RE: Bunker License Assignment

To Whom it May Concern:

Tethys Supply and Marketing, LLC brought Russell Stelman on board in 2016 to build a Marine Fuel Supply and Trading business - establishing the company as a preferred supplier in the South Florida maritime market. David Musselwhite joined soon after to manage all operations in the South Florida region and uphold the business' focus on operational excellence since inception. In 2020, Tethys sought to focus on the domestic gasoline markets and made the decision to transfer all operations relevant to the business, and physical assets to Russell under the entity Proteus Supply and Trading, LLC ("Proteus"). Attached are bills of sale for the equipment as well as the confirmation from the US Coast Guard Miami District acknowledging current operations to resume as previously established under the Proteus name.

Russell Stelman will continue to be the commercial lead and similarly David Musselwhite will continue to manage daily operational and supply scheduling to maintain the business unit's stellar reputation with the ports, buyers, and local agents under the Proteus name. Proteus and its management team will continue to be important stewards to the South Florida maritime industry, providing a professional and reliable service to bunker buyers for years to come.

We request to assign the Tethys Supply and Marketing, LLC Port Everglades bunker license to Proteus Supply and Trading, LLC.

Sincerely,

Joshua Heffron
Tethys Supply and Marketing, LLC

Attach additional sheets if necessary.

2. RESUMES: Provide a resume for each officer, director, member, partner, shareholder, principal, employee, agent, and local representative(s) active in the management of the Applicant, as listed above.

- Please see attachment 'Sections A, F, and G - Mgmt Bios'

Section B

1. Place checkmark to describe the Applicant:
() Sole Proprietorship () Corporation () Partnership () Joint Venture (X) Limited Liability Company
2. Provide copies of the documents filed at the time the Applicant was formed including Articles of Incorporation (if a corporation); Articles of Organization (if an LLC); or Certificate of Limited Partnership or Limited Liability Limited Partnership (if a partnership). If the Applicant was not formed in the State of Florida, provide a copy of the documents demonstrating that the Applicant is authorized to conduct business in the State of Florida.

Section C

1. Has there been any change in the ownership of the Applicant within the last five (5) years? (e.g., any transfer of interest to another party)
Yes ___ No X If "Yes," please provide details in the space provided. Attach additional sheets if necessary.
2. Has there been any name change of the Applicant or has the Applicant operated under a different name within the last five (5) years?
Yes ___ No X If "Yes," please provide details in the space provided, including: Prior name(s) and Date of name change(s) filed with the State of Florida's Division of Corporations or other applicable state agency. Attach additional sheets if necessary.
3. Has there been any change in the officers, directors, executives, partners, shareholders, or members of the Applicant within the past five (5) years?
Yes ___ No X If "Yes," please provide details in the space provided, including:
Prior officers, directors, executives, partners, shareholders, members
Name(s) _____
New officers, directors, executives, partners, shareholders, members
Name(s) _____
Also supply documentation evidencing the changes including resolution or minutes appointing new officers, list of new principals with titles and contact information, and effective date of changes. Attach additional sheets if necessary.

Section D

Provide copies of all fictitious name registrations filed by the Applicant with the State of Florida's Division of Corporations or other State agencies. If none, indicate "None" None.

Section E

1. Has the Applicant acquired another business entity within the last five (5) years?
Yes ___ No X If "Yes," please provide the full legal name of any business entity which the Applicant acquired during the last five (5) years which engaged in a similar business activity as the business activity which is the subject of this Port Everglades Franchise Application.
If none, indicate "None" None.

2. Indicate in the space provided the date of the acquisition and whether the acquisition was by a stock purchase or asset purchase and whether the Applicant herein is relying on the background and history of the acquired firm's officers, managers, employees and/or the acquired firm's business reputation in the industry to describe the Applicant's experience or previous business history. Attach additional sheets if necessary.

N/A

3. Has the Applicant been acquired by another business entity within the last five (5) years?
Yes ___ No X If "Yes," provide the full legal name of any business entity which acquired the Applicant during the last five (5) years which engaged in a similar business activity as the business activity which is the subject of this Port Everglades Franchise Application.
If none, indicate "None" None.

4. Indicate in the space provided the date of the acquisition and whether the acquisition was by a stock purchase or asset purchase and whether the Applicant herein is relying on the background and history of the parent firm's officers, managers, employees and/or the parent firm's business reputation in the industry to describe the Applicant's experience or previous business history. Attach additional sheets if necessary.

N/A

Section F

Provide the Applicant's previous business history, including length of time in the same or similar business activities as planned at Port Everglades.

Proteus is a new entity that was created to spin off all operations, employees, and assets from the Marine Fuels and Diesel Divisions of Tethys Supply and Marketing, LLC. As Tethys decided to focus on gasoline blending, Proteus was created and is operating under the same structure as it was under the Tethys name but with new ownership. While Tethys and Proteus are in no way related legally, the commercial/operational experience, and management under Andy Camp and Russell Stelman continues as previous. Please see attachments 'Section A, F and G - Mgmt Bios' and 'Section F' for further information

Section G

1. Provide a list of the Applicant's current managerial employees, including supervisors, superintendents, and forepersons. - Please see 'Section A, F, and G - Mgmt Bios'
2. List the previous work history/experience of the Applicant's current managerial employees, including their active involvement in seaports and length of time in the same or similar business activities as planned at Port Everglades.

Section I

1. Provide a description of all past (within the last five (5) years) and pending litigation and legal claims where the Applicant is a named party, whether in the State of Florida or in another jurisdiction, involving allegations that Applicant has violated or otherwise failed to comply with environmental laws, rules, or regulations or committed a public entity crime as defined by Chapter 287, Florida Statutes, or theft-related crime such as fraud, bribery, smuggling, embezzlement or misappropriation of funds or acts of moral turpitude, meaning conduct or acts that tend to degrade persons in society or ridicule public morals.

The description must include all of the following:

- a) The case title and docket number
- b) The name and location of the court before which it is pending or was heard
- c) The identification of all parties to the litigation
- d) General nature of all claims being made

If none, indicate "None" None.

2. Indicate whether in the last five (5) years the Applicant or an officer, director, executive, partner, or a shareholder, employee or agent who is or was (during the time period in which the illegal conduct or activity took place) active in the management of the Applicant was charged, indicted, found guilty or convicted of illegal conduct or activity (with or without an adjudication of guilt) as a result of a jury verdict, nonjury trial, entry of a plea of guilty or nolo contendere where the illegal conduct or activity (1) is considered to be a public entity crime as defined by Chapter 287, Florida Statutes, as amended from time to time, or (2) is customarily considered to be a white-collar crime or theft-related crime such as fraud, smuggling, bribery, embezzlement, or misappropriation of funds, etc. or (3) results in a felony conviction where the crime is directly related to the business activities for which the franchise is sought.

Yes No

If you responded "Yes," please provide all of the following information for each indictment, charge, or conviction:

- a) A description of the case style and docket number
- b) The nature of the charge or indictment
- c) Date of the charge or indictment
- d) Location of the court before which the proceeding is pending or was heard
- e) The disposition (e.g., convicted, acquitted, dismissed, etc.)
- f) Any sentence imposed
- g) Any evidence which the County (in its discretion) may determine that the Applicant and/or person found guilty or convicted of illegal conduct or activity has conducted itself, himself or herself in a manner as to warrant the granting or renewal of the franchise.

Section J

The Applicant must provide a current certificate(s) of insurance. Franchise insurance requirements are determined by Broward County's Risk Management Division and are contained in the Port Everglades Tariff No. 12 as amended, revised or reissued from time to time. The Port Everglades Tariff is contained in the Broward County Administrative Code, Chapter 42, and is available for inspection on line at: <http://www.porteverglades.net/development/tariff>.

Section K

1. The Applicant must provide its most recent audited or reviewed financial statements prepared in accordance with generally accepted accounting principles, or other documents and information which demonstrate the Applicant's creditworthiness, financial responsibility, and resources, which the Port will consider in evaluating the Applicant's financial responsibility.

- Already reviewed by Port Everglades Director of Finance

2. Has the Applicant or entity acquired by Applicant (discussed in Section E herein) sought relief under any provision of the Federal Bankruptcy Code or under any state insolvency law filed by or against it within the last five (5) year period?

Yes ___ No X

If "Yes," please provide the following information for each bankruptcy or insolvency proceeding:

- a) Date petition was filed or relief sought
- b) Title of case and docket number
- c) Name and address of court or agency
- d) Nature of judgment or relief
- e) Date entered

3. Has any receiver, fiscal agent, trustee, reorganization trustee, or similar officer been appointed in the last five (5) year period by a court for the business or property of the Applicant?

Yes ___ No X

If "Yes," please provide the following information for each appointment:

- a) Name of person appointed
- b) Date appointed
- c) Name and address of court
- d) Reason for appointment

4. Has any receiver, fiscal agent, trustee, reorganization trustee, or similar officer been appointed in the last five (5) year period by a court for any entity, business, or property acquired by the Applicant?

Yes ___ No X

If "Yes," please provide the following information for each appointment:

- a) Name of person appointed
- b) Date appointed
- c) Name and address of court
- d) Reason for appointment

Section L

List four (4) credit references for the Applicant, one of which must be a bank. Use this format:

Name of Reference _____ Nature of Business _____

Contact Name _____ Title _____

Legal Business Street Address _____

City, State, Zip Code _____

Phone Number (____) _____

(Provide on a separate sheet.)

- Please see provided 'Section L - Port Ev Credit References'

Section M

1. Security: Pursuant to Port Everglades Tariff 12, Item 960, all Franchisees are required to furnish an Indemnity and Payment Bond or Irrevocable Letter of Credit drawn on a U.S. bank in a format and an amount not less than \$20,000 as required by Broward County Port Everglades Department.

Already Provided

2. Has the Applicant been denied a bond or letter of credit within the past five (5) years?

Yes ___ No X

If "Yes," please provide a summary explanation in the space provided of why the Applicant was denied. Use additional sheets if necessary.

Section N

1. Provide a list and description of all equipment currently owned and/or leased by the Applicant and intended to be used by the Applicant for the type of service(s) intended to be performed at Port Everglades including the age, type of equipment and model number.

- Please refer to document named - 'Mobile Pumping Unit'

2. Identify the type of fuel used for each piece of equipment.

- Diesel for both the towing vehicle and pump engine

3. Indicate which equipment, if any, is to be domiciled at Port Everglades.

- None

4. Will all equipment operators be employees of the Applicant, on the payroll of the Applicant, with wages, taxes, benefits, and insurance paid by the Applicant?

Yes X No ___

If "No," please explain in the space provided who will operate the equipment and pay wages, taxes, benefits, and insurance, if the franchise is granted. Use additional sheets if necessary.

Section O

Provide a copy of the Applicant's current Broward County Business Tax Receipt (formerly Occupational License).

Section P

1. Provide a copy of Applicant's safety program. - Please see document titled 'Proteus Site and Safety Health Plan'

2. Provide a copy of Applicant's substance abuse policy. - See document titled 'Proteus Substance Abuse Policy'

3. Provide a copy of Applicant's employee job training program/policy. - See document 'Proteus Training and Exercise Procedures'

4. Provide information regarding frequency of training. Sec P.3

5. Include equipment operator certificates, if any.

Section Q

1. Has the Applicant received within the past five (5) years or does the Applicant have pending any citations, notices of violations, warning notices, or fines from any federal, state, or local environmental regulatory agencies?
Yes ___ No X
2. Has the Applicant received within the past five (5) years or does the Applicant have pending any citations, notices of violations, warning notices, or civil penalties from the U.S. Coast Guard?
Yes ___ No X
3. Has the Applicant received within the past five (5) years or does the Applicant have pending any citations, notices of violations, warning notices, or fines from the Occupational Safety and Health Administration?
Yes ___ No X

If you responded "Yes" to any of this section's questions 1, 2, or 3 above, please provide a detailed summary for each question containing the following information:

- a) Name and address of the agency issuing the citation or notice
- b) Date of the notice
- c) Nature of the violation
- d) Copies of the infraction notice(s) from the agency
- e) Disposition of case
- f) Amount of fines, if any
- g) Corrective action taken

Attach copies of all citations, notices of violations, warning notices, civil penalties and fines issued by local, state, and federal regulatory agencies, all related correspondence, and proof of payment of fines.

4. Provide a statement (and/or documentation) which describes the Applicant's commitment to environmental protection, environmental maintenance, and environmental enhancement in the Port. - Please see already supplied document referencing 'Section Q Part 4'

Section R

Provide written evidence of Applicant's ability to promote and develop growth in the business activities, projects or facilities of Port Everglades through its provision of the services (i.e., stevedore, cargo handler or steamship agent) it seeks to perform at Port Everglades. For first-time applicants (stevedore, cargo handler and steamship agent), the written evidence must demonstrate Applicant's ability to attract and retain new business such that, Broward County may determine in its discretion that the franchise is in the best interests of the operation and promotion of the port and harbor facilities. The term "new business" is defined in Chapter 32, Part II of the Broward County Administrative Code as may be amended from time to time.

- Please see document titled 'Section R'

If you have checked an Applicant box for VESSEL BUNKERING, VESSEL OILY WASTE REMOVAL, VESSEL SANITARY WASTE WATER REMOVAL, OR MARINE TERMINAL SECURITY, then the following additional information is required:

VESSEL BUNKERING

Note: Check(s) should be made payable to:

BROWARD COUNTY BOARD OF COUNTY COMMISSIONERS and be mailed with this application to:
Port Everglades Business Administration Division
1850 Eller Drive, Fort Lauderdale, FL 33316

Required Public Hearing

Staff review of this application will not commence until such time as all of the above requested information and documentation has been provided and the franchise application has been determined by staff to be complete. All of the above requested information and Sections are required to be completed prior to the scheduling of the public hearing. Staff will request that the Broward County Board of County Commissioners set a public hearing to consider the franchise application and hear comments from the public. The Applicant will be notified of the Public Hearing date and must plan to attend the Public Hearing.

By signing and submitting this application, Applicant certifies that all information provided in this application is true and correct. Applicant understands that providing false or misleading information on this application may result in the franchise application being denied, or in instances of renewal, a franchise revoked. Applicant hereby waives any and all claims for any damages resulting to the Applicant from any disclosure or publication in any manner of any material or information acquired by Broward County during the franchise application process or during any inquiries, investigations, or public hearings.

Applicant further understands that if there are any changes to the information provided herein (subsequent to this application submission) or to its officers, directors, senior management personnel, or business operation as stated in this application, Applicant agrees to provide such updated information to the Port Everglades Department of Broward County, including the furnishing of the names, addresses (and other information as required above) with respect to persons becoming associated with Applicant after its franchise application is submitted, and any other required documentation requested by Port Everglades Department staff as relating to the changes in the business operation. This information must be submitted within ten (10) calendar days from the date of any change made by the Applicant.

Applicant certifies that all workers performing functions for Applicant who are subject to the Longshore and Harbor Workers' Act are covered by Longshore & Harbor Workers' Act, Jones Act Insurance, as required by federal law.

This application and all related records are subject to Chapter 119, F.S., the Florida Public Records Act.

By its execution of this application, Applicant acknowledges that it has read and understands the rules, regulations, terms and conditions of the franchise it is applying for as set forth in Chapter 32, Part II, of the Broward County Administrative Code as amended, and agrees, should the franchise be granted by Broward County, to be legally bound and governed by all such rules, regulations, terms and conditions of the franchise as set forth in Chapter 32, Part II, of the Broward County Administrative Code as amended.

The individual executing this application on behalf of the Applicant, personally warrants that s/he has the full legal authority to execute this application and legally bind the Applicant

Section A part 2 – Resumes/Bios

Russ Stellman –

Managing Member

Mr. Stellman co-founded Proteus Supply and Trading in 2020, taking over the marine fuel and diesel business operations from Tethys Supply and Marketing LLC. He brings 10 years of experience in the Marine Bunkering and Oil Products Trading industries. Russ is responsible for leading the daily commercial and operational activities of Proteus as the Managing Director of Supply and Trading.

Russ joined Tethys in 2016 to develop and manage the marine fuels expansion. Focusing on niche opportunities in the US Gulf and US East coasts, Mr. Stellman positioned Tethys to capitalize on significant operational needs in the U.S marine fuels market.

Prior to joining Tethys, Mr. Stellman managed a vast international marine fuels marketing program for the Vitol subsidiary, Cockett Marine Oil. At Cockett, Mr. Stellman oversaw the marine fuels marketing program covering both the buy and sell sides. Responsible for a global market, Mr. Stellman is well versed in managing multinational trade customers as well as a global pricing models. Preceding his transfer within Cockett back to the US, Mr. Stellman worked as a marine fuels trader based in Dubai, U.A.E. While in Dubai, Mr. Stellman was responsible for building out a European and Middle Eastern customer base. He was also slated to cover trading throughout the Middle East and East Asian Markets, with a specific focus on Fujairah, Singapore, mainland China, Hong Kong, and South Korea. His product focus was marine fuels, including both residuals and distillates. Mr. Stellman originated numerous distillates cargo trades into East Africa as well as facilitating cargo financing for Middle East fuel suppliers.

He Graduated Northern Illinois University from which he received a B.S. in Finance and lives in Chicago

Proteus Supply and Trading, LLC
2347 W Thomas St, Unit 3F
Chicago, IL. 60622. USA

Andy Camp –

Managing Member

Mr. Camp co-founded Proteus Supply and Trading in 2020, taking over the marine fuel and diesel business operations from Tethys Supply and Marketing LLC. Mr. Camp was integral in the launching and management of the Marine fuels business while at Tethys and will continue to manage the financial, credit, regulatory, and investor relations functions for Proteus. He brings his prior experience to the new entity as the Managing Director – COO.

Mr. Camp was the first employee at Tethys, joining the team shortly after the first deal was launched in 2013, and currently runs all operations and risk management across the Tethys Group of companies. He has a blended background of analytics and advanced mathematics mixed with entrepreneurial experience that gives him a unique ability to develop and analyze the various trading programs at Tethys. Mr. Camp started with Tethys as a waterborne diesel trader, executing trades and overseeing operations for over \$1.3 billion of ultra-low sulfur diesel.

Prior to joining Tethys, Mr. Camp was the Lead Asset Economist for oil & gas major BP's 225,000 bbl/day Cherry Point Refinery, assessing and optimizing crude slates with product outputs to maximize refinery value. While at BP, Mr. Camp also spent time on the crude and distillates trading desks running market analytics and investigating new trading strategies. He created and executed a new blending model for the global distillates trading book which achieved 20 cents per gallon margins.

Additionally, Mr. Camp developed chartering optimization models and directly chartered ships for crude, distillates, gasoline, and fuel oil waterborne movements. Prior to joining BP, Mr. Camp completed consulting efficiency projects in process engineering for Procter & Gamble, Kimberly-Clark, and General Motors.

Mr. Camp received a B.S. in Chemical Engineering at the University of Illinois at Urbana-Champaign along with a minor in Technology and Management.

RE: Bunker License Name Change

To Whom it May Concern:

Tethys Supply and Marketing, LLC brought Russell Stellman on board in 2016 to build a Marine Fuel Supply and Trading business - establishing the company as a preferred supplier in the South Florida maritime market. David Musselwhite joined soon after to manage all operations in the South Florida region and uphold the business' focus on operational excellence since inception. In 2020, Tethys sought to focus on the domestic gasoline markets and made the decision to transfer all operations relevant to the business, and physical assets to Russell under the entity Proteus Supply and Trading, LLC ("Proteus"). Attached are bills of sale for the equipment as well as the confirmation from the US Coast Guard Miami District acknowledging current operations to resume as previously established under the Proteus name.

Russell Stellman will continue to be the commercial lead and similarly David Musselwhite will continue to manage daily operational and supply scheduling to maintain the business unit's stellar reputation with the ports, buyers, and local agents under the Proteus name. Proteus and its management team will continue to be important stewards to the South Florida maritime industry, providing a professional and reliable service to bunker buyers for years to come.

We request to change the name on the Port Everglades bunker license from Tethys Supply and Marketing to Proteus Supply and Trading, LLC.

Sincerely,

Joshua Heffron
Tethys Supply and Marketing, LLC

ADDITIONAL REMARKS

THIS ADDITIONAL REMARKS FORM IS A SCHEDULE TO ACORD FORM,

FORM NUMBER: 25 **FORM TITLE:** Certificate of Liability Insurance

POLLUTION EXCLUSION AND BUYBACK (from General Liability policy):

Such coverage as is afforded by this policy shall not apply to any claims arising out of any Discharge of Pollutants.

I. This exclusion shall not, however, apply to Bodily Injury or Property Damage resulting from a Sudden and Accidental Discharge of Pollutants, provided:

- (i) the Discharge of Pollutants commenced on a specific, demonstrable date and time during the period of this policy;
- (ii) the Insured discovers the Discharge of Pollutants within seven (7) days of such commencement and takes reasonable action to contain, control or mitigate such Discharge of Pollutants; and
- (iii) the Insured complies with the specific written notification provisions below, which shall be an express condition precedent to coverage under this endorsement, regardless of whether or not the Company is prejudiced by the Insured's failure to comply with such provisions.

The Insured shall give the Company written notice via electronic mail, registered mail or certified mail of the actual Discharge of Pollutants as soon as possible, but in no case later than sixty (60) days of the commencement of such Discharge of Pollutants. Such written notice shall not be rendered invalid if any part of the sixty (60) day period in which to provide such notice extends beyond the end of the policy period.

II. In addition to the Exclusions in the policy, the following exclusions apply to the coverage provided by Section I of this endorsement:

This insurance shall not cover:

- (a) Bodily Injury or Property Damage arising from any site or location not owned or operated by the Insured, and used by the Insured, or by others on the Insured's behalf, for the handling, storage, disposal, dumping, processing or treatment of waste material.
- (b) Fines, penalties, punitive damages, exemplary damages, treble damages or any other damages resulting from the multiplication of compensatory damages.
- (c) Environmental Damage to property owned, occupied or leased by the Insured.
- (d) Bodily Injury or Property Damage arising from the Insured's intentional, knowing, willful or deliberate non-compliance with any statute, regulation, ordinance, administrative complaint, notice of violation, notice letter, executive order, or instruction of any governmental agency or body. However, this exclusion shall not apply to any intentional Discharge of Pollutants solely for the purpose of mitigating or avoiding imminent Bodily Injury or Property Damage which would otherwise be covered by this policy or this endorsement.
- (e) Environmental Damage existing on any property prior to any Discharge of Pollutants.
- (f) Loss of, damage to or loss of use of property directly or indirectly resulting from subsidence caused by subsurface operations of the Insured.
- (g) Removal of, loss of or damage to subsurface oil, gas or any other substance.
- (h) Cost of evaluating and/or monitoring and/or controlling of seeping and/or contaminating substances

III. Definitions:

As used in this endorsement:

- (a) Discharge of Pollutants means the discharge, dispersal, release or escape of smoke, vapors, soot, fumes, alkalis, toxic chemicals, liquids or gases, waste materials, oil, bunkers, lubricants or other petroleum substance or derivative (including any oil refuse or oil mixed wastes) or other irritants, contaminants, (including saline contamination) pollutants into or upon land, the atmosphere, or any watercourse or body of water. Waste includes materials to be recycled, reconditioned or reclaimed.
- (b) Property Damage means:
 - (i) Physical injury to or destruction of tangible property which occurs during the policy period, including the loss of use of such tangible property arising therefrom;
 - (ii) Loss of use of such tangible property which has not been physically injured or destroyed, provided such loss of use is caused by an occurrence during the policy period; or
 - (iii) Environmental Damage which occurs during the policy period.
- (c) Environmental Damage means physical damage to soil, surface water or groundwater, or plant or animal life, caused by a Discharge of Pollutants and giving rise to Cleanup Costs.
- (d) Cleanup Costs means expenses incurred in the removal or remediation of soil, surface water, groundwater, or other contamination resulting from a Discharge of Pollutants, provided such expenses:
 - 1. Are specifically mandated by any governmental entity duly acting under the authority of environmental law(s), national or local statutes, codes or other laws (including common law) or legislation concerning health or safety or environmental matters pursuant to which the Insured has or may have a legal obligation; or
 - 2. Have been actually incurred by a governmental entity or by a third party.

6030FT.1 BUSINESS NAMED INSURED

This endorsement is a part of the policy. **Because of the type of named insured shown on the Declarations Page of this policy and the changes made below, all references to *resident relatives* and *non-owned cars* in the policy are deleted.** Except for the changes this endorsement makes, all other provisions of the policy remain the same and apply to this endorsement.

1. DEFINITIONS

You or *Your* is changed to read:

You or *Your* means the named insured or named insureds shown on the Declarations Page.

2. LIABILITY COVERAGE (Bodily Injury and Property Damage)

a. Additional Definition

Insured is changed to read:

Insured means:

1. *you* for:
 - a. the ownership, maintenance, or use of:
 - (1) *your car*;
 - (2) a *newly acquired car*, or
 - (3) a *trailer*; and
 - b. the maintenance or use of a *temporary substitute car*;
2. any *person* for his or her use of:
 - a. *your car*;
 - b. a *newly acquired car*;
 - c. a *temporary substitute car*, or
 - d. a *trailer* while attached to a *car* described in a., b., or c. above.

Such vehicle must be used with *your* express or implied permission; and

3. any other *person* or organization vicariously liable for the use of a vehicle by an *insured* as defined in 1. or 2. above, but only for such vicarious liability. This provision applies only if the vehicle is:
 - a. neither *owned by*, nor hired by, that other *person* or organization; and
 - b. neither available for, nor being used for, carrying *persons* for a charge.

Insured does not include the United States of America or any of its agencies.

b. Exclusions

- (1) Exclusion 2. is changed to read:

THERE IS NO COVERAGE FOR AN **INSURED** FOR **BODILY INJURY** TO ANY **PERSON** WHO BOTH RESIDES PRIMARILY WITH AN **INSURED** AND WHO:

- (a) IS RELATED TO THAT **INSURED** BY BLOOD, MARRIAGE, OR ADOPTION; OR
- (b) IS A WARD OR FOSTER CHILD OF THAT **INSURED**;

- (2) Exclusion 5. is changed to read:

THERE IS NO COVERAGE FOR AN **INSURED** FOR **BODILY INJURY** TO THAT

Policy Number: J41 2176-E17-59A

PLEASE ATTACH TO YOUR POLICY BOOKLET

Such vehicle must be used with *your* express or implied permission; and

- 3. any other *person* or organization vicariously liable for the use of a vehicle by an *insured* as defined in 1. or 2. above, but only for such vicarious liability. This provision applies only if the vehicle is:
 - a. neither *owned by*, nor hired by, that other *person* or organization; and
 - b. neither available for, nor being used for, carrying *persons* for a charge.

Insured does not include the United States of America or any of its agencies.

b. **Exclusions**

(1) Exclusion 6. is changed to read:

THERE IS NO COVERAGE FOR AN *INSURED* WHILE MAINTAINING OR USING A VEHICLE IN CONNECTION WITH THAT *INSURED'S* EMPLOYMENT IN OR ENGAGEMENT OF ANY KIND IN A *CAR BUSINESS*. This exclusion does not apply to:

- (a) *you*; or
- (b) any of *your* agents, employees, or business partners while maintaining or using *your car*, a *newly acquired car*, a *temporary substitute car*, or a *trailer owned by you*;

(2) The following exclusion is added:

THERE IS NO COVERAGE FOR AN *INSURED* FOR

DAMAGES RESULTING FROM:

- 1. THE HANDLING OF PROPERTY BEFORE IT IS MOVED FROM THE PLACE WHERE IT IS ACCEPTED BY THE *INSURED* FOR MOVEMENT INTO OR ONTO A VEHICLE FOR WHICH THE *INSURED* IS PROVIDED PROPERTY DAMAGE LIABILITY COVERAGE BY THIS POLICY;
- 2. THE HANDLING OF PROPERTY AFTER IT IS MOVED FROM THE VEHICLE DESCRIBED IN 1. ABOVE TO THE PLACE WHERE IT IS FINALLY DELIVERED BY THE *INSURED*; OR
- 3. THE MOVEMENT OF PROPERTY BY MEANS OF A MECHANICAL DEVICE, OTHER THAN A HAND TRUCK, THAT IS NOT ATTACHED TO THE VEHICLE DESCRIBED IN 1. ABOVE.

4. **NO-FAULT COVERAGE**

Additional Definition

Insured is changed to read:

Insured means any *person* while *occupying* or when struck as a *pedestrian* by:

- 1. *your car*;
- 2. a *newly acquired car*;
- 3. a *temporary substitute car*; or
- 4. a *trailer* while attached to a car described in 1., 2., or 3. above.

6771BE AMENDMENT OF GENERAL TERMS

This endorsement is a part of the policy. Except for the changes this endorsement makes, all other provisions of the policy remain the same and apply to this endorsement.

Cancellation

1. **How and When We May Cancel** is changed to read:

How and When We May Cancel

- (1) This policy may not be cancelled on less than 30 days written notice by *us* to the:

- (a) Department of Highway Safety and Motor Vehicles; and/or
- (b) Department of Agriculture and Consumer Services;

such 30 days notice to commence from the date notice is received by the Department(s) requiring said notice.

- (2) *We* may cancel this policy by mailing or delivering a written notice to the most recent policy address that *we* have on record for the first named insured who is shown on the Declarations Page. The notice will provide the date cancellation is effective.
- (3) Except as provided under **Cancellation Due to Incorrect Premium**, the date cancellation is effective will be at least 45 days after the date *we* mail or deliver the cancellation notice.

- (4) After this policy has been in force for more than 60 days, *we* will not cancel this policy before the end of the current policy period unless it is based on one or more of the following reasons:

- (a) Nonpayment of premium;
- (b) *You*, any *resident relative*, or any other *person* who usually drives *your car* has had his or her driver's license or motor vehicle registration under suspension or revocation during the policy period or the 180 days immediately preceding its effective date, or if the policy is a renewal, during its policy period; or
- (c) Material misrepresentation or fraud.

2. Item (2) of **Cancellation Due to Incorrect Premium** is changed to read:

- (2) If *you* fail to respond by the date stated in the notice *we* will cancel *your* policy. The date cancellation is effective will be at least 45 days after the date *we* mail or deliver the cancellation notice.

INDEMNITY AND PAYMENT BOND

BOND NO. 2301961

KNOW ALL BY THESE PRESENTS:

That we, Proteus Supply and Trading, LLC as INDEMNITOR and Westport Insurance Corporation as SURETY, a surety company authorized to do business in the State of Florida, are held and firmly bound unto BROWARD COUNTY, as OBLIGEE, a political subdivision of the State of Florida, in the full sum of Twenty Thousand and 00/100----- DOLLARS (\$ 20,000.00), for the payment of which we bind ourselves, our heirs, successors, assigns and personal representatives for the performance of the obligations hereinafter set forth:

NOW THEREFORE, the condition of this obligation is such that if INDEMNITOR, its heirs, executors, administrators, successors and assigns shall well and truly save harmless and keep indemnified BROWARD COUNTY, its successors and assigns, from and against all loss, costs, expenses, damages, injury, claims, actions, liabilities and demands of every kind (including but not limited to all reasonable attorney's fees to and through appellate, supplemental and bankruptcy proceedings) which arises from, is caused by, or results from or on account of:

- (i) failure of INDEMNITOR to pay to BROWARD COUNTY, when due, any and all tariff or other charges that have accrued at Port Everglades (whether relating to the furnishing of services or materials to INDEMNITOR, its principals, agents, servants or employees at Port Everglades; or, due to injury to property of Port Everglades; or, stemming from the use of Port Everglades facilities by INDEMNITOR, its principals, agents, servants or employees; or, otherwise); or
- (ii) non-compliance by INDEMNITOR, its principals, agents, servants or employees with applicable laws, ordinances, rules and regulations of the federal, state and local governmental units or agencies (including but not limited to the terms and provisions of the BROWARD COUNTY Code of Ordinances, Administrative Code, and all procedures and policies of the Port Everglades Department), as amended from time to time; or
- (iii) any act, omission, negligence or misconduct of INDEMNITOR, its principals, agents, servants or employees in Port Everglades (whether causing injury to persons or otherwise);

then these obligations shall be null and void, otherwise to remain in full force and effect.

AS A FURTHER CONDITION of this obligation that it shall remain in full force and effect until and unless the Surety provides at least ninety (90) days prior written notice to BROWARD COUNTY of its intention to terminate this Bond.

Any notices required herein shall be given in writing and be delivered to: Broward County's Port Everglades Department, Attn: Director of Administration, 1850 Eller Drive, Fort Lauderdale, Florida 33316, with a copy to: Broward County Administrator, Governmental Center, 115 S. Andrews Avenue, Fort Lauderdale, Florida 33301.

IN WITNESS WHEREOF, INDEMNITOR has caused this Bond to be executed by Andy Camp, on this 14th day of December, 2020, and attested to by its Secretary and its corporate seal to be affixed, and the Surety has caused this Bond to be executed on this 14th day of December, 2020 in its name, by its Attorney-in-Fact, duly authorized to do so.

PROTEUS SUPPLY AND TRADING

Proteus Mobile Pumping Unit

PROTEUS SUPPLY AND TRADING

ABOUT THE UNIT

- The mobile transfer unit is an independent, engine driven pump that is run off a Deutz diesel engine. It is mounted to a trailer that is towed to each supply location.
 - Pump rated up to 350gpm
 - Auxiliary fuel tank provides an additional 50 gallons of diesel for uninterrupted pumping
- DOT approved trailer can be moved to any location
- Ford F350 turbo diesel with towing package
- 300ft of 3' ID Conti Extremelex Transfer hose. Tested and certified by a licensed facility
 - Petroleum transfer rated with a maximum average working pressure of 200psi and a burst rating of 800psi
 - 3" and 4" camlock couplings
 - 3" NPT hose fittings for universal fitment capability
- Pumping Unit Equipment Specification
 - Blackmer cast iron housed positive displacement pump, sliding vane pump
 - 6:1 Gear Reducer (~300RPM)
 - Deutz Diesel Engine
 - 4" Simplex Parker Strainer with Easy Off Top
 - 4" Liquid Controls M60S flow meter w/ Air Eliminator and Strainer
 - 3" Hannay Hose Reel for up to 150' of 3" ID Hose w/ 12V Electric Rewind
 - EPJ 9334-45-46-20 RT; 3" 90 Deg F x F Ductile OPW Joint, 3" FNPT Riser, Aluminum Internals, Bearing-mounted Strap Brake, 2" Rollform Channel Frame, Paint Graphite. 12VDC 001 Motor with Junction Box & Exp-proof Switch, with 12/60 Clutch & Reduction Unit
 - On unit, mechanical emergency shutoff
 - GE Druck UNIK 5000 Pressure Sensing Platform with automatic pump/engine shutoff before pressure reaches relief valve activation level
 - Pressure relief valve. Stainless Steel Piping and 4"-3" Hose Adapter

BILL OF SALE

BE IT KNOWN, that for the payment in the sum of \$10,000, the full receipt of which is acknowledged, the undersigned Tethys Supply and Marketing LLC ("Seller") hereby sells and transfers to Proteus Supply and Trading, LLC ("Buyer"), the following described utility trailer ("Vehicle").

Make:	Sure Trac	Style:	Truck
Year:	2017	VIN #:	5JW1U1425H1208031
Color:	Black	Title #:	56726845
Model or Series:	ST8214TAT-B-070	Odometer Reading:	N/A

The sale is subject to the following conditions and representations:

Seller warrants to Buyer that Seller has good and marketable title to said property, full authority to sell and transfer said property. The Property is sold free of all liens, encumbrances, liabilities, and adverse claims of every nature and description whatsoever.

Said Vehicle is sold in "as is" condition and where currently located. The Vehicle is sold without any warranty of any kind from the Seller to the Buyer.

The Buyer accepts full responsibility for any repairs and/or costs incurred following the Effective Date below as well as any Costs related to vehicle registration, safety certification, or transfer of ownership. All risks and responsibilities pass to the Buyer upon the Effective Date and the Buyer takes possession of the Vehicle.

Date of Signature (Effective Date) : 20 August 2020

MOTOR VEHICLE BILL OF SALE

BE IT KNOWN, that for the payment in the sum of [REDACTED], the full receipt of which is acknowledged, the undersigned Tethys Supply and Marketing LLC ("Seller") hereby sells and transfers to Proteus Supply and Trading, LLC ("Buyer"), the following described motor vehicle ("Vehicle").

Make:	Ford	Style:	Truck
Year:	2017	VIN #:	1FT8X3BT3HED24291
Color:	Gray	Odometer Reading:	[REDACTED]
Model or Series:	F-350		

The sale is subject to the following conditions and representations:

ODOMETER DISCLOSURE:

Seller certifies to the best of Seller's knowledge that the odometer reading listed in the vehicle description above reflects the actual mileage of the Vehicle. The Vehicle's odometer was not altered, set back, or disconnected while in the Seller's possession, and the Seller has no knowledge of anyone ever doing so.

CONDITIONS AND WARRANTY:

Seller warrants to Buyer that Seller has good and marketable title to said property, full authority to sell and transfer said property. The Property is sold free of all liens, encumbrances, liabilities, and adverse claims of every nature and description whatsoever.

Said Vehicle is sold in "as is" condition and where currently located. The Vehicle is sold without any warranty of any kind from the Seller to the Buyer.

The Buyer accepts full responsibility for any repairs and/or costs incurred following the Effective Date below as well as any Costs related to vehicle registration, safety certification, or transfer of ownership. All risks and responsibilities pass to the Buyer upon the Effective Date and the Buyer takes possession of the Vehicle.

Safety manual on bunkering procedures for the South Florida Ports

INTRODUCTION

A safety manual on bunkering procedures has been developed by Proteus Supply and Trading. The safety manual outlines the safety regulations and demands that are required for safe handling in bunkering operations, including truck-to-ship (TTS) operations within the operating area of the South Florida Ports. The safety manual is valid in combination with Port Regulations and Safety Directives. In addition, international and national laws, regulations, and guidelines must be followed in all operations. The applicable rules and regulations are to be reviewed at regular intervals in order to keep the regulatory framework up-to-date.

**Our Goal is to do NO HARM TO PEOPLE, PROPERTY, OR THE
PLANET!**

Safe Transfer of Bunkers

To ensure the transfer of bunkers in the Port is completed in a manner that is safe and does not result in the discharge of pollution, adequate planning and preparation must be undertaken. To ensure a safe standard of operation is maintained, the following considerations should be taken into account when planning for bunkering.

Night Transfer Operations

Some restrictions on transfers of oil or fuel to ships exist between sunset and sunrise. Night transfer operations may be undertaken, subject to approval from the Port, and provided that the transfer operations take place in accordance with the conditions stated in the approval.

Planning for Bunkering Operations

The following aspects of the operations must be planned and communicated to all parties involved prior to commencing bunkering.

For all bunkering operations:

- Ships **MUST** maintain their propulsion machinery ready for immediate departure in the event of an emergency.
- Weather conditions are appropriate, and moorings are adequate for anticipated weather throughout the operation. Any weather limitations **MUST** be identified.
- Moorings are adequate for predicted tidal conditions and are tended throughout the operation.
- Means of access to and from dock to ship is maintained.
- Individual responsibilities of personnel involved in monitoring the transfer are clearly understood.
- All transfer apparatus to be used, including equipment, tanks and pipeline systems, should be checked to be in good working order.
- Briefing with the fuel supplier should include the method of communication, pump rates and emergency stop procedures.

Preparation by Vessel Receiving Bunkers

Ships receiving bunkers should ensure the following preparations are completed:

- Plug scuppers to prevent spills from entering the water.
- Check ullage and confirm volume to be supplied.
- Check tanks, pipe system and pumps are set up and confirm any ship internal transfer processes.
- Organize drip trays and save-alls.
- Ensure emergency spill equipment is ready to contain and clean up any accidental spill.
- Ensure no ignition sources are within 50 feet of any bunker flange and/or vent pipes associated with the transfer operation.
- Ensure a visual watch is maintained throughout the entire transfer operation.
- Ensure all areas remain clean and spill free.
- The bunker hoses are well supported and are of sufficient length of allow for movement of the ship.
- Any cargo handling in progress will not hinder bunker transfer operations.

Preparation by Road Tanker

Road tankers delivering bunkers should ensure the following preparations are completed:

- The bunker hoses are in good condition and are “in test” in accordance with the appropriate standard, and the test certificate is available on request.
- The bunker hoses are well supported, are of sufficient length and allow for movement of the ship.
- The bunker connection has a good seal.
- If applicable there is a well tightened bolt in every bolt hole of the bunker pipe connection flange.
- Any hose spanning the water must be of a continuous length containing no joins or connections.

Responsibilities of Vessel and Road Tanker

Prior to commencement of bunkering:

- A DOI must be completed.
- Spill and emergency management procedures must be agreed upon.

Once bunkering has commenced:

- No smoking, naked flame or hot work is permitted.
- A constant visual watch is maintained throughout the entire transfer operation, especially during start up and topping off.
- Weather and sea conditions must be constantly monitored, and moorings appropriately tended.
- Sufficient absorbent spill material is available on site to deal with any accidental spillage.
- Action must be taken to stop or contain any spill and guidelines in the FRP MUST be followed.
- Visual check of water around ships to identify any spills.

Communication Arrangements

During transfer operations there should be regular communication maintained between the vessel and supplier. Once the method of communication is initially established, the following information should be exchanged:

- Confirm transfer starting and stopping procedures.
- Confirm transfer rates, pressures and quantities.
- Confirm emergency stop procedures.
- Confirm method of raising the alarm in the event of an emergency.

Emergency Procedures (Refer to the FRP)

Procedures for handling all emergencies may vary but should include as a minimum:

- Method of raising the alarm.
- Responsibilities of key personnel.
- Action taken by employees to ensure their own safety and the safety of those around them.

Personal Protective Equipment (PPE)

Hazards exist in every workplace in many different forms: sharp edges, falling objects, flying sparks, chemicals, noise and a myriad of other potentially dangerous situations.

Personal protective equipment, commonly referred to as “**PPE**”, is equipment worn to minimize exposure to a variety of hazards. Examples of PPE include such items as gloves, foot and eye protection, protective hearing devices (earplugs, muffs) hard hats, respirators and full body suits.

Required PPE for Bunkering Operations

Following is a list of all PPE that **MUST** be worn during all transfer operations.

- Eye and Face Protection: ANSI Z87.1-1989 (USA Standard for Occupational and Educational Eye and Face Protection).
- Head Protection: ANSI Z89.1-1986.
- Foot Protection: ANSI Z41.1-1991.
- Hand Protection: Natural **Latex** Rubber Gloves (there is no ANSI standard for gloves)
- Hearing Protection: Ear Plugs

PPE Maintenance

Following is a guide for proper care and maintenance of PPE:

- **Head Protection**

Head protection that is either too large or too small is inappropriate for use, even if it meets all other requirements. Protective headgear must fit appropriately on the body and for the head size of each individual. Most protective headgear comes in a variety of sizes with adjustable headbands to ensure a proper fit (many adjust in 1/8-inch increments). A proper fit should allow sufficient clearance between the shell and the suspension system for ventilation and distribution of an impact. The hat should not bind, slip, fall off or irritate the skin. Some protective headgear allows for the use of various accessories to help employees deal with changing environmental conditions, such as slots for earmuffs, safety glasses, face shields and mounted lights. Optional brims may provide additional protection from the sun and some hats have channels that guide rainwater away from the face. Protective headgear accessories must not compromise the safety elements of the equipment. Periodic cleaning and inspection will extend the useful life of

protective headgear. A **daily inspection** of the hard hat shell, suspension system and other accessories for holes, cracks, tears or other damage that might compromise the protective value of the hat is essential. Paints, paint thinners and some cleaning agents can weaken the shells of hard hats and may eliminate electrical resistance. Consult the helmet manufacturer for information on the effects of paint and cleaning materials on their hard hats. Never drill holes, paint or apply labels to protective headgear as this may reduce the integrity of the protection. Do not store protective headgear in direct sunlight, such as on the rear window shelf of a car, since sunlight and extreme heat can damage them.

Hard hats with any of the following defects should be removed from service and replaced: Perforation, cracking, or deformity of the brim or shell; Indication of exposure of the brim or shell to heat, chemicals or ultraviolet light and other radiation (in addition to a loss of surface gloss, such signs include chalking or flaking). Always replace a hard hat if it sustains an impact, even if damage is not noticeable. Suspension systems are offered as replacement parts and should be replaced when damaged or when excessive wear is noticed. It is not necessary to replace the entire hard hat when deterioration or tears of the suspension systems are noticed.

- **Foot Protection**

As with all protective equipment, safety footwear should be inspected prior to each use. Shoes should be checked for wear and tear at reasonable intervals. This includes looking for cracks or holes, separation of materials, broken buckles or laces. The soles of shoes should be checked for pieces of metal or other embedded items that could present electrical or tripping hazards. Employees should follow the manufacturers' recommendations for cleaning and maintenance of protective footwear.

- **Hand Protection**

Protective gloves should be inspected before each use to ensure that they are not torn, punctured or made ineffective in any way. A visual inspection will help detect cuts or tears but a more thorough inspection by filling the gloves with water and tightly rolling the cuff towards the fingers will help reveal any pinhole leaks. Gloves that are discolored or stiff may also indicate deficiencies caused by excessive use or degradation from chemical exposure. Any gloves with impaired protective ability should be discarded and replaced. Reuse of chemical-resistant gloves should be evaluated carefully, taking into consideration the absorptive qualities of the gloves. A decision to reuse chemically-exposed gloves should take

PROTEUS BUNKER FUEL SUPPLY

Substance Abuse Policy

Section 1: General Policy

Proteus Supply and Trading, LLC has implemented a Substance Abuse Policy which is directed at protecting the working environment, the health and safety of employees, co-workers, supervisors, sub-supervisors and the general public. The Substance Abuse Policy combines drug and alcohol testing with education, supervisor training and access to assistance.

Section 2: Testing Options (Drug and Alcohol)

- 1) Post-Accident-Drug and alcohol testing of an employee in a safety sensitive position within a designated time period after an accident that involves a fatality, disabling injury or significant incident. Drug testing should take place within 32 hours of accident. Alcohol testing should take place within 2 hours of accident with attempts to test for up to 8 hours. If unable to test, reasons will be documented.
- 2) Reasonable Cause Testing-An employee in a safety-sensitive position will be tested for alcohol and/or drug use where a company supervisor or other official, who is trained to identify drug/alcohol use by an employee, makes observations which form a reasonable basis for suspecting the employee is in breach of this policy. Such observations must be clearly stated, specific, and documented, concerning appearance, speech or body odor of employee. Observations may include indications of chronic and withdrawal effects of drug/alcohol use.
 - a. Observations which may lead to reasonable cause testing are not limited to, but include:
 - i) odor of alcoholic beverage on breath
 - ii) slurred speech
 - iii) glassy eyes
 - iv) unsteadiness in walking, standing, etc.
 - v) flushed face
 - vi) disoriented and or drowsy
 - vii) repeated errors in job performance
 - viii) excessive absenteeism or lateness
 - ix) credible complaints of drug and or alcohol use at work
- 3) Pre-Access-Drug and Alcohol testing of employees in safety sensitive positions to gain and or maintain access to company or client sites where safety is a bona fide occupational requirement.
- 4) Return to Duty-Drug and or Alcohol testing of an employee who has engaged in prohibited conduct and is returning to work after an assessment by a Substance Abuse Professional(SAP).
- 5) Follow-Up-on an unannounced basis for at least one year on return after a Substance Abuse Professional (SAP) assessment identifies the need to resolve a problem with alcohol or drug abuse.

Section 3: Collection of Specimens and Analysis

- 1) A designated drug testing company will collect and process urine specimens for drug testing as required. All testing must meet or exceed the guidelines and standards of the Substance Abuse and Mental Health Services Administration which is the certifying agency for forensic urine drug testing laboratories in Canada and the United States. Drug testing refers to marijuana, cocaine, amphetamines, opiates and phencyclidine.
- 2) Alcohol screen testing will be with an approved saliva tester or breathe test. All alcohol screening tests at .00 or higher will be confirmed with an approved Evidential Breath Alcohol Testing Device.
- 3) Following proper chain of custody procedures an accredited laboratory will perform required testing with test results forwarded to a Medical Review Officer (MRO). See Appendix "A".

PROTEUS BUNKER FUEL SUPPLY

Section 4: Prohibitions

Alcohol Use

- Alcohol concentration: No employee shall report for duty or remain on duty requiring the performance of safety sensitive functions while having a confirmed alcohol concentration of 0.00 or greater. No supervisor having actual knowledge that an employee has a confirmed alcohol concentration of 0.00 or greater shall permit the employee to perform or continue to perform safety sensitive functions.
- On duty use: No employee shall use alcohol while performing safety sensitive functions. No supervisor having actual knowledge that an employee is using alcohol while performing safety sensitive functions shall permit an employee to perform or continue to perform safety sensitive functions.
- Pre-duty use: No employee shall perform safety sensitive functions within eight hours after using alcohol. No supervisor having actual knowledge that an employee has used alcohol within eight hours shall permit an employee to perform or continue to perform safety sensitive functions.
- Use following an accident: No employee required to take a post-accident alcohol test shall use alcohol for eight hours following the accident, or until he/she undergoes a post-accident alcohol test, whichever occurs first.

Drug Use

- No employee shall report for duty or remain on duty requiring the performance of safety sensitive functions when the employee uses any drug, except when the use is pursuant to the instructions of a licensed medical practitioner who has advised the employee that the substance will not adversely affect the employee's ability to work safely at the job site. If a licensed medical practitioner advises the employee that the substance will affect the employee's ability to work in a safety sensitive position, the employee will notify his/her immediate supervisor. The supervisor will advise senior management of the circumstances.
- Senior management shall ensure that the employee is removed from safety sensitive duties and accommodated to meet safety concerns. Accommodation may include work restrictions, modified duties, sick or disability leave.
- No employee will intentionally misuse prescription or over the counter medications in such a manner as to render themselves unfit to safely perform their duties.

Refusal to Test

- Refusal to submit to a required alcohol or drug test: No employee shall refuse to submit to a post-accident alcohol or drug test, reasonable cause alcohol or drug test, pre-access alcohol or drug test, return to duty alcohol or drug test or a follow up alcohol or drug test. No supervisor shall permit an employee who refuses to submit for required testing to perform or continue to perform safety sensitive functions. An employee who refuses to submit to a required test, tampers or attempts to tamper with a test sample or obstructs the testing process will be considered to have violated this policy. Positive test procedures will apply.

Fitness for Work / Use of Drugs and/or Alcohol

- Possession, use or offering for sale of alcohol, drugs or drug paraphernalia on company or client sites or company vehicles is prohibited. Fitness for duty standards require that an employee be capable of performing work functions in a safe and efficient manner.

Section 5: Positive test procedures

- Employees found positive on drug tests as verified by MRO will be removed from duty/suspended without pay.
- Employees with any confirmed alcohol concentration will be removed from duty immediately and will not be allowed to return to work until the following shift. The employee may be subject to corrective disciplinary action or removed from duty/suspended without pay.

PROTEUS BUNKER FUEL SUPPLY

- Employees removed from duty/suspended having a positive drug test verified by an MRO and or any confirmed alcohol concentration will be required to attend a meeting with Senior management who will review each case and provide written correspondence of the resources available in evaluating and resolving problems associated with the misuse of alcohol and or drugs, including the names, addresses and telephone numbers of Substance Abuse Professionals. Where practical management will endeavor to meet or contact the employee the next working day and direction will be provided regarding the suspension and return to work choices
- Any employee who was removed/suspended from duty having a positive drug test result verified by an MRO and or any confirmed alcohol concentration shall be evaluated by a Substance Abuse Professional who shall determine what assistance, if any, the employee needs in resolving substance abuse issues.
- In order for this policy to be effective in ensuring that Company employees will perform their safety sensitive functions unimpaired by alcohol or drugs, the provisions of this policy must be enforced. Accordingly, where an employee violates any provision(s) of this policy, the employee may be subject to corrective disciplinary action, as appropriate, up to and including removal from a client site and or discharge.

Section 6: Return to work after a positive test

- An employee cannot be returned to safety sensitive duties until he/she has been evaluated by a Substance Abuse Professional, complied with recommendations, and has a negative result on a return to duty test. The employee must provide a written report from the SAP verifying the evaluation and any required treatment or provide a release document for the required information.
- Follow up testing will be conducted to monitor the returning employee for no less than one year. The frequency of testing will be determined by the company in consultation with the MRO and or SAP and will be designed to assist the employee in remaining alcohol and or drug free at the work site.

Section 7: Confidentiality and Record Keeping

- All drug test results are confidential and are released by the MRO to the designated company representative (DER) or alternate. Alcohol test results are confidential and released by the testing company to the DER or alternate. The DER or alternate may release relevant information to company decision makers as required. Confidential information from a SAP will be handled in a similar manner.
- All records will be maintained in a locked and secure manner. Records will be kept separate from personnel files. Negative test results will be maintained for no less than one year with positive test results and SAP assessments maintained for a five-year period.

Section 8: Definitions

- Alcohol-The intoxicating agent in beverage alcohol, ethyl alcohol or other low molecular weight alcohols including methyl or isopropyl alcohol.
- Drug-Any substance other than food which is taken to change the way the body or mind functions. Drug testing refers to marijuana, cocaine, opiates, phencyclidine and amphetamines with cut-off levels as per the Substance Abuse and Mental Health Services Administration of the Department of Health and Human Services which is the certifying agency for forensic urine drug testing laboratories in Canada and the United States.

Safe Work Practices Requirements:

- Must meet or exceed OH&S regulations
- All employees are encouraged to report improper work practices through incident report forms
- Employee participation in development of safe work practice

Proteus Supply and Trading, LLC
2347 W Thomas St, Unit 3F
Chicago, IL. 60622. USA

Training Procedures

154.1050 Training. (a) A response plan submitted to meet the requirements of §§ 154.1035 or 154.1040, as appropriate, must identify the training to be provided to each individual with responsibilities under the plan. A facility owner or operator must identify the method to be used for training any volunteers or casual laborers used during a response to comply with the requirements of 29 CFR 1910.120

General Employee Training

All personnel are required to complete internet-based training courses that cover hazard response procedures, hazardous material recognition and evaluation including instruction on the United States DOT Emergency Response Guidebook, emergency preparedness, hazardous material characteristics, use of respirators, and use of firefighting equipment. To complete a course successfully, personnel must pass an exam at the end of each course with a minimum score of 80%. Personnel are required to take part in ongoing training. Personnel are required annually to take part in field exercises. In addition, personnel take part in firefighting training and other specialized training courses.

Each new employee is required to undergo on the job training under a trained supervisor. This training includes job-specific training; instruction in hazards and safety issues related to the job; normal and abnormal situations; emergency procedures; facility malfunctions and appropriate corrective actions; and instruction in controlling any discharge to minimize the potential for fire, explosion, toxicity or environmental damage. Annual evaluations are made of the training program to ensure that personnel and supervisors maintain a thorough knowledge of any updates or revisions in operations. A copy of the plan and training records are maintained in the Chicago headquarters.

Initial and periodic review discussions on FRP procedures for personnel will take place during tabletop drills and cover the following:

- Their responsibilities under the FRP
- The name and the procedure for contacting the QI on a 24-hour basis
- Operator's 24-hour telephone number

Initial and periodic review discussions on FRP procedures will be conducted during the tabletop drill with reporting personnel and will cover the following:

- The content of the information summary of the FRP
- The toll-free telephone number of the NRC
- The notification processes

Initial and periodic review discussions on FRP procedures will be conducted during the tabletop drill with personnel engaged in response activities attending and will cover the following:

- The characteristics and hazards of the oil discharged
 - The conditions that are likely to worsen emergencies, including the consequences of facility malfunctions and their appropriate corrective actions
 - The steps necessary to control any accidental discharge of oil and to minimize the potential for fire, explosion, toxicity, or environmental damage
 - The proper fire-fighting procedures and the use of equipment
-

Proteus Supply and Trading, LLC
2347 W Thomas St, Unit 3F
Chicago, IL. 60622. USA

Exercise Procedures

Exercises are to be conducted as outlined in the PREP guidelines in accordance with exercises applicable to facility owned MTR facilities in 33 CFR 154.1055

Proteus will conduct QI Notification Exercises on a quarterly basis. The Notification Exercise will consist of a Shift Foreman initiating a mock spill notification to the QI or alternate QI (in the event the QI is unavailable). The Shift Foreman will document who was called, the time and date of the notification and the phone numbers called during the drill. **TABLES 1 AND 2** contain forms to document these exercises

3.1	DRILL: QI Notification MTR Facility
Applicability:	Facility.
Frequency:	Quarterly.
Initiating Authority:	Facility owner or operator.
Participating Elements:	Facility personnel and QI.
Scope:	Exercise communications between facility personnel and QI.
Objectives:	Voice contact and confirmation must be made with a QI as detailed in the plan. Electronic messaging may be used only if communication by voice is not possible.
Certification:	Self-certification.
Verification:	USCG COTP/FOSC.
Records Retention:	Three years.
Records Location:	Records to be kept at the facility.
Evaluation:	Self-evaluation.
Credit:	Plan holder may claim credit for this exercise when conducted in conjunction with other exercises, as long as all objectives are met, the exercise is evaluated, and a proper record is generated. Credit may be claimed for an actual response when these objectives are met, the response is evaluated, and a proper record is generated.

Proteus Supply and Trading, LLC
2347 W Thomas St, Unit 3F
Chicago, IL. 60622. USA

3.8	DRILL: Emergency Procedures MTR Facilities (optional) *
Applicability:	Facility.
Frequency:	Quarterly.
Initiating Authority:	Facility owner or operator.
Participating Elements:	Facility personnel.
Scope:	Exercise the emergency procedures for the facility to mitigate or prevent any discharge, or a substantial threat of such discharge, of oil resulting from facility operational activities associated with oil transfers.
Objectives:	<p>A. Conduct an exercise of the facility's emergency procedures to ensure personnel knowledge of actions to be taken to mitigate a spill. This exercise may consist of a walk-through of the emergency procedures.</p> <p>B. Exercise should involve one or more of the sections of the emergency procedures for spill mitigation. For example, the exercise should involve a simulation of a response to an oil spill.</p> <p>C. The facility should ensure that spill mitigation procedures for all contingencies at the facility are addressed at some time.</p>
Certification:	Self-certification.
Verification:	USCG COTP/FOSC.
Records Retention:	Three years.
Records Location:	At each facility.
Evaluation:	Self-evaluation.
Credit:	Plan holder may claim credit for this exercise when conducted in conjunction with other exercises, as long as all objectives are met, the exercise is evaluated, and a proper record is generated. Credit may be claimed for an actual response when these objectives are met, the response is evaluated, and a proper record is generated.

Proteus Supply and Trading, LLC
2347 W Thomas St, Unit 3F
Chicago, IL. 60622. USA

3.9	TTX: Incident Management Team Exercise MTR Facilities
Applicability:	Facility IMT.
Frequency:	Annually.
Initiating Authority:	Facility owner or operator.
Participating Elements:	IMT as established in the response plan.
Scope:	Exercise the IMT's organization, communication, and decision-making in managing a spill response.
Objectives:	<p>Exercise the IMT in a review of:</p> <ul style="list-style-type: none"> A. Knowledge of the response plan; B. Proper notifications; C. Communications system; D. Ability to access an OSRO; E. Coordination of internal organization personnel with responsibility for spill response; F. Annual review of the transition from a local team to a regional, national, and international team as appropriate; G. Ability to effectively coordinate spill response activity with the NRS infrastructure (If personnel from the NRS are not participating in the exercise, the IMT should demonstrate knowledge of response coordination with the NRS); H. Ability to access information in the ACP for location of sensitive areas, resources available within the area, unique conditions of area, etc.; and I. Minimum of one IMT exercise in a triennial cycle must involve simulation of a WCD scenario.
Certification:	Self-certification.
Verification:	USCG COTP/FOSC.
Records Retention:	Three years.
Records Location:	At each facility.
Evaluation:	Self-evaluation.
Credit:	<p>Plan holder may claim credit for this exercise when conducted in conjunction with other exercises, as long as all objectives are met, the exercise is evaluated, and a proper record is generated. Credit may be claimed for an actual response when these objectives are met, the response is evaluated, and a proper record is generated.</p> <p>Plan holders are responsible for ensuring that IMTs are familiar with Area Committees/RRTs and ACPs in every Area in which the plan holder operates. While it is not practicable to require an IMT to exercise in every Area/region in which they offer coverage each year, each IMT is expected to review ACPs annually and the makeup of Area Committees/RRTs in all Areas in which they offer coverage. Self-certification for exercise credit should include IMT certification that the IMT has completed an annual review and is familiar with the ACPs and Area Committees/RRTs in all Areas in which the plan holder operates.</p>

Proteus Supply and Trading, LLC
2347 W Thomas St, Unit 3F
Chicago, IL. 60622. USA

3.13	DRILL: Equipment Deployment MTR Facilities (Facility owned equipment)
Applicability:	Facilities with facility-owned and operated response equipment.
Frequency:	Semiannually.
Initiating Authority:	Facility owner or operator.
Participating Elements:	Facility personnel.
Scope:	<p>Deploy and operate facility-owned and operated response equipment identified in the response plan. The equipment to be deployed would be the equipment necessary to respond to an AMPD at the facility.</p> <p>All of the facility's personnel involved in equipment deployment operations must be included in a comprehensive training program and a comprehensive maintenance program. Credit should be taken for deployment conducted during training. The maintenance program must ensure that the equipment is periodically inspected and maintained in good operating condition in accordance with the manufacturer's recommendations and best commercial practices. All inspection and maintenance must be documented by the owner.</p>
Objectives:	<p>Demonstrate ability of facility personnel to deploy and operate equipment.</p> <p>At least annually, conduct deployment of dispersant application resources, if applicable.</p> <p>Ensure equipment is in proper working order.</p>
Certification:	Self-certification.
Verification:	USCG COTP/FOSC.
Records Retention:	Three years.
Records Location:	Records to be kept at facility.
Evaluation:	Self-evaluation.
Credit:	<p>Plan holder may claim credit for this exercise when conducted in conjunction with other exercises, as long as all objectives are met, the exercise is evaluated, and a proper record is generated. Credit may be claimed for an actual response when these objectives are met, the response is evaluated, and a proper record is generated.</p>

Proteus Supply and Trading, LLC
2347 W Thomas St, Unit 3F
Chicago, IL. 60622. USA

3.16	FE+DRILL: Government Initiated Unannounced Exercise MTR Facilities
Applicability:	MTR FRP holders within the Area.
Frequency:	As selected; plan holders who have successfully completed a GIUE will not be required to participate in another one for at least 36 months from the date of the exercise.
Initiating Authority:	USCG.
Participating Elements:	MTR, and Mobile MTR FRP holders.
Scope:	A. Unannounced exercises are limited to a maximum of four exercises per Area per year. B. Exercises are limited to approximately four hours in duration. C. Exercises must involve response to an AMPD scenario.
Objectives:	Conduct proper notifications and equipment deployment to respond to an unannounced scenario of an AMPD. Demonstrate that the response is: <ol style="list-style-type: none"> 1. Timely: As a general rule, the regulatory planning standard is containment equipment (e.g., booms) on scene within one hour of notification and recovery equipment (e.g., skimmers and temporary storage) on scene within two hours. Therefore, in a GIUE, a plan holder should be able to initiate a simulated cleanup or SMFF response within approximately two hours of exercise commencement; 2. Conducted with adequate amount of equipment deployed for the given scenario; and 3. Properly conducted.
Certification:	USCG COTP/FOSC.
Verification:	USCG COTP/FOSC.
Records Retention	Three years.
Records Location:	At the facility.
Evaluation:	Evaluation to be conducted by initiating agency.
Credit:	Plan holder may receive credit for other required exercises (a QI notification, equipment deployment exercise, and unannounced exercise) if the GIUE is successfully completed, objectives of the other exercise(s) are met, and a proper record is generated.

The Integrated Management Information System (IMIS) was designed as an information resource for in-house use by OSHA staff and management, and by state agencies which carry out federally-approved OSHA programs. Access to this OSHA work product is being afforded via the Internet for the use of members of the public who wish to track OSHA interventions at particular work sites or to perform statistical analyses of OSHA enforcement activity. It is critical that users of the data understand several aspects of the system in order to accurately use the information.

The source of the information in the IMIS is the local federal or state office in the geographical area where the activity occurred. Information is entered as events occur in the course of agency activities. Until cases are closed, IMIS entries concerning specific OSHA inspections are subject to continuing correction and updating, particularly with regard to citation items, which are subject to modification by amended citations, settlement agreements, or as a result of contest proceedings. THE USER SHOULD ALSO BE AWARE THAT DIFFERENT COMPANIES MAY HAVE SIMILAR NAMES AND CLOSE ATTENTION TO THE ADDRESS MAY BE NECESSARY TO AVOID MISINTERPRETATION.

The Integrated Management Information System (IMIS) is designed and administered as a management tool for OSHA to help it direct its resources. When IMIS is put to new or different uses, the data should be verified by reference to the case file and confirmed by the appropriate federal or state office. Employers or employees who believe a particular IMIS entry to be inaccurate, incomplete or out-of-date are encouraged to contact the OSHA field office or state plan agency which originated the entry.

Proteus Supply and Trading, LLC
2347 W Thomas St, Unit 3F
Chicago, IL. 60622. USA

Section Q part 4

Proteus takes Safety and Environmental concerns extremely seriously and it has been the top priority in all aspects of the development of our Marine Fuels Supply operation.

- Our supply method *employs a single hose connection between the ship and shore for the entire bunker supply*
 - Only one connect and one disconnect over water regardless of the number of trucks unloaded, drastically reducing the opportunity for an incident
- Highest Safety standards, over 1,500 days without a lost time incident and no spills
- Proteus employs a strict training program
- All of Proteus' equipment is well maintained, and engineered specifically for safe, efficient transfers
- Proteus focuses solely on Marine Fuels so rather than a broad or vague safety program and implementation, ours was designed with concern to the proximity of sensitive environments in every transfer
- Proteus hires only marine fuel supply specialists for all operational roles with multiple years of experience in over-water transfers

Proteus Supply and Trading, LLC
2347 W Thomas St, Unit 3F
Chicago, IL. 60622. USA

Section R

We are committed to Proteus to continue to be the preferred supplier for many shipping companies of marine distillate fuels in South Florida. Our supply method is inherently safer and more efficient than competitors.

Many shipping companies that currently call South Florida ports forego purchasing bunker fuels due to:

- Cost
- Time Constraints
- Unreliable supply

We have addressed these issues in the following ways –

- Cost – with lower overhead we are able to deliver product at more competitive levels
 - Additionally, the Proteus team has vast experience procuring and blending a variety of fuels. As economics and demand dictates, we are able to be flexible in our sourcing of products to bring into the Florida Marine Fuels market that will give the ports a competitive advantage
- Time Constraints – Proteus pumping unit was built specifically for supplying marine fuels and was engineered to deliver diesel fuels at much higher rates than other shore-based fuel suppliers
- Unreliable Supply – Proteus focuses solely on Marine Fuels and diesel supply, in over 1,100 deliveries under this management we are yet to delay a single vessel

Additionally, Proteus has implemented the following global delivery standards not present with other South Florida shore based marine fuel suppliers –

- Continuous drip sampler – ensures customers have a homogenous, sealed sample of the product delivered that they can test in their preferred lab
- Fully Marpol Compliant documentation and procedures
- Detailed 'Declaration of Inspection' – to be filled out with the receiving ship's captain prior to delivery

FACILITY RESPONSE PLAN AMENDMENT# 20-1388

Proteus Supply and Trading
Attn: Mr. David Musselwhite
2347 West Thomas St. Unit 3F
Chicago, IL 60622

Dear Mr. Musselwhite:

On October 12, 2020, you submitted amendments for your Facility Response Plan (FRP) for Proteus Supply and Trading. I have reviewed your request and I approve the following amendments:

- a. Facility name has changed from Tethys Supply and Marketing to Proteus Supply and Trading.
- b. Physical location for main office has changed from 954 W. Washington Blvd, Suite 250, Chicago IL to 2347 W Thomas St. Unit 3F, Chicago IL.

Please insert these amendments and a record of changes to your approved FRP. When you update the record of changes, please provide the amendment number above. Your facility must operate in compliance with the approved FRP, all approved amendments, and any additional requirements contained in Title 33 Code of Federal Regulations (CFR) Parts 154 and 156. **Keep a copy of this letter with your response plan.**

If you have any questions, please contact the Sector Miami Facilities and Containers Branch at (305) 695-2344 or by e-mail at facmiami@uscg.mil.

Sincerely,

A handwritten signature in blue ink, appearing to read "C. M. Briggs".

FACILITY RESPONSE PLAN APPROVAL LETTER# 17-0658

Tethys Supply and Marketing, LLC
Attn: Russell Stellman
954 W Washington Blvd, Suite 250
Chicago, IL 60607

Dear Russell Stellman:

My staff has determined that Tethys Supply and Marketing, LLC meets Title 33 Code of Federal Regulations Part 154 (33 CFR 154) and it is hereby approved. **This approval is valid until October 11, 2022.**

You are reminded that Tethys Supply and Marketing, LLC is prohibited from handling, storing, transporting, transferring, or lightering oil unless it is operating in full compliance with this plan. Compliance includes ensuring that the required resources are in place and available through contract or other approved means.

You are required to resubmit an updated plan every five years in accordance with 33 CFR 154.1030 and 33 CFR 154.1060. If you make any changes outlined in 33 CFR 154.1065(b), such as changing the types of oil handled or your OSRO, you must submit revisions to this office within 30 days. Finally, you must notify this office if you make revisions to personnel and telephone number lists included in the response plan.

Please refer to the facility identification number MIAMOB003 in any future correspondence. If you have any questions, please contact the Sector Miami Prevention Department, Facilities and Containers Branch at (305) 695-2344.

Sincerely,

A handwritten signature in blue ink, appearing to read "J. K. Velasco".

Introduction and Plan Contents

Introduction

Plan Contents

This Oil Spill Response Plan (hereafter referred to as the "Plan") describes organizational lines of responsibility and procedures to be followed when responding to spill incidents at the Mobile Transfer Unit/s operated by Tethys Supply and Marketing, LLC.

This Plan contains comprehensive technical and procedural information necessary for effective management of any oil spill response within the geographic boundaries of the response area of the Plan as described in ***Scope of Plan/Geographic Areas***. The plan also defines notification procedures for contacting company management and government authorities. It identifies spill response resources which can be used by Tethys during a response operation.

Purpose/Objectives

The purpose of this Plan is to help company personnel prepare for and respond quickly and safely to spill incidents originating at the bulk storage facility or within the transportation network. The Plan's primary purpose is to ensure an effective, comprehensive response and prevent injury or damage to company employees, the public and the environment. The specific objectives of the Plan are to:

- Define alert and notification procedures to be followed when a spill occurs.
- Outline response procedures and techniques to be used during a spill incident.
- Provide guidelines for handling a spill response operation. Document resources available to assist with a spill incident

Company Information

154.1035 (a)(1)

General Information:

Tethys Supply and Marketing, LLC

Head Office:

954 W Washington Blvd, Suite 250 Chicago, IL
60607

Main: (312) 846-6006

Mobile: (773)766-8073 (24 hrs)

Fax: (312) 888-4920

Website: www.tethysgrp.com

154.1035 (a)(2)

This manual is for mobile transfer facilities. Mooring areas, transfer locations and other related site-specific requirements vary with each transfer. However, when doing a mobile transfer with a vessel, before completing a pre-bunkering checklist, the Person in Charge will verify that the appropriate safety precautions are taken prior to commencement of any transfer operations.

The locations of transfer in respect to this Facility Response Plan consist of various docks/berths at:

- Port Everglades
- Miami Port
- Port of Palm Beach

The Qualified individual is responsible for coordinating supply location and timing with the relevant vessel's representative agent and communicating this information with USCG and port authorities prior to delivery.

Site maps for each location are included in both this FRP and Tethys Operations Manual.

154.1035 (a)(3)

See 154.1035 (a)(1) above

Emergency Notification Phone List

EMERGENCY DIAL 911

Immediate notification is required to the National Response Center for any spill that threatens to enter or enters navigable waters. Do not wait to obtain all information before notifying the NRC.

TABLE 11-3 EMERGENCY NOTIFICATION LIST	
CONTACT	TELEPHONE NUMBER
SPILLS WHICH THREATEN OR ENTER NAVIGABLE/STATE WATERS REQUIRE NOTIFICATION TO:	
National Response Center (NRC)	(202) 267-2675 (24 hours) (800) 424-8802 (24 hours)
EPA Region IV Spill Hotline	(404) 562-8700

U.S. Geological Survey District Office Southeastern Region Tallahassee, FL	(888) 275-8747 (24 hours)
QI (day and evening) phone numbers	See Qualified Individual info on page (below page 7)

Qualified Individual Information

All qualified individuals reside in the United States, speak fluent English, are trained in the facility response plan, and are knowledgeable of their responsibilities in the instance of a spill.

All QIs have full responsibility to activate and contract the contracted Oil Spill Response Organization, MSRC.

Additionally, all QIs will have the authority to liaise with Federal On-Scene Coordinators and obligate funds as necessary to carry out an oil spill response.

Qualified Individuals:

David Musselwhite - Qualified Individual

24 hr number - 772-353-9933

Robert Finnegan - Alternate Qualified Individual

24 hr number - 773-495-6343

Tethys does not have a PIC list because the QI will be on scene for every transfer and is therefore authorized to carry out any and all requirements in regards to an oil spill event

Spill Response Notification Form

SPILL RESPONSE NOTIFICATION FORM

Initial notification must not be delayed pending collection of all information

You must report a spill if:

- Discharges that cause a sheen or discoloration on the surface of a body of water;
- Discharges that violate applicable water quality standards; and
- Discharges that cause a sludge or emulsion to be deposited beneath the surface of the water or on adjoining shorelines.

Reporting a hazardous substance release or oil spill takes only a few minutes. To report a release or spill, contact the federal government's centralized reporting center, the National Response Center (NRC), at 1-800-424-8802. The NRC is staffed 24 hours a day by U.S. Coast Guard personnel, who will ask you to provide as much information about the incident as possible.

Notification Procedures

All spills regardless of size must be reported to the company's QI immediately. Any spill to the water you must notify the NRC and USCG.

All Tethys PICs are also authorized, trained and regarded as the QI per company guidelines during all deliveries for which they perform. All QIs are required to follow the Spill Response Guideline set forth in this document.

In the event of a fire emergency, the Person in Charge will secure the affected area and immediately notify the local fire department by dialing 911.

In the event of an oil spill, the Person in Charge will ensure that all the proper authorities have been notified. In addition, the Person in Charge, using the materials on hand, will direct available personnel to assist in the deployment of equipment and corrective actions in order to mitigate damage.

In the event of an accident, the Person in Charge will notify the local emergency medical service and/ or fire department by dialing 911.

At the time of a spill the PIC on site shall perform any necessary action to STOP the continuation of the spill.

Immediately shut down the transfer Close Block Valve

Deploy Spill Containment

Utilize booms and pads to contain spill and prevent run off to Soil and Water

Disengage pumping system on mobile pumping unit

Ensure all drain valves on tank trucks are closed by driver. Immediately contain spill.

Divert spill from contacting the soil.

Mobile pumping unit will carry liquid cleanup and de-volatizer

Utilize booms, pads, berms, and drain covers to prevent run off from contacting the soil/water/drains

The QI will evaluate the situation to determine, through documentation, if the spill consist of more than 25 liquid gallons. If so, the QI will contact the DEP,

Upon evaluation of the Spill if it is determined to be in excess of 25 liquid gallons and beyond the scope of the on-staff PCC contractor, the QI will make arrangements with DEP as well as our contracted Spill Responder.

Preventing a spill is our main goal. Inspect your hose lines and piping daily.

Facility Spill Mitigation Procedures

154.1035(b)(2)(i)

Average most probable discharge from the MTR facility;
25 gallons. (Computed as 1% of worst case discharge)

Maximum most probable discharge from the MTR facility;
250 gallons. (Computed as 10% of worst case discharge)

Worst case discharge from the MTR facility per 3 CFR 154.1029
2,500 gallons. This is the maximum volume of each compartment within the tank truck trailer. The mobile pumping unit will be receiving product from only 1 compartment at a time.

Procedures to follow to mitigate or prevent a discharge of oil involving the following scenarios:

- Hose failure
- Tank overfill
- Tank failure
- Explosion or fire
- Equipment failure (pumping system failure, relief valve failure, etc.)

Hose failure

- Stop the transfer operation
- Notify Transfer Personnel
- Close supply side Block Valve
- Deploy Containment systems
- Notify National Response Center (If applicable)
- Notify Response Contractor (If applicable)

Tank overfill

- Stop the transfer operation
- Notify Transfer Personnel
- Close supply side Block Valve
- Deploy Containment systems
- Notify National Response Center (If applicable)
- Notify Response Contractor (If applicable)

Tank failure

- Stop the transfer operation
- Notify Transfer Personnel
- Close supply side Block Valve
- Deploy Containment systems
- Notify National Response Center (If applicable)
- Notify Response Contractor (If applicable)

Explosion or fire

- Stop the transfer operation
- Notify Transfer Personnel
- Close supply side Block Valve / if safe
- Call 911
- Assess situation and perform fire extinguishment if possible

Equipment failure

- Stop the transfer operation.
- Notify Transfer Personnel
- Close supply side Block Valve
- Deploy Containment systems (if applicable)
- Follow company procedures on repair and replacement

In the event of a reportable spill, refer to **Appendix 3.0 on page 58 for MSRC equipment list and to the Emergency Notification Phone list on page 6 for contact information.**

- The QIs have the responsibility for coordinating emergency response measures in the event of a release, which could threaten human health or the environment.
- All QIs have full responsibility and authority to activate and contract the contracted Oil Spill Response Organization, MSRC.
- Additionally, all QIs will have the authority to liaise with Federal On-Scene Coordinators and obligate funds as necessary to carry out an oil spill response.
- As a substantial harm operator, Tethys Supply and Marketing has contracted USCG approved OSRO '*Marine Spill Response Organization*' to respond to and perform all cleanup activities in the event of an oil spill

General Response Strategies

First Response to a Spill

Anyone observing a spill should immediately take action or contact the necessary qualified person to take emergency action to stop flow at the source safely. Examples of such action are:

- Stop necessary pumps.
- Close block valves to stop line leaks.
- Stop fuel pumps to minimize leakage from fuel lines.

Upon notification or observance of a spill, the QI will assume command and take control of the response to the incident and will initiate mitigating action and ensure that appropriate government agencies are notified.

Preventing Fire and Explosion

Fire and explosion are potential dangers during petroleum product spills. Although flammability varies dramatically with the type of spilled product and the circumstances of the spill, it is essential that all reasonable steps be taken, as soon as possible, to minimize the chance of accidental ignition of the spilled product(s).

Examples of such steps are:

- Cease all operations.
- Deploy containment systems to limit the spread of vapors
- Maintain intrinsically safe environment such as shutting off electric circuits that might create a fire hazard, if possible. Under some circumstances, even a simple switch or electric motor can cause a dangerous spark.

Remember that fans, blowers, electric lights, and electric pumps all have switches and/or electric motors.

- Extinguish smoking materials.

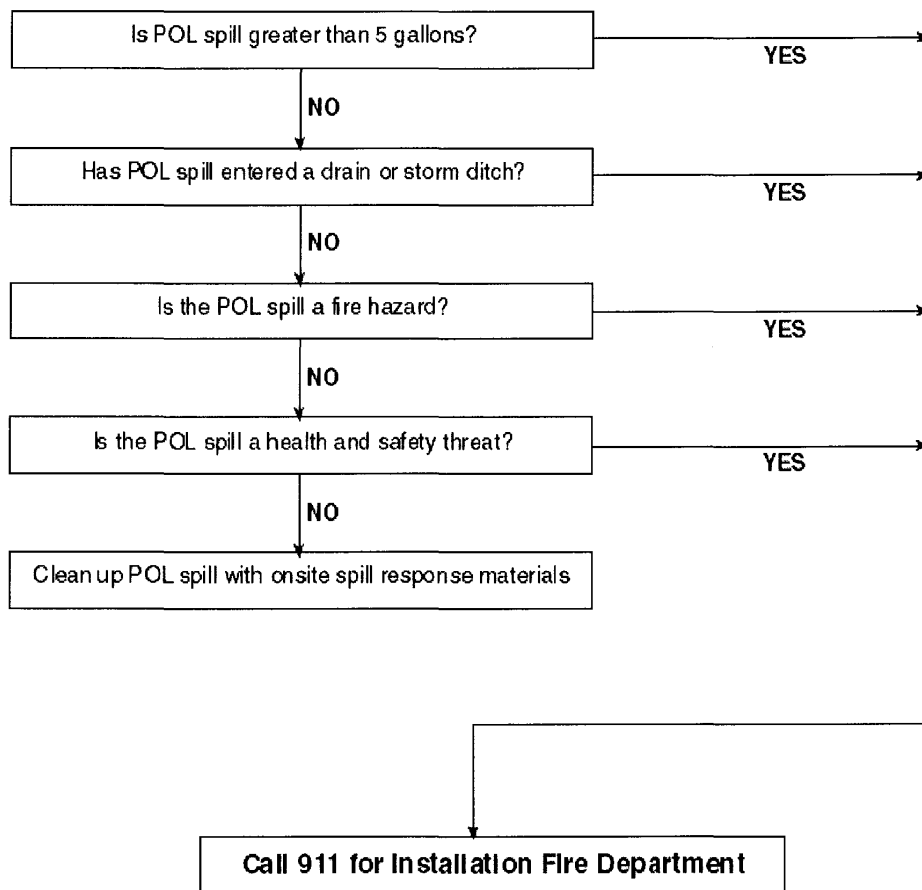

Removal of Spilled Product

Physical removal of the product is the preferred action in almost all cases. Containment and recovery should be attempted. Spills remaining within the confines of the facility and not reaching the water will be cleaned up using materials such as sorbents to contain and pick up any spilled product. Oil soaked absorbents, and other contaminated debris will be disposed of at an approved site.

Facility Response Activities

Immediate Actions POL

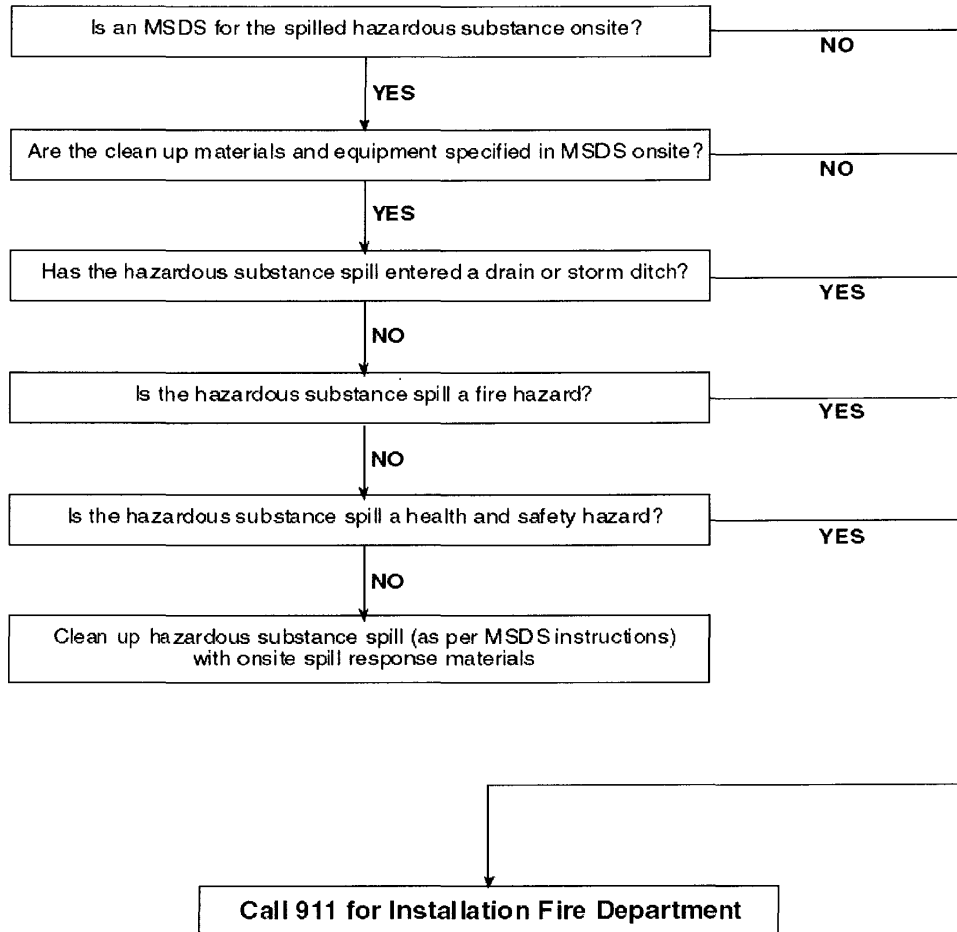

Stop the product flow. Without endangering personnel health and safety, prevent any further POL spillage. Use onsite spill response materials to minimize or prevent the POL spill from entering a drain or storm ditch.

Immediate Actions Hazardous Substances

Stop the product flow. Without endangering personnel health and safety, prevent any further hazardous substance spillage.

Use onsite spill response materials (if appropriate as per MSDS instructions) to minimize or prevent the hazardous substance spill from entering a drain or storm ditch.

Tethys Team Spill Response Procedures

The moment a release is identified; response actions should be immediately implemented.

Three priorities must be observed in any emergency situation:

- Safety of human health

- Protection of the environment
- Notification of appropriate personnel

Response procedures:

- Recognition of the release
- Notification of coordinator(s)
- Activation of alarms, if necessary
- Evacuation of all non-essential personnel
- Evaluation of the release
- Notification of local authorities and response centers, if necessary
- Corrective actions
- Clean up and disposal of waste materials, if necessary
- Report preparation, completion and submittal

RESPONSE ACTION PROCEDURE

In the event there is an oil release within the facility, the following procedures shall be followed:

In the event of a spill/release the QI shall be prepared to provide the following information to agencies/emergency contractor:

- Your Name and Location
- Location and Direction of the Release
- Identification and Amount of Oil Involved
- Individual(s) at the Scene and Action(s) Taken

The Emergency Coordinators/QIs have the responsibility for coordinating emergency response measures in the event of a release, which could threaten human health or the environment.

All QIs have full responsibility to activate and contract the contracted Oil Spill Response Organization, MSRC.

Additionally, all QIs will have the authority to liaise with Federal On-Scene Coordinators and obligate funds as necessary to carry out an oil spill response.

The Tethys QI shall determine whether the release is reportable to outside regulatory agencies by following criteria:

- Oil release greater than 25 gallons (reportable quantity)
- Oil release of any quantity that has reached surface water or into a sewer, ditch, or culvert leading off the property
- NOTE: Any release that results in exposure to persons solely within the boundaries of the facility does not require notification.

If the released material is identified as being reportable, immediate notification must be made to the following:

National Response Center

- Phone: 800-424-8802

MSRC

- (800) 645-7745 (24 hours)

- (800) 259-6772 (24 hours)
- (732) 417-0175 (24 hours – commercial)
- (703) 326-5609 (backup)

Qualified Individual:

- Every PIC for Tethys will be designated as a QI before ever performing a supply independently

VP of Marine Fuels:

- Russell Stelman – (773) 766-8073

Fish and Wildlife and Sensitive Environments

Port Everglades

SITE: Port Everglades

INLET SUMMARY SHEET

RANKING (DEGREE OF DIFFICULTY):

A.

PRINCIPAL RESOURCES AT RISK:

Atlantic green turtles and Atlantic loggerhead turtles nest on outer beaches. Manatees present. Seabirds. Patches of mangroves along the Intracoastal Waterway. Port and marina facilities, boats, and seawalls, revetments, docks, etc. along the Waterway. Power plant intakes. For further information refer to the recent ESI map and data as well as to the GRP.

PRELIMINARY PROTECTION STRATEGY:

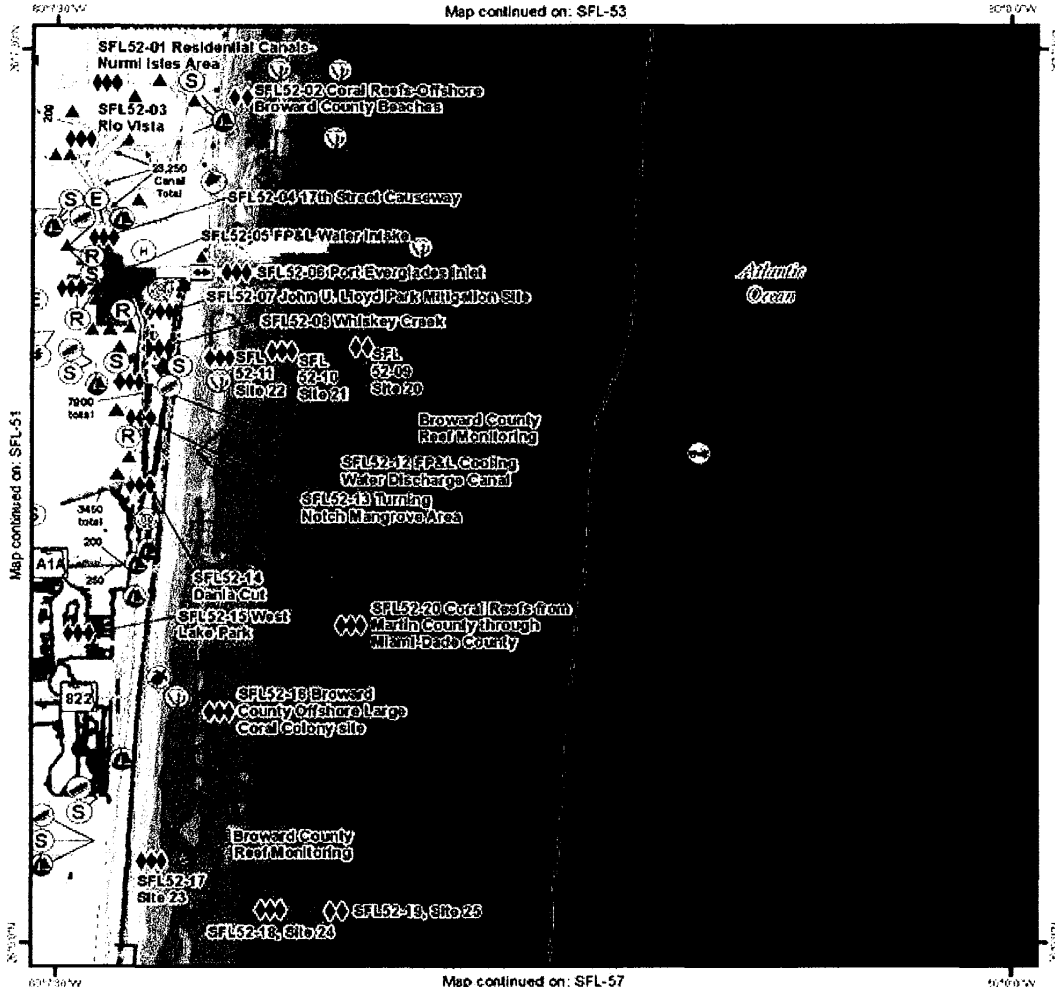

Divert oil entering the port through the marginal flood channels to collection points on the outer sand beaches (CPs 1 and 2). Use a moderately long deflection boom to divert oil to a sand beach on the north side of the main inlet channel located about 300 yards inland from the short north jetty (CP3). Place protection boom in front of the riprap located immediately to the east of CP3. Also use a line of protection boom to protect the shoreline of the U.S. Naval Reservation on the south side of the main inlet channel. Extend a line of deflection boom from the northwest shoreline of the Naval Reservation, south, across the ICW channel to divert oil away from the Florida Power and Light (FPL) intake canal to a collection point in the southwest corner of the turning basin (CP4) and boom off the intake canal with protection boom as a precautionary measure. Use several other lines of deflection boom, including two in Christmas tree configurations, to divert oil to collection points inside the northern two ship canals of the port (CPs 7 and 8) and also to CP4 (southern limb of the large C. tree). Place another line of deflection boom out into the main inlet channel in order to divert oil to the sand beach at the west end of the northern shoreline of the main inlet channel (CP9). Use a line of deflection boom extended obliquely across the north entrance of the ICW to divert oil to a seawall at CP10. Divert oil entering the ICW to the south with a line of deflection boom about 0.6 miles long deployed obliquely across of the ICW that leads to a collection point in a small boat basin along the mainland shoreline (CP5). If entrainment is anticipated, use a short line of deflection boom to divert oil to a collection point on the mainland shore immediately north of the FPL discharge canal (CP6). This canal and adjacent mangrove shoreline should be shielded by protection boom.

OTHER COMMENTS:

The 1994 NOAA Tidal Current Tables reported that tidal currents between the jetties at the entrance to Port Everglades reach 0.6 knots at maximum flood tide and 0.7 knots at maximum ebb tide. The 1989 NOAA Coastal Pilot reported that flood and ebb currents can reach 3-4 knots at times.

Lake Worth Inlet

Collection Point Description

Inlet: Lake Worth Inlet, Palm Beach County, Florida

Site Name: Collection Point #2

Relative Location: Southwest end of the Singers Island.

Latitude: 26° 46' 24.010" N **Longitude:** 80° 2' 16.836" W

Water Depth Description: On the side of the main inlet channel.

Currents: Possibility of 2-3 knot currents (or more) in the main inlet channel.

Shoreline Description: Riprap along entire shoreline.

Access: There is a parking lot adjacent to the collection site, but there may not be vehicle access from the parking lot to the shoreline. The only other vehicle access is at the west end of the north jetty, and drive along the footpath to the collection point.

Collection Point Description

Inlet: Lake Worth Inlet, Palm Beach County, Florida

Site Name: Collection Point #1

Relative Location: On the outer beach just north of the north jetty.

Latitude: 26° 46' 26.100" N **Longitude:** 80° 1' 53.238" W

Currents: 1-3 knots along shore to the south during rising tide.

Shoreline Description: Sand beach.

Access: Drive to the north side of the north jetty on S. Ocean Ave. From there, it is about 170 yards to the beachface. May have to use watercraft.

Additional Comments: Collection point should be located north of the sand transfer plant.

Collection Point Description

Inlet: Lake Worth Inlet, Palm Beach County, Florida

Site Name: Collection Point #3

Relative Location: On south side of main inlet channel about 100 yards west of CP2.

Latitude: 26° 46' 12.695" N Longitude: 80° 2' 30.210" W

Water Depth Description: Shallow tidal flat onshore, deep main inlet channel offshore.

Currents: Possible flood currents up to 3-4 knots out in channel.

Shoreline Description: Former sand beach. Now riprap in front of seawall (place protection boom along riprap for oil to accumulate on).

Access: Difficult. Large houses behind seawall; probably by watercraft.

Collection Point Description

Inlet: Lake Worth Inlet, Palm Beach County, Florida

Site Name: Collection Point #4

Relative Location: The central basin at the Port of Palm Beach.

Latitude: 26° 46' 3.724" N Longitude: 80° 3' 4.567" W

Water Depth Description: 25 ft. deep in basin.

Currents: Probably not much more than 1-2 knots.

Shoreline Description: Concrete seawalls in basin.

Access: Paved to bulkhead.

Additional Comments: If using basin is undesirable, the outer seawall could be used as a collection site.

Collection Point Description
Collection Point Description

Inlet: Lake Worth Inlet, Palm Beach County, Florida

Site Name: Collection Point #7

Relative Location: Northeast side of Peanut Island

Latitude: 26° 46' 28.673" N **Longitude:** 80° 2' 34.861" W

Currents: Possibly 2-3 knot flood currents across the flood-tidal delta.

Shoreline Description: Fine-grained sand beach.

Access: Beach is right beside a paved road.

Collection Point Description

Inlet: Lake Worth Inlet, Palm Beach County, Florida

Site Name: Collection Point #6

Relative Location: On outer beach about 800 yards south of the south jetty.

Latitude: 26° 45' 52.112" N **Longitude:** 80° 2' 11.054" W

Currents: 1-3 knots along shore to the north during rising tide.

Shoreline Description: Fine-grained sand beach. Nearshore reef.

Access: Very good. Drive to where Onondaga Avenue comes close to beach. There is access to the open beach at that point. Use caution around nearshore reef.

Collection Point Description

Inlet: Lake Worth Inlet, Palm Beach County, Florida

Site Name: Collection Point #8

Relative Location: West side of Peanut Island.

Latitude: 26° 46' 18.781" N Longitude: 80° 2' 57.502" W

Currents: Up to 3 knot flood currents (Knudsen, pers. comm.).

Shoreline Description: Sand beach.

Access: On Peanut Island. Sand track/paved road nearby; possibly by watercraft.

154.1035(b)(4)(iii) – Worst Case Discharge

- As a substantial harm operator, Tethys Supply and Marketing has contracted USCG approved OSRO 'Marine Spill Response Organization' to respond to and perform all cleanup activities in the event of an oil spill
- In the event of a worst-case discharge, the Qualified Individual present at the supply operation is responsible for and given full authority to activate MSRC to respond for cleanup efforts at:
 - (800) 645-7745 (24 hours)
 - (800) 259-6772 (24 hours)
 - (732) 417-0175 (24 hours – commercial)
 - (703) 326-5609 (backup)
- MSRC equipment available in the Miami Sector can be found in Appendix 3.0 on page 60 in this FRP

Disposal Plan

- **This subsection describes to be taken or procedures to be used to ensure that all recovered oil and oil contaminated debris produced as a result of any discharge are disposed according to Federal, state, or local requirements.**
 - If water has perceptible contamination it will be transferred to a holding tank for subsequent treatment or it will be transferred to the oil-water separator when such facility is installed.
 - The unloading transport areas must be kept clean and any small spills must be cleaned up immediately. Any spillage resulting from these areas, which have secondary containment, must be controlled under the provisions of this regulation and FL laws. All on site storm drain catch basins and trench drains must be sealed in the event of a petroleum spill. Contaminated wastewater drainage from the unloading areas must be pumped into containers for storage and shipped to proper wastewater handling facilities
- Wastes resulting from a minor discharge response will be containerized in impervious bags, drums, or buckets. The facility manager will characterize the waste for proper disposal and ensure that it is removed from the facility by a licensed waste hauler within two weeks.
- Wastes resulting from a major discharge response will be removed and disposed of by a licensed cleanup contractor.
- Once a release has been contained and the material collected, plans must be made to dispose of any contaminated waste. Disposal of all spill-related wastes will be coordinated through the QUALIFIED INDIVIDUAL Hazardous Waste Management Branch and conducted by specialists in that area in accordance with Federal, State, local, and Tethys Supply and Marketing regulations. If temporary storage of spill related wastes is required, the materials will be stored at the designated tanks at the facility. The following identifies usual disposal actions for the materials listed:
 - Recovered Product - Turned over to QUALIFIED INDIVIDUAL and disposed of as a hazardous waste (often incinerated or recycled) by a licensed cleanup contractor.
 - Contaminated Soil - Depending upon material spilled, either turned over to QUALIFIED INDIVIDUAL or disposed of as a hazardous waste.
 - Contaminated Equipment and Materials - Decontaminated on site by cleaning (cleaning liquid contained and disposed of as a hazardous waste) or disposed of in an approved landfill (i.e., brooms, filters, etc.)
 - Personal Protective Equipment - Turned over to QUALIFIED INDIVIDUAL and disposed of as a hazardous waste.
 - Decontamination Solutions - Turned over to QUALIFIED INDIVIDUAL and disposed of as a hazardous waste.
 - Adsorbents - Depending upon material spilled, either disposed of as a hazardous waste or taken to landfill and air stripped as per licensed cleanup contractor air permit.
 - Spent Chemicals - Turned over to QUALIFIED INDIVIDUAL and disposed of as a hazardous waste.

Training Procedures

154.1050 Training. (a) A response plan submitted to meet the requirements of §§ 154.1035 or 154.1040, as appropriate, must identify the training to be provided to each individual with responsibilities under the plan. A facility owner or operator must identify the method to be used for training any volunteers or casual laborers used during a response to comply with the requirements of 29 CFR 1910.120

General Employee Training

All personnel are required to complete internet-based training courses that cover hazard response procedures, hazardous material recognition and evaluation including instruction on the United States DOT Emergency Response Guidebook, emergency preparedness, hazardous material characteristics, use of respirators, and use of firefighting equipment. To complete a course successfully, personnel must pass an exam at the end of each course with a minimum score of 80%. Personnel are required to take part in ongoing training. Personnel are required annually to take part in field exercises. In addition, personnel take part in firefighting training and other specialized training courses.

Each new employee is required to undergo on the job training under a trained supervisor. This training includes job-specific training; instruction in hazards and safety issues related to the job; normal and abnormal situations; emergency procedures; facility malfunctions and appropriate corrective actions; and instruction in controlling any discharge to minimize the potential for fire, explosion, toxicity or environmental damage. Annual evaluations are made of the training program to ensure that personnel and supervisors maintain a thorough knowledge of any updates or revisions in operations. A copy of the plan and training records are maintained in the Chicago headquarters.

Initial and periodic review discussions on FRP procedures for personnel will take place during tabletop drills and cover the following:

- Their responsibilities under the FRP
- The name and the procedure for contacting the QI on a 24-hour basis
- Operator's 24-hour telephone number

Initial and periodic review discussions on FRP procedures will be conducted during the tabletop drill with reporting personnel and will cover the following:

- The content of the information summary of the FRP
- The toll-free telephone number of the NRC
- The notification processes

Initial and periodic review discussions on FRP procedures will be conducted during the tabletop drill with personnel engaged in response activities attending and will cover the following:

- The characteristics and hazards of the oil discharged
- The conditions that are likely to worsen emergencies, including the consequences of facility malfunctions and their appropriate corrective actions
- The steps necessary to control any accidental discharge of oil and to minimize the potential for fire, explosion, toxicity, or environmental damage
- The proper fire-fighting procedures and the use of equipment

Exercise Procedures

Exercises are to be conducted as outlined in the PREP guidelines in accordance with exercises applicable to facility owned MTR facilities in 33 CFR 154.1055

Tethys will conduct QI Notification Exercises on a quarterly basis. The Notification Exercise will consist of a Shift Foreman initiating a mock spill notification to the QI or alternate QI (in the event the QI is unavailable). The Shift Foreman will document who was called, the time and date of the notification and the phone numbers called during the drill. **TABLES 1 AND 2** contain forms to document these exercises

3.1	DRILL: QI Notification – MTR Facility
Applicability:	Facility.
Frequency:	Quarterly.
Initiating Authority:	Facility owner or operator.
Participating Elements:	Facility personnel and QI.
Scope:	Exercise communications between facility personnel and QI.
Objectives:	Voice contact and confirmation must be made with a QI as detailed in the plan. Electronic messaging may be used only if communication by voice is not possible.
Certification:	Self-certification.
Verification:	USCG COTP/FOSC.
Records Retention:	Three years.
Records Location:	Records to be kept at the facility.
Evaluation:	Self-evaluation.
Credit:	Plan holder may claim credit for this exercise when conducted in conjunction with other exercises, as long as all objectives are met, the exercise is evaluated, and a proper record is generated. Credit may be claimed for an actual response when these objectives are met, the response is evaluated, and a proper record is generated.

3.8 DRILL: Emergency Procedures – MTR Facilities (optional) *	
Applicability:	Facility.
Frequency:	Quarterly.
Initiating Authority:	Facility owner or operator.
Participating Elements:	Facility personnel.
Scope:	Exercise the emergency procedures for the facility to mitigate or prevent any discharge, or a substantial threat of such discharge, of oil resulting from facility operational activities associated with oil transfers.
Objectives:	<p>A. Conduct an exercise of the facility's emergency procedures to ensure personnel knowledge of actions to be taken to mitigate a spill. This exercise may consist of a walk-through of the emergency procedures.</p> <p>B. Exercise should involve one or more of the sections of the emergency procedures for spill mitigation. For example, the exercise should involve a simulation of a response to an oil spill.</p> <p>C. The facility should ensure that spill mitigation procedures for all contingencies at the facility are addressed at some time.</p>
Certification:	Self-certification.
Verification:	USCG COTP/FOSC.
Records Retention:	Three years.
Records Location:	At each facility.
Evaluation:	Self-evaluation.
Credit:	Plan holder may claim credit for this exercise when conducted in conjunction with other exercises, as long as all objectives are met, the exercise is evaluated, and a proper record is generated. Credit may be claimed for an actual response when these objectives are met, the response is evaluated, and a proper record is generated.

3.9 TTX: Incident Management Team Exercise – MTR Facilities	
Applicability:	Facility IMT.
Frequency:	Annually.
Initiating Authority:	Facility owner or operator.
Participating Elements:	IMT as established in the response plan.
Scope:	Exercise the IMT's organization, communication, and decision-making in managing a spill response.
Objectives:	<p>Exercise the IMT in a review of:</p> <ul style="list-style-type: none"> A. Knowledge of the response plan; B. Proper notifications; C. Communications system; D. Ability to access an OSRO; E. Coordination of internal organization personnel with responsibility for spill response; F. Annual review of the transition from a local team to a regional, national, and international team as appropriate; G. Ability to effectively coordinate spill response activity with the NRS infrastructure (If personnel from the NRS are not participating in the exercise, the IMT should demonstrate knowledge of response coordination with the NRS); H. Ability to access information in the ACP for location of sensitive areas, resources available within the area, unique conditions of area, etc.; and I. Minimum of one IMT exercise in a triennial cycle must involve simulation of a WCD scenario.
Certification:	Self-certification.
Verification:	USCG COTP/FOSC.
Records Retention:	Three years.
Records Location:	At each facility.
Evaluation:	Self-evaluation.
Credit:	<p>Plan holder may claim credit for this exercise when conducted in conjunction with other exercises, as long as all objectives are met, the exercise is evaluated, and a proper record is generated. Credit may be claimed for an actual response when these objectives are met, the response is evaluated, and a proper record is generated. Plan holders are responsible for ensuring that IMTs are familiar with Area Committees/RRTs and ACPs in every Area in which the plan holder operates. While it is not practicable to require an IMT to exercise in every Area/region in which they offer coverage each year, each IMT is expected to review ACPs annually and the makeup of Area Committees/RRTs in all Areas in which they offer coverage. Self-certification for exercise credit should include IMT certification that the IMT has completed an annual review and is familiar with the ACPs and Area Committees/RRTs in all Areas in which the plan holder operates.</p>

3.13	DRILL: Equipment Deployment – MTR Facilities (Facility-owned equipment)
Applicability:	Facilities with facility-owned and operated response equipment.
Frequency:	Semiannually.
Initiating Authority:	Facility owner or operator.
Participating Elements:	Facility personnel.
Scope:	<p>Deploy and operate facility-owned and operated response equipment identified in the response plan. The equipment to be deployed would be the equipment necessary to respond to an AMPD at the facility.</p> <p>All of the facility's personnel involved in equipment deployment operations must be included in a comprehensive training program and a comprehensive maintenance program. Credit should be taken for deployment conducted during training. The maintenance program must ensure that the equipment is periodically inspected and maintained in good operating condition in accordance with the manufacturer's recommendations and best commercial practices. All inspection and maintenance must be documented by the owner.</p>
Objectives:	<p>Demonstrate ability of facility personnel to deploy and operate equipment.</p> <p>At least annually, conduct deployment of dispersant application resources, if applicable.</p> <p>Ensure equipment is in proper working order.</p>
Certification:	Self-certification.
Verification:	USCG COTP/FOSC.
Records Retention:	Three years.
Records Location:	Records to be kept at facility.
Evaluation:	Self-evaluation.
Credit:	Plan holder may claim credit for this exercise when conducted in conjunction with other exercises, as long as all objectives are met, the exercise is evaluated, and a proper record is generated. Credit may be claimed for an actual response when these objectives are met, the response is evaluated, and a proper record is generated.

3.16 FE+DRILL: Government-Initiated Unannounced Exercise – MTR Facilities	
Applicability:	MTR FRP holders within the Area.
Frequency:	As selected; plan holders who have successfully completed a GIUE will not be required to participate in another one for at least 36 months from the date of the exercise.
Initiating Authority:	USCG.
Participating Elements:	MTR, and Mobile MTR FRP holders.
Scope:	<ul style="list-style-type: none"> A. Unannounced exercises are limited to a maximum of four exercises per Area per year. B. Exercises are limited to approximately four hours in duration. C. Exercises must involve response to an AMPD scenario.
Objectives:	<p>Conduct proper notifications and equipment deployment to respond to an unannounced scenario of an AMPD. Demonstrate that the response is:</p> <ul style="list-style-type: none"> 1. Timely: As a general rule, the regulatory planning standard is containment equipment (e.g., booms) on scene within one hour of notification and recovery equipment (e.g., skimmers and temporary storage) on scene within two hours. Therefore, in a GIUE, a plan holder should be able to initiate a simulated cleanup or SMFF response within approximately two hours of exercise commencement; 2. Conducted with adequate amount of equipment deployed for the given scenario; and 3. Properly conducted.
Certification:	USCG COTP/FOSC.
Verification:	USCG COTP/FOSC.
Records Retention	Three years.
Records Location:	At the facility.
Evaluation:	Evaluation to be conducted by initiating agency.
Credit:	Plan holder may receive credit for other required exercises (a QI notification, equipment deployment exercise, and unannounced exercise) if the GIUE is successfully completed, objectives of the other exercise(s) are met, and a proper record is generated.

Plan Review and Update Procedures

The FRP will be reviewed at least every year on the anniversary of the approval date and resubmitted to the USCG and any other required regulatory agencies. In the event of any of the following changes, the plan will be revised within 30 days and submitted as necessary:

- A change in the facility's configuration that materially alters the information included in the FRP
- A change in the type of oil handled, stored, or transferred that materially alters the required response resources
- A material change in capabilities of the OSRO(s) that provides equipment and personnel to respond to discharges of oil
- A material change in the facility's spill prevention and response equipment or emergency response procedures
- Any other changes that materially affect the implementation of the FRP
- Amendments to personnel and telephone number lists included in the FRP and a change in the OSRO(s) that does not result in a material change in support capabilities do not require approval by the EPA Regional Administrator as the revisions occur
- The owner or operator of a facility that submits changes to FRP shall provide the EPA-issued facility identification number (where one has been assigned) with the changes
- The owner or operator shall review relevant portions of the NCP and applicable ACPs annually and, if necessary, revise the FRP to ensure consistency with these plans

This FRP includes facility operations (and expansions) active as of July 2017. This FRP will be revised when changes in system design, construction, operation, or maintenance are made that affect the systems potential to discharge oil. Such amendments will be implemented no later than six months after such change occurs.

APPENDIX 1.0 - Facility Specific Information

154.1035(e)(1) This appendix must contain a description of the facility's principal characteristics.

Please see Tethys Supply and Marketing, LLC Operations Manual

1. See Mobile Transfer Unit/Pump print showing: transfer locations/valves, emergency shutdown locations, location of safety equipment
2. Tethys will supply marine distillate fuels to merchant shipping and private vessels for ocean transportation purposes
 - a. The vessel types include: bulk/liquid/container cargo, tanker, cruise, offshore support, tugs, and heavy-lift ships as well as private yachts
 - b. Each mobile facility is assigned to only one vessel simultaneously with a single hose connection between the pump and receiving vessels throughout the entirety of the bunkering process

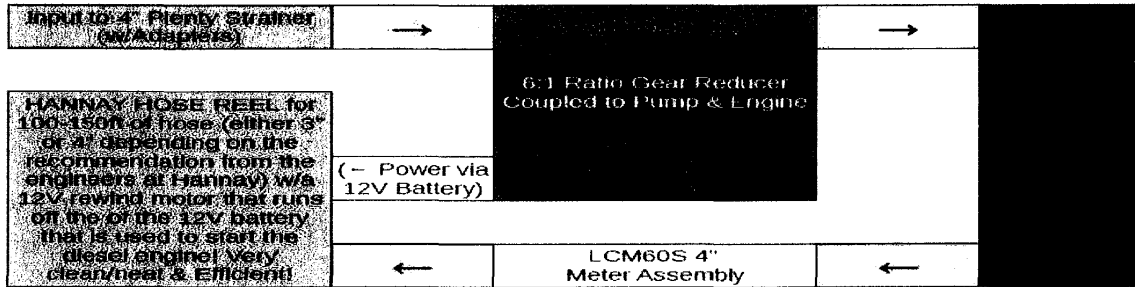

APPENDIX 1.1 - Physical Description of Facility

154.1035(e)(1)(i)

- The mobile transfer unit will be an independent, engine driven pump that is run off a diesel engine. It will be mounted to a trailer to be towed to each supply location. The transfer unit will be connected to the receiving vessel with one connection throughout the entirety of the supply operation. The distillate marine fuel will be transported by a Hazmat certified common carrier trucking company from the terminal to the delivery location. Each truck will connect over a short distance to the inlet of the pump, and over land only. This will lessen the risk of any residual product in the hose from being spilled into water.
- This manual is for mobile transfer facilities. Mooring areas, transfer locations and other related site-specific requirements vary with each transfer. However, when doing a mobile transfer with a vessel, before completing a pre-bunkering checklist, the Person in Charge will verify that the appropriate safety precautions are taken prior to commencement of any transfer operations.
- The purpose of this transfer unit is to supply distillate marine fuels to merchant marine vessels and private yachts. The design allows for a smaller footprint than traditional tanker trucks and tankwagons, allowing for location flexibility and lesser obstruction to other port traffic.
- Equipment Specification
 - 4" Blackmer XL4 – cast iron housed positive displacement pump
 - 6:1 Gear Reducer (~300RPM)
 - 42HP Deutz Diesel Engine
 - 4" Simplex Parker Strainer with Easy Off Top
 - 4" Liquid Controls M60S flow meter w/ Air Eliminator and Strainer
 - 3" Hannay Hose Reel for up to 150' of 3" ID Hose w/ 12V Electric Rewind
 - EPJ 9334-45-46-20 RT; 3" 90 Deg F x F Ductile OPW Joint, 3" FNPT Riser, Aluminum Internals, Bearing-mounted Strap Brake, 2" Rollform Channel Frame, Paint Graphite. 12VDC 001 Motor with Junction Box & Exp-proof Switch, with 12/60 Clutch & Reduction Unit
 - On unit, mechanical emergency shutoff
 - GE Druck UNIK 5000 Pressure Sensing Platform with automatic pump/engine shutoff before pressure reaches relief valve activation level
 - Pressure relief valve
 - Stainless Steel Piping and 4"-3" Hose Adapter

APPENDIX 1.2 - Equipment Pictures and Diagram

Flow Chart

SAFETY DATA SHEET	Diesel Low Sulfur (LSD) and Ultra Low Sulfur Diesel (ULSD)	Page 2 of 11
--------------------------	---	--------------

	<p>Toxic if inhaled. May cause drowsiness or dizziness by inhalation. Toxic to aquatic life with long lasting effects.</p>
Precautionary statements	
Prevention	<p>Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Keep away from heat, sparks, open flames, welding and hot surfaces. No smoking. Keep container tightly closed. Ground and/or bond container and receiving equipment. Use explosion-proof electrical equipment. Use only non-sparking tools if tools are used in flammable atmosphere. Take precautionary measures against static discharge. Wear gloves, eye protection and face protection as needed to prevent skin and eye contact with liquid. Wash hands or liquid-contacted skin thoroughly after handling. Do not eat, drink or smoke when using this product. Avoid breathing vapors or mists. Use only outdoors or in a well-ventilated area.</p>
Response	<p>In case of fire: Use dry chemical, CO₂, water spray or fire fighting foam to extinguish. If swallowed: Immediately call a poison center, doctor, hospital emergency room, medical clinic or 911. Do NOT induce vomiting. Rinse mouth. If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. If in eye: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If skin or eye irritation persists, get medical attention. If inhaled: Remove person to fresh air and keep comfortable for breathing. Immediately call or doctor or emergency medical provider. See Section 4 and Section 11 for medical treatment information.</p>
Storage	<p>Store in a well ventilated place. Keep cool. Store locked up. Keep container tightly closed. Use only approved containers.</p>
Disposal	<p>Dispose of contents/containers to approved disposal site in accordance with local, regional, national, and/or international regulations.</p>

SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

Component	CAS-No.	Weight %
Fuels, diesel, No 2; Gasoil - unspecified	68476-34-6	100%
Nonane	111-84-2	0 - 5%
Naphthalene	91-20-3	0 - 1%

SAFETY DATA SHEET	Diesel Low Sulfur (LSD) and Ultra Low Sulfur Diesel (ULSD)	Page 3 of 11
--------------------------	---	--------------

1,2,4-Trimethylbenzene	95-63-6	0 - 2%
Xylene	1330-20-7	0 - 2%
Sulfur	7704-34-9	15 ppm maximum

SECTION 4. FIRST AID MEASURES

Inhalation	: Move to fresh air. Give oxygen. If breathing is irregular or stopped, administer artificial respiration. Seek medical attention immediately.
Skin contact	: Take off all contaminated clothing immediately. Wash off immediately with soap and plenty of water. Wash contaminated clothing before re-use. If skin irritation persists, seek medical attention immediately.
Eye contact	: Remove contact lenses. Rinse thoroughly with plenty of water for at least 15 minutes. If symptoms persist, seek medical attention.
Ingestion	: Do not induce vomiting without medical advice. If a person vomits when lying on his back, place him in the recovery position. Seek medical attention immediately.
Notes to physician	: Symptoms: Dizziness, Discomfort, Headache, Nausea, Disorder, Vomiting, Lung edema, Liver disorders, Kidney disorders. Aspiration may cause pulmonary edema and pneumonitis.

SECTION 5. FIRE-FIGHTING MEASURES

Suitable extinguishing media	: SMALL FIRES: Any extinguisher suitable for Class B fires, dry chemical, CO ₂ , water spray or fire fighting foam. LARGE FIRES: Water spray, fog or fire fighting foam. Water may be ineffective for fighting the fire, but may be used to cool fire-exposed containers. Keep containers and surroundings cool with water spray.
Specific hazards during fire fighting	: Fire Hazard Do not use a solid water stream as it may scatter and spread fire. Cool closed containers exposed to fire with water spray.
Special protective equipment for fire-fighters	: Wear self-contained breathing apparatus and protective suit. Use personal protective equipment.
Further information	: Exposure to decomposition products may be a hazard to health. Isolate area around container involved in fire. Cool tanks, shells, and containers exposed to fire and excessive heat with water. For massive fires the use of unmanned hose holders or monitor nozzles may be advantageous to further minimize personnel exposure. Major fires may require withdrawal, allowing the tank to burn. Large storage tank fires typically require specially trained personnel and equipment to extinguish the fire, often including the need for properly applied fire fighting foam.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal precautions	: Evacuate nonessential personnel and remove or secure all ignition sources. Consider wind direction, stay upwind and uphill, if possible. Evaluate the direction of product travel, diking, sewers, etc. to contain spill areas. Spills may infiltrate subsurface soil and groundwater, professional assistance may be necessary to determine the extent of subsurface impact. Ensure adequate ventilation. Use personal protective equipment.
-----------------------------	---

SAFETY DATA SHEET	Diesel Low Sulfur (LSD) and Ultra Low Sulfur Diesel (ULSD)	Page 4 of 11
--------------------------	---	--------------

Environmental precautions	Carefully contain and stop the source of the spill, if safe to do so. Protect bodies of water by diking, absorbents, or absorbent boom, if possible. Do not flush down sewer or drainage systems, unless system is designed and permitted to handle such material. The use of fire fighting foam may be useful in certain situations to reduce vapors. The proper use of water spray may effectively disperse product vapors or the liquid itself, preventing contact with ignition sources or areas/equipment that require protection. Discharge into the environment must be avoided. If the product contaminates rivers and lakes or drains inform respective authorities.
Methods for cleaning up	Take up with sand or oil absorbing materials. Carefully shovel, scoop or sweep up into a waste container for reclamation or disposal - caution, flammable vapors may accumulate in closed containers. Response and clean-up crews must be properly trained and must utilize proper protective equipment (see Section 8)

SECTION 7. HANDLING AND STORAGE

Precautions for safe handling	<p>Keep away from fire, sparks and heated surfaces. No smoking near areas where material is stored or handled. The product should only be stored and handled in areas with intrinsically safe electrical classification.</p> <p>Hydrocarbon liquids including this product can act as a non-conductive flammable liquid (or static accumulators), and may form ignitable vapor-air mixtures in storage tanks or other containers. Precautions to prevent static-initiated fire or explosion during transfer, storage or handling, include but are not limited to these examples:</p> <ol style="list-style-type: none"> (1) Ground and bond containers during product transfers. Grounding and bonding may not be adequate protection to prevent ignition or explosion of hydrocarbon liquids and vapors that are static accumulators (2) Special slow load procedures for "switch loading" must be followed to avoid the static ignition hazard that can exist when higher flash point material (such as fuel oil or diesel) is loaded into tanks previously containing low flash point products (such as gasoline or naphtha). (3) Storage tank level floats must be effectively bonded. <p>For more information on precautions to prevent static-initiated fire or explosion, see NFPA 77, Recommended Practice on Static Electricity (2007), and API Recommended Practice 2003, Protection Against Ignitions Arising Out of Static, Lightning, and Stray Currents (2008)</p>
Conditions for safe storage, including incompatibilities	<p>Keep away from flame, sparks, excessive temperatures and open flame. Use approved containers. Keep containers closed and clearly labeled. Empty or partially full product containers or vessels may contain explosive vapors. Do not pressurize, cut, heat, weld or expose containers to sources of ignition. Store in a well-ventilated area. The storage area should comply with NFPA 30 "Flammable and Combustible Liquid Code". The cleaning of tanks previously containing this product should follow API Recommended Practice (RP) 2013 "Cleaning Mobile Tanks In Flammable and Combustible Liquid Service" and API RP 2015 "Cleaning Petroleum Storage Tanks".</p> <p>Emergency eye wash capability should be available in the near proximity to operations presenting a potential splash exposure.</p> <p>Keep away from food, drink and animal feed. Incompatible with oxidizing agents. Incompatible with acids</p>

SECTION 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

SAFETY DATA SHEET **Diesel Low Sulfur (LSD) and Ultra Low Sulfur Diesel (ULSD)** Page 5 of 11

Exposure Guidelines				
List	Components	CAS-No.	Type:	Value
OSHA Z1	Xylene	1330-20-7	PEL	100 ppm 435 mg/m ³
	Naphthalene	91-20-3	PEL	10 ppm 50 mg/m ³
ACGIH	Diesel Fuel	68476-30-2	TWA	100 mg/m ³
	Xylene	1330-20-7	TWA	100 ppm
		1330-20-7	STEL	150 ppm
	Naphthalene	91-20-3	TWA	10 ppm
		91-20-3	STEL	15 ppm
	Nonane	111-84-2	TWA	200 ppm
Engineering measures		Use adequate ventilation to keep gas and vapor concentrations of this product below occupational exposure and flammability limits, particularly in confined spaces. Use only intrinsically safe electrical equipment approved for use in classified areas.		
Eye protection		Safety glasses or goggles are recommended where there is a possibility of splashing or spraying.		
Hand protection		Gloves constructed of nitrile, neoprene, or PVC are recommended. Consult manufacturer specifications for further information.		
Skin and body protection		If needed to prevent skin contact, chemical protective clothing such as of DuPont TyChem®, Saranex or equivalent recommended based on degree of exposure. The resistance of specific material may vary from product to product as well as with degree of exposure.		
Respiratory protection		A NIOSH/MSHA-approved air-purifying respirator with organic vapor cartridges or canister may be permissible under certain circumstances where airborne concentrations are or may be expected to exceed exposure limits or for odor or irritation. Protection provided by air-purifying respirators is limited. Refer to OSHA 29 CFR 1910.134, ANSI Z88 2-1992, NIOSH Respirator Decision Logic, and the manufacturer for additional guidance on respiratory protection selection. Use a NIOSH/MSHA-approved positive-pressure supplied-air respirator if there is a potential for uncontrolled release, exposure levels are not known, in oxygen-deficient atmospheres, or any other circumstance where an air-purifying respirator may not provide adequate protection.		
Work / Hygiene practices		Emergency eye wash capability should be available in the near proximity to operations presenting a potential splash exposure. Use good personal hygiene practices. Avoid repeated and/or prolonged skin exposure. Wash hands before eating, drinking, smoking, or using toilet facilities. Do not use as a cleaning solvent on the skin. Do not use solvents or harsh abrasive skin cleaners for washing this product from exposed skin areas. Waterless hand cleaners are effective. Promptly remove contaminated clothing and launder before reuse. Use care when laundering to prevent the formation of flammable vapors which could ignite via washer or dryer. Consider the need to discard contaminated leather shoes and gloves.		

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

SAFETY DATA SHEET	Diesel Low Sulfur (LSD) and Ultra Low Sulfur Diesel (ULSD)	Page 6 of 11
--------------------------	---	--------------

Appearance	Clear to straw colored liquid								
Odor	Characteristic petroleum or kerosene-like odor								
Odor threshold	0.1 - 1 ppm typically reported								
pH	Not applicable								
Melting point/freezing point	Gel point can be about -15°F, freezing requires laboratory conditions								
Initial boiling point & range	154 - 372 °C (310° - 702 °F)								
Flash point	38 °C Minimum for #1 Diesel, 52°C Minimum for #2 Diesel								
Evaporation rate	Higher initially and declining as lighter components evaporate								
Flammability (solid, gas)	Flammable vapor released by liquid								
Upper explosive limit	6.5 %(V)								
Lower explosive limit	0.6 %(V)								
Vapor pressure	< 2 mm Hg at 20 °C								
Vapor density (air = 1)	> 4.5								
Relative density (water = 1)	0.86 g/mL								
Solubility (in water)	0.0005 g/100 mL								
Partition coefficient (n-octanol/water)	> 3.3 as log Pow								
Auto-ignition temperature	257 °C (495 °F)								
Decomposition temperature	Will evaporate or boil and possibly ignite before decomposition occurs.								
Kinematic viscosity	1 to 6 mm ² /s range reported for No 1 or No 2 diesel at ambient temperatures								
Conductivity (conductivity can be reduced by environmental factors such as a decrease in temperature)	<table style="width: 100%; border: none;"> <tr> <td style="width: 70%;">Diesel Fuel Oils at terminal load rack</td> <td>At least 25 pS/m</td> </tr> <tr> <td>Ultra Low Sulfur Diesel (ULSD) without conductivity additive</td> <td>0 pS/m to 5 pS/m</td> </tr> <tr> <td>ULSD at terminal load rack with conductivity additive</td> <td>At least 50 pS/m</td> </tr> <tr> <td>JP-8 at terminal load rack:</td> <td>150 pS/m to 600 pS/m</td> </tr> </table>	Diesel Fuel Oils at terminal load rack	At least 25 pS/m	Ultra Low Sulfur Diesel (ULSD) without conductivity additive	0 pS/m to 5 pS/m	ULSD at terminal load rack with conductivity additive	At least 50 pS/m	JP-8 at terminal load rack:	150 pS/m to 600 pS/m
Diesel Fuel Oils at terminal load rack	At least 25 pS/m								
Ultra Low Sulfur Diesel (ULSD) without conductivity additive	0 pS/m to 5 pS/m								
ULSD at terminal load rack with conductivity additive	At least 50 pS/m								
JP-8 at terminal load rack:	150 pS/m to 600 pS/m								

SECTION 10. STABILITY AND REACTIVITY

Reactivity	Vapors may form explosive mixture with air. Hazardous polymerization does not occur.
Chemical stability	Stable under normal conditions
Possibility of hazardous reactions	Can react with strong oxidizing agents, peroxides, acids and alkalis. Do not use with Viton or Fluorel gaskets or seals.
Conditions to avoid	Avoid high temperatures, open flames, sparks, welding, smoking and other ignition sources. Avoid static charge accumulation and discharge (see Section 7)
Hazardous decomposition products	Ignition and burning can release carbon monoxide, carbon dioxide, non-combusted hydrocarbons (smoke) and, depending on formulation, trace amounts

SAFETY DATA SHEET	Diesel Low Sulfur (LSD) and Ultra Low Sulfur Diesel (ULSD) Page 7 of 11
--------------------------	---

of sulfur dioxide. Diesel exhaust particals may be a lung hazard (see Section 11)

SECTION 11. TOXICOLOGICAL INFORMATION

Inhalation : Vapors or mists from this material can irritate the nose, throat, and lungs, and can cause signs and symptoms of central nervous system depression, depending on the concentration and duration of exposure

Skin contact : Skin irritation leading to dermatitis may occur upon prolonged or repeated contact. Liquid may be absorbed through the skin in toxic amounts if large areas of skin are repeatedly exposed. Long-term, repeated skin contact may cause skin cancer.

Eye contact : Eye irritation may result from contact with liquid, mists, and/or vapors.

Ingestion : Harmful or fatal if swallowed. Do NOT induce vomiting. This material can irritate the mouth, throat, stomach, and cause nausea, vomiting, diarrhea and restlessness. Aspiration hazard if liquid is inhaled into lungs, particularly from vomiting after ingestion. Aspiration may result in chemical pneumonia, severe lung damage, respiratory failure and even death.

Target organs : Central nervous system, Eyes, Skin, Kidney, Liver

Further information : Studies have shown that similar products produce skin cancer or skin tumors in laboratory animals following repeated applications without washing or removal. The significance of this finding to human exposure has not been determined. Other studies with active skin carcinogens have shown that washing the animal's skin with soap and water between applications reduced tumor formation. Repeated over-exposure may cause liver and kidney injury. IARC classifies whole diesel fuel exhaust particulates as carcinogenic to humans (Group 1). NIOSH regards whole diesel fuel exhaust particulates as a potential cause of occupational lung cancer based on animal studies and limited evidence in humans.

SECTION 15. REGULATORY INFORMATION

CERCLA SECTION 103 and SARA SECTION 304 (RELEASE TO THE ENVIRONMENT)
 The CERCLA definition of hazardous substances contains a "petroleum exclusion" clause which exempts crude oil. Fractions of crude oil, and products (both finished and intermediate) from the crude oil refining process and any indigenous components of such from the CERCLA Section 103 reporting requirements. However, other federal reporting requirements, including SARA Section 304, as well as the Clean Water Act may still apply.

Equipment List:

<https://www.msrc.org/services/oil-spill-response/equipment/major-equipment-list>

APPENDIX 4.0 - Communications Plan

The primary method of communication during discharges, including communications at the facility and at remote locations within the areas covered by the response plan will be by an intrinsically safe 2-way radio, telephone and/or mobile telephone-digital communications. Alternative methods of communication will be by fax, digital or by communications systems provided by the oil spill removal organization.

A clear line of sight must be maintained with the receiving vessel at all times in order to communicate with the vessel PIC via hand signals in the instance that oral communication methods are unavailable due to outside noise.

APPENDIX 5.0 - Site-specific Safety and Health Plan

As a small business with less than 10 employees at the facility, Tethys communicates the Emergency Action Plan verbally to all applicable employees.

Fire Prevention Plan – please see ‘Tethys Fire Prevention Plan’ – available on site at the mobile pumping facility, at the headquarters office in Chicago, and in digital format on shared company Dropbox folder

Safety and Health Plan – please refer to ‘Tethys Site Safety and Health Plan’ – available on site at the mobile pumping facility, at the headquarters office in Chicago, and in digital format on shared company Dropbox folder

Hazard Communication Plan - please refer to ‘Tethys Hazard Communication Plan – available on site at the mobile pumping facility, at the headquarters office in Chicago, and in digital format on shared company Dropbox folder

Substance Abuse Policy - please refer to ‘Tethys Substance Abuse Policy’ – available on site at the mobile pumping facility, at the headquarters office in Chicago, and in digital format on shared company Dropbox folder

APPENDIX 6.0 - Geographic Information:

APPENDIX 6.1 - Port Everglades

1.1 Port Everglades

1.1.1 Port Everglades Harbor, a major seaport located on the southeast coast of Florida in Broward County. The entrance of the Port is approximately 17 nautical miles north of Miami Harbor, 31 nautical miles south of the Port of Palm Beach, and 196 nautical miles south of Jacksonville Harbor, all located in Florida.

Outer Entrance Channel (OEC) - The outermost approach channel extends approximately 5,000 feet from the outer sea buoy to the seaward end of the harbor jetties with a 500-foot width over a project depth of 45 feet.

Inner Entrance Channel (IEC) - A rectangular approach channel inside Port Everglades harbor at 450 feet in width, with a project depth of 42 feet extending approximately 2,340 feet from the landward end of the OEC to the main turning basin.

Main Turning Basin (MTB) - A 95-acre turning basin area adjacent to the entrance channels, with a project depth of 42 feet, an east to west dimension of about 1,200 feet, and a north to south dimension of about 2,450 feet. Dimensions vary along the perimeter of the MTB with 2,600 feet along the west side, 800 feet along the north side, and 1,100 feet along the south side.

North Turning Basin (NTB or Northport) - The NTB covers about 19 acres immediately to the north of the MTB and has a project depth of 31 feet. The turning basin extends about 1200 feet to the north with a depth of 31 feet and east-west dimension tapering from 800 to 500 feet.

South Turning Basin (STB or Midport) - A 20-acre turning basin area located south of the main turning basin containing berths 16 through 22 with varying project depths of 31- 37 feet. The turning basin to the south has a depth of 31 feet and measuring about 1,000 feet north-south and 1100 feet east-west with a channel inside along the westerly edge varying in depth from 37 to 36 feet and narrowing in width from 300 feet to 150 feet over a distance of about 1,000 feet.

Southport Access Channel (SAC) - North South channel extending 8,500 ft south from the MTB area with a 400-foot width over a project depth of 42 feet. The SAC has a 150 degree bend at the north end known as "the knuckle".

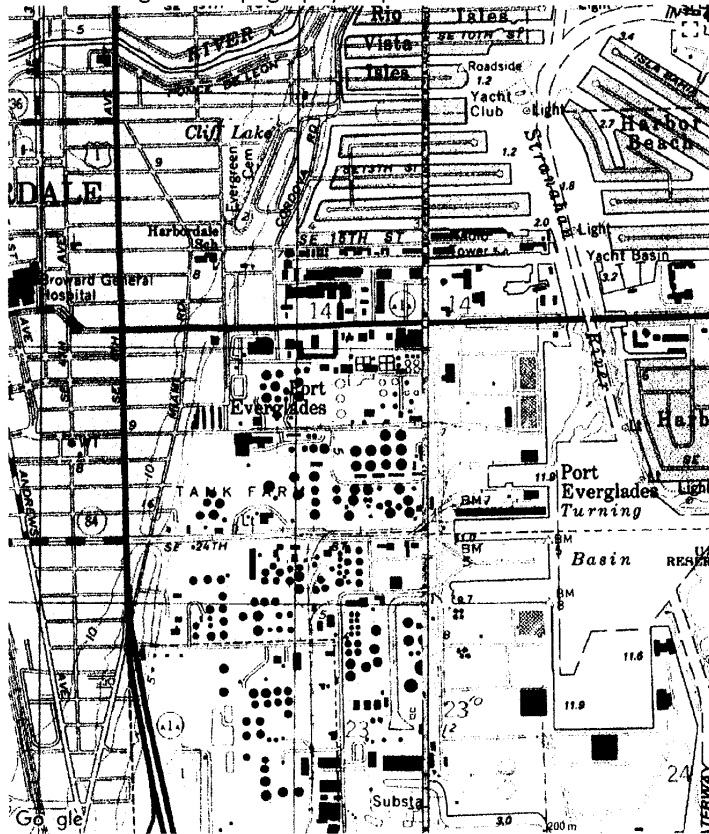

Turning Notch (TN) - The TN has a width of about 750 feet and length of 1000 feet over a project depth of 42 feet. The container terminal facilities located south of the TN are known as Southport.

1.1.2 - Berth Information

Berth Information

Berth #	Length	Port	Uses
1B	220 ft./67 m.	Northport	layin
4	900 ft./274.4 m.	Northport	cargo/RORO/cruise
5	900 ft./274.4 m.	Northport	cargo/RORO/tanker

APPENDIX 6.2 - Miami

1.2 Miami

1.2.1 PortMiami is a seaport located in Biscayne Bay in Miami, Florida, United States. It is connected to Downtown Miami by Port Boulevard – a causeway over the Intracoastal Waterway—and to the neighboring Watson Island via the Port of Miami Tunnel

1.2.2 Berth Information

Terminal	Existing Channel Depth (in feet)	Existing Berth Length (in linear feet)
Berths 00-59	36	7,126
Berths 60-62	35	299
Berths 63-68	35	699
Berths 69-71	35	285
Berths 72-98	35	3,345
Berths 99-140	42	4,951
Berths 141-149	42	1,150
Berths 150-182	28	3,919
Berths 183-188	30	651
Berths 189-194	30	850
Berths 195-208	30	1,443
Berths 209-212	N/A	310
Berths 214-219	28	739

1.2.3 Miami Topographic Maps

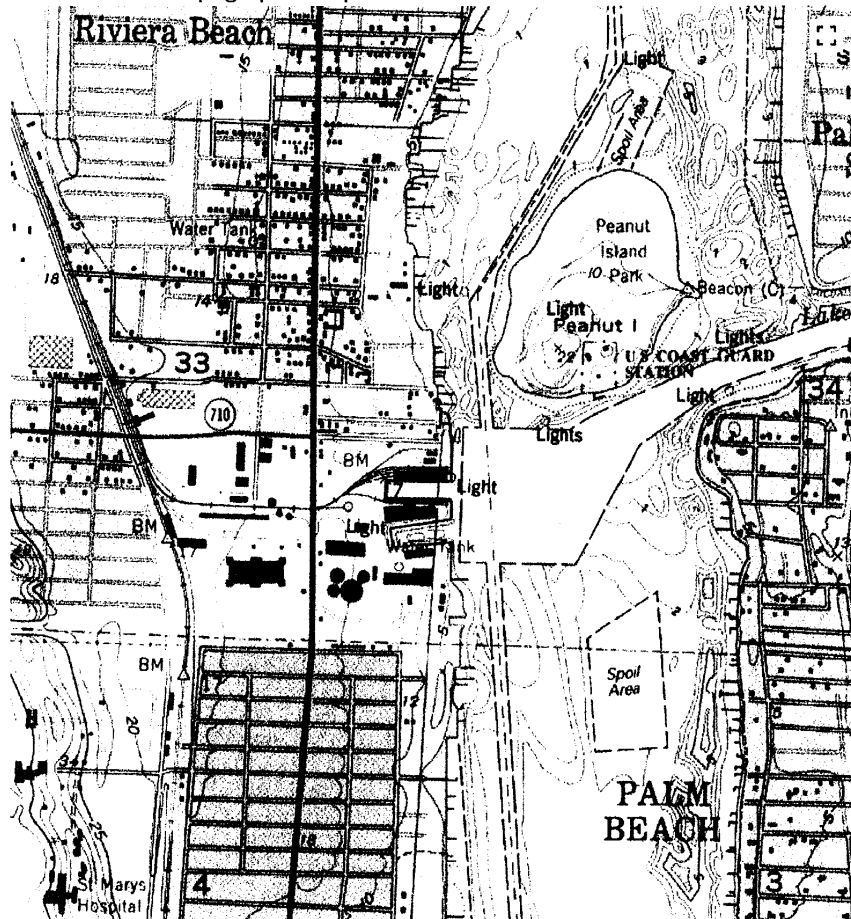

APPENDIX 6.3 - Palm Beach

1.3 Port of Palm Beach

1.3.1 The Port of Palm Beach is located in Riviera Beach, Florida, in Palm Beach County. It is 80 miles north of Miami and 135 miles south of Port Canaveral. The 300-foot wide ship channel and 1,100 by 1,400-foot (turning basin) are in Lake Worth, and connect to the Atlantic Ocean through the Lake Worth Inlet. The nominal depth at mean low water of the channel and turning basin is 32 feet (9.8 m). The Port has three slips, four marginal wharves, and two roll-on/roll-off ramps, and a cruise terminal. It's coordinates are 26.7670° N, 80.0512° W.

1.3.2 Palm Beach Topographic Map

APPENDIX 7.0 - List of Acronyms and Definitions

ACP: Area Contingency Plan
AMPD: Average Most Probable Discharge
ASTM: American Society of Testing Materials
BBL: Barrels
BDN: Bunker Delivery Note (same as BDR)
BDR: Bunker Delivery Receipt
BOL: Bill of Laden
BPD: Barrels per Day
BPH: Barrels per Hour

RE: Renewal of Certificate for Discharge Cleanup Organization

Dear Ms. Roos:

You are currently listed as an Approved Discharge Cleanup Organization (DCO) for the State of Florida. We are extending the expiration date of your DCO Certificate to **June 30, 2019**. Please notify this office of any significant changes in your capabilities as a DCO, as well as, changes in addresses, phone numbers, or contacts.

Retain a copy of this letter with your most current DCO certificate as evidence of your certification status. If you have any questions, or wish to provide updates, please contact Mr. Shane Gibbs at (850) 245-2872 or via email at Shane.Gibbs@dep.state.fl.us. You may also contact your District Emergency Response Manager to address any questions or issues regarding this program.

Sincerely,

A handwritten signature in black ink, appearing to read "John Johnson", is enclosed in a white rectangular box.

Marine Spill Response Corporation READINESS UPDATES

December 21, 2020

RE: ATLANTIC REGION 2020 NPREP Equipment Deployment Exercises Documentation for Year 2021

Dear MSRC Customers,

The National Preparedness for Response Exercise Program (NPREP) Guidelines require a plan holder to ensure the "Equipment Deployment Exercise" requirements are met on an annual basis. The NPREP Guidelines identify the minimum amount of equipment that must be deployed in "Equipment Deployment Exercises".

This letter provides documentation to you that the Atlantic Region of MSRC has completed the NPREP "Equipment Deployment Exercises" requirements for the year 2020. For purpose of "Equipment Deployment Exercises", under NPREP, each MSRC Region is considered a separate "Oil Spill Removal Organization" (OSRO). The Atlantic Region has deployed, at a minimum, the NPREP required amounts of each type of boom, and one of each type of skimming system in the applicable regional inventory. This equipment has been deployed, if required, in each of the three types of operating environments listed in NPREP if applicable (rivers and canals, inland, ocean). The Atlantic Region has met these equipment deployment requirements.

Documentation of the specific information relating to "Equipment Deployment Exercises" is maintained at the Edison, NJ RRC. Please feel free to contact me for any additional information.

John Swift

A handwritten signature in blue ink that reads "John Swift". The signature is fluid and cursive, with a large initial "J" and "S".

PROTEUS BUNKER FUEL SUPPLY

Proteus Supply and Trading, LLC
10 Oct 2020

I. OBJECTIVE

The purpose of this Fire Prevention Plan is to eliminate the causes of fire, prevent loss of life and property by fire, and to comply with the Occupational Safety and Health Administration's (OSHA) standard on fire prevention, 29 CFR 1910.39. It provides employees with information and guidelines that will assist them in recognizing, reporting, and controlling fire hazards.

II. BACKGROUND

Proteus Supply and Trading, LLC is committed to minimizing the threat of fire to employees, visitors, and property. **Proteus** complies with all applicable laws, regulations, codes, and good practices pertaining to fire prevention. **Proteus** separate Emergency Action Plan spells out the procedures for responding to fires. This Fire Prevention Plan serves to reduce the risk of fires at **Proteus** in the following ways:

- A. identifies materials that are potential fire hazards and their proper handling and storage procedures;
- B. distinguishes potential ignition sources and the proper control procedures of those materials;
- C. describes fire protection equipment and/or systems used to control fire hazards;
- D. identifies persons responsible for maintaining the equipment and systems installed to prevent or control ignition of fires;
- E. identifies persons responsible for the control and accumulation of flammable or combustible material;
- F. describes good housekeeping procedures necessary to insure the control of accumulated flammable and combustible waste material and residues to avoid a fire emergency; and
- G. provides training to employees with regard to fire hazards to which they may be exposed.

III. ASSIGNMENT OF RESPONSIBILITY

Fire safety is everyone's responsibility. All employees should know how to prevent and respond to fires, and are responsible for adhering to company policy regarding fire emergencies.

PROTEUS BUNKER FUEL SUPPLY

A. Management

Management determines the **Proteus** fire prevention and protection policies. Management will provide adequate controls to provide a safe workplace, and will provide adequate resources and training to its employees to encourage fire prevention and the safest possible response in the event of a fire emergency.

B. Plan Administrator

The MD of Operations shall manage the Fire Prevention Plan for **Proteus** and shall maintain all records pertaining to the plan. The Plan Administrator shall also:

Develop and administer the **Proteus** Fire prevention training program.

1. Ensure that fire control equipment and systems are properly maintained.
2. Control fuel source hazards.
3. Conduct fire risk surveys (see Appendix A) and make recommendations.

C. Supervisors

Supervisors are responsible for ensuring that employees receive appropriate fire safety training, and for notifying **MD of Operations** when changes in operation increase the risk of fire. Supervisors are also responsible for enforcing **Proteus** fire prevention and protection policies.

D. Employees

All employees shall:

1. Complete all required training before working without supervision.
2. Conduct operations safely to limit the risk of fire.
3. Report potential fire hazards to their supervisors.
4. Follow fire emergency procedures.

IV. PLAN IMPLEMENTATION

A. Good Housekeeping

To limit the risk of fires, employees shall take the following precautions:

1. Minimize the storage of combustible materials.
2. Dispose of combustible waste in covered, airtight, metal containers.
3. Use and store flammable materials in well-ventilated areas away from ignition sources.

PROTEUS BUNKER FUEL SUPPLY

4. Use only nonflammable cleaning products.
5. Keep incompatible (i.e., chemically reactive) substances away from each other.
6. Keep equipment in good working order (i.e., inspect electrical wiring and appliances regularly and keep motors and machine tools free of dust and grease.
7. Report all gas leaks immediately. **The Operations Manager** shall ensure that all gas leaks are repaired immediately upon notification.
8. Repair and clean up flammable liquid leaks immediately.
9. Keep work areas free of dust, lint, sawdust, scraps, and similar material.
10. Do not rely on extension cords if wiring improvements are needed, and take care not to overload circuits with multiple pieces of equipment.
11. Ensure that required hot work permits are obtained.
12. Turn off electrical equipment when not in use.

B. Maintenance

The Operations Manager will ensure that equipment is maintained according to manufacturers' specifications. **Proteus** will also comply with requirements of the National Fire Protection Association (NFPA) codes for specific equipment. Only properly trained individuals shall perform maintenance work.

The following equipment is subject to the maintenance, inspection, and testing procedures:

1. Equipment installed to detect fuel leaks, control heating, and control pressurized systems;
2. Portable fire extinguishers, automatic sprinkler systems, and fixed extinguishing systems;
3. Detection systems for smoke, heat, or flame;
4. Fire alarm systems; and
5. Emergency backup systems and the equipment they support.

V. TYPES OF HAZARDS

The following sections address the major workplace fire hazards at **Proteus'** facilities and the procedures for controlling the hazards.

A. Electrical Fire Hazards

Electrical system failures and the misuse of electrical equipment are leading causes of workplace fires. Fires can result from loose ground connections, wiring with frayed insulation, or overloaded fuses, circuits, motors, or outlets.

PROTEUS BUNKER FUEL SUPPLY

To prevent electrical fires, employees shall:

1. Make sure that worn wires are replaced.
2. Use only appropriately rated fuses.
3. Never use extension cords as substitutes for wiring improvements.
4. Use only approved extension cords [i.e., those with the Underwriters Laboratory (UL) or Factory Mutual (FM) label].
5. Check wiring in hazardous locations where the risk of fire is especially high.
6. Check electrical equipment to ensure that it is either properly grounded or double insulated.
7. Ensure adequate spacing while performing maintenance.

B. Flammable and Combustible Materials

The Operations Manager shall regularly evaluate the presence of combustible materials at **Proteus**.

Certain types of substances can ignite at relatively low temperatures or pose a risk of catastrophic explosion if ignited. Such substances obviously require special care and handling.

1. Class A combustibles.

These include common combustible materials (wood, paper, cloth, rubber, and plastics) that can act as fuel and are found in non-specialized areas such as offices.

To handle Class A combustibles safely:

- A. Dispose of waste daily.
- B. Keep trash in metal-lined receptacles with tight-fitting covers (metal wastebaskets that are emptied every day do not need to be covered).
- C. Keep work areas clean and free of fuel paths that could allow a fire to spread.
- D. Keep combustibles away from accidental ignition sources, such as hot plates, soldering irons, or other heat- or spark-producing devices.
- E. Store paper stock in metal cabinets.
- F. Store rags in metal bins with self-closing lids.
- G. Do not order excessive amounts of combustibles.
- H. Make frequent inspections to anticipate fires before they start.

PROTEUS BUNKER FUEL SUPPLY

Water, multi-purpose dry chemical (ABC), and halon 1211 are approved fire extinguishing agents for Class A combustibles.

2. Class B combustibles.

These include flammable and combustible liquids (oils, greases, tars, oil-based paints, and lacquers), flammable gases, and flammable aerosols.

To handle Class B combustibles safely:

- A. Use only approved pumps, taking suction from the top, to dispense liquids from tanks, drums, barrels, or similar containers (or use approved self-closing valves or faucets).
- B. Do not dispense Class B flammable liquids into containers unless the nozzle and container are electrically interconnected by contact or by a bonding wire. Either the tank or container must be grounded.
- C. Store, handle, and use Class B combustibles only in approved locations where vapors are prevented from reaching ignition sources such as heating or electric equipment, open flames, or mechanical or electric sparks.
- D. Do not use a flammable liquid as a cleaning agent inside a building (the only exception is in a closed machine approved for cleaning with flammable liquids).
- E. Do not use, handle, or store Class B combustibles near exits, stairs, or any other areas normally used as exits.
- F. Do not weld, cut, grind, or use unsafe electrical appliances or equipment near Class B combustibles.
- G. Do not generate heat, allow an open flame, or smoke near Class B combustibles.
- H. Know the location of and how to use the nearest portable fire extinguisher rated for Class B fire.

Water should not be used to extinguish Class B fires caused by flammable liquids. Water can cause the burning liquid to spread, making the fire worse. To extinguish a fire caused by flammable liquids, exclude the air around the burning liquid. The following fire-extinguishing agents are approved for Class B combustibles: carbon dioxide, multi-purpose dry chemical (ABC), halon 1301, and halon 1211. (**NOTE:** Halon has been determined to be an ozone-depleting substance and is no longer being manufactured. Existing systems using halon can be kept in place.)

PROTEUS BUNKER FUEL SUPPLY

F. Smoking

Smoking is prohibited in all **Proteus** facilities. Certain outdoor areas may also be designated as no smoking areas. The areas in which smoking is prohibited outdoors are identified by NO SMOKING signs.

Smoking is also prohibited during fuel transfer operations even when the transfer is not currently underway. All Proteus vehicles are smoke-free at all times.

VI. TRAINING

The MD of Operations shall present basic fire prevention training to all employees upon employment, and shall maintain documentation of the training, which includes:

- A. Review of 29 CFR 1910.38, including how it can be accessed;
- B. This Fire Prevention Plan, including how it can be accessed;
- C. Good housekeeping practices;
- D. Proper response and notification in the event of a fire;
- E. Instruction on the use of portable fire extinguishers (as determined by company policy in the Emergency Action Plan); and
- F. Recognition of potential fire hazards.

Supervisors shall train employees about the fire hazards associated with the specific materials and processes to which they are exposed, and will maintain documentation of the training. Employees will receive this training:

- A. At their initial assignment;
- B. Annually; and
- C. When changes in work processes necessitate additional training.

VII. PROGRAM REVIEW

The MD of Operations shall review this Fire Prevention Plan at least annually for necessary changes.

PROTEUS BUNKER FUEL SUPPLY

Appendix B

Proteus Supply and Trading, LLC General Fire Prevention Checklist

- Yes No Is the local fire department acquainted with your facility, its location, and specific hazards?
- Yes No If you have a fire alarm system, is it tested at least annually?
- Yes No If you have interior stand pipes and valves, are they inspected regularly?
- Yes No If you have outside private fire hydrants, are they on a routine preventive maintenance schedule and flushed at least once a year?
- Yes No Are fire doors and shutters in good operating condition?
- Yes No Are fire doors and shutters unobstructed and protected against obstructions, including their counterweights?
- Yes No Are automatic sprinkler system water control valves, air pressure, and water pressure checked weekly or periodically?
- Yes No Has responsibility for the maintenance of automatic sprinkler systems been assigned to an employee or contractor?
- Yes No Are sprinkler heads protected by metal guards?
- Yes No Is proper clearance maintained below sprinkler heads?
- Yes No Are portable fire extinguishers provided in adequate number and type?
- Yes No Are fire extinguishers mounted in readily accessible locations?
- Yes No Are fire extinguishers recharged regularly with the recharge date noted on an inspection tag?
- Yes No Are employees periodically instructed in the use of extinguishers and fire protection procedures?

PROTEUS BUNKER FUEL SUPPLY

Appendix C

Proteus Supply and Trading, LLC Flammable and Combustible Material Checklist

Use this checklist to evaluate **Proteus'** compliance with OSHA's standards on flammable and combustible materials:

- Yes No Are combustible scrap, debris, and waste materials such as oily rags stored in covered metal receptacles and removed from the worksite promptly?
- Yes No Are approved containers and tanks used for the storage and handling of flammable and combustible liquids?
- Yes No Are all connections on drums and combustible liquid piping vapor and liquid tight?
- Yes No Are all flammable liquids kept in closed containers when not in use?
- Yes No Are metal drums of flammable liquids electrically grounded during dispensing?
- Yes No Do storage rooms for flammable and combustible liquids have appropriate ventilation systems?
- Yes No Are NO SMOKING signs posted on liquefied petroleum gas tanks?
- Yes No Are all solvent wastes and flammable liquids kept in fire-resistant covered containers until they are removed from the worksite?
- Yes No Is vacuuming used whenever possible rather than blowing or sweeping combustible dust?
- Yes No Are fuel gas cylinders and oxygen cylinders separated by distances or fire-resistant barriers while in storage?
- Yes No Are fire extinguishers appropriate for the materials in the areas where they are mounted?
- Yes No Are appropriate fire extinguishers mounted within 75 feet of outside areas containing flammable liquids and within 10 feet of any inside storage area for such materials?

PROTEUS BUNKER FUEL SUPPLY

- Yes No Are extinguishers free from obstruction or blockage?
- Yes No Are all extinguishers serviced, maintained, and tagged at least once a year?
- Yes No Are all extinguishers fully charged and in their designated places?
- Yes No Where sprinkler systems are permanently installed, are the nozzle heads directed or arranged so that water will not be sprayed into operating electrical switchboards and equipment?
- Yes No Are NO SMOKING signs posted in areas where flammable or combustible materials are used or stored?
- Yes No Are safety cans utilized for dispensing flammable or combustible liquids at the point of use?
- Yes No Are all spills of flammable or combustible liquids cleaned up promptly?
- Yes No Are storage tanks adequately vented to prevent the development of an excessive vacuum or pressure that could result from filling, emptying, or temperature changes?

MEMORANDUM

DATE: November 13, 2017
TO: Judith Roos, VP, Marketing, Cust. Services & Corp. Relations
RE: NPREP Equipment Deployment Exercise Completed Requirements

Dear Ms. Roos,

The National Preparedness for Response Exercise Program (NPREP) Guidelines require a plan holder to ensure the “Equipment Deployment Exercise” requirements are met on an annual basis. The NPREP Guidelines identify the minimum amount of equipment that must be deployed in “Equipment Deployment Exercises”.

This letter provides documentation to you that the Atlantic Region of MSRC has completed the NPREP “Equipment Deployment Exercises” requirements for the year 2017. For purpose of “Equipment Deployment Exercises”, under NPREP, each MSRC Region is considered a separate “Oil Spill Removal Organization” (OSRO). The Atlantic Region has deployed, at a minimum, the NPREP required amounts of each type of boom, and one of each type of skimming system in the applicable regional inventory. This equipment has been deployed, if required, in each of the three types of operating environments listed in NPREP if applicable (rivers and canals, inland, ocean). The Atlantic Region has met these equipment deployment requirements.

Documentation of the specific information relating to “Equipment Deployment Exercises” is maintained at the Edison, NJ RRC. Please feel free to contact me for any additional information.

Sincerely,

A handwritten signature in blue ink, appearing to read "John Swift", is written over a light blue horizontal line.

John Swift
Vice President, Atlantic Region and Marine Operations
