulations, including, but not limited to those laws and regulations enforced by the FDA, the Drug Enforcement Administration, and state laws regarding pharmaceutical standards and administration of medications, specifically.
