1. Introduction

The Final Open Space Management Plan for Hortt Park, Open Space Site OS-18, was developed to ensure the site will be developed in furtherance of the purposes of the Broward County Safe Parks and Land Preservation Bond Program, and in accordance with the approved Interlocal Agreement executed for the project by Broward County and the City of Fort Lauderdale.

Hortt Park (OS-18) is a 5.9-acre site located in a residential neighborhood, immediately north of the existing Hortt Park. (Appendix A – Project Site Location). The park is located in the southwest area of the City, south of Davie Boulevard, on the south side of SW 14^{th} Court, just east of SW 18^{th} Avenue.

The property was formerly an elementary school and is currently being used by the school board as administrative offices. The site contains existing buildings, portable buildings, parking areas and recreation areas. The City has entered in a lease agreement with the school board that allows the school board use of the site until April 2011 at which time the school board will vacate the property. The City will remove the structures and impervious surfaces. One building may remain on site to serve as a neighborhood community building. When developed, the entire site will be used for passive recreation.

Broward County, as part of the 2000 Land Preservation Bond Program, provided funding for the acquisition of the site. Proper signage recognizing the efforts of the Broward County Board of County Commissioners and funding through the Safe Parks and Land Preservation Bond will be installed.

Section 4.03a of the Broward County Resolution 2000-1230 states that property listed in the Open Space Inventory shall include "undeveloped or agricultural land which can function, if appropriately developed and managed, to optimize water recharge quality and quantity, air quality and environmental benefits of the site while providing public use." This management plan ensures the goals and objectives of the Resolution are satisfied, expanding passive recreational opportunities for the residents of Broward County.

2. Purpose of the Project

The main purpose of this project is to manage the site as a protected land, managed only for the conservation, protection, and enhancement of natural resources, and for passive outdoor recreation. The property will be developed by the City of Fort Lauderdale as a neighborhood park, incorporating the values of the Land Preservation Program in the planning, implementation, maintenance, and operation of the site.

2.1 Key Management Objectives

The following list of key management objectives have been established for the project:

- 1. To restore native habitats through invasive plant removal and replanting with native species.
- 2. To prevent development through land preservation.
- 3. To enhance existing local greenways by providing wildlife corridors.
- 4. To provide passive outdoor recreational opportunities to the public.

The Hortt Park project supports the following City of Fort Lauderdale Comprehensive Plan goals, objectives, and policies:

GOAL 1: Provide levels of service for Parks and Recreation facilities sufficient to meet the existing and future needs of the City of Fort Lauderdale's population.

OBJECTIVE 1.1: The City will provide park land and open space to meet a Level of Service Standard of 3 acres per one thousand residents. This 3-acre standard shall be comprised of a mix of park classifications with Local Facility Guidelines established in the policies for each Park Planning District.

POLICY 1.1.2: All city owned/designated park sites are to be zoned P for Parks, Recreation and Open Space and have a land use designation of Park-Open Space.

POLICY 1.1.3: The City shall continue to provide 2.0 acres of neighborhood park land for each one thousand residents in each park planning district.

POLICY 1.1.4: The City shall continue to provide 1.0 acre of community park land for each one thousand residents in each park planning district.

POLICY 1.1.5: Large Urban Parks and Special Use Facilities/Parks will continue to be provided by the City of Fort Lauderdale to meet public needs.

POLICY 1.1.6: No park land shall be diverted to other uses except in instances of overriding public interest, in which case it will be effectively replaced within the affected park planning district.

POLICY 1.1.7: The City shall provide at least 20% land area in order to accommodate the open space needs of its residential development. Such open space shall include greenways, blueways and other natural areas.

POLICY 1.1.8: In order to ensure that the allocation of park lands are equitably distributed, the City of Fort Lauderdale shall give high priority in developing its park system based on a service radius calculation.

Mini-Parks = 1/4 mile Neighborhood Parks = 1/2 mile Community Parks = 1 mile Large Urban Park, and Special Use Facilities/Parks = 30 minute drive time POLICY 1.1.9: The City of Fort Lauderdale shall continue to comply with Broward County's Park Level of Service standard of 3 acres per 1000 population.

POLICY 1.1.10: The City of Fort Lauderdale shall develop Park Planning Districts to ensure the equitable geographic distribution of park land and open space, and funding for parks.

POLICY 1.1.11: The City of Fort Lauderdale remains committed to improving the quality of life of all of its citizens.

POLICY 1.2.1: To maintain the levels of service standards identified within the Recreation and Open Space Element of the City of Fort Lauderdale's Comprehensive Plan, the City shall determine whether adequate Parks and Recreation Facilities will be available when needed to serve proposed development.

GOAL 2: Establish and preserve an appropriate open space system to protect public health, safety, and welfare, and assure retention of aesthetic and environmental amenities.

OBJECTIVE 2.1: The City shall improve its visual attractiveness as possible, both through positive measures of orderly development and beautification as well as consistent efforts to avoid, remove, or diminish the impact of unsightly features.

POLICY 2.1.1: The City's Land Development Regulations shall require adequate landscaping of public projects, as well as private development. The City's adopted Land Development Regulations will be implemented consistent with Section 163.3202 (1), F.S.

POLICY 2.1.2: The City's provision of public open spaces shall be consistent with the Goals, Objectives and Policies of related Elements of the Comprehensive Plan (Land Use, Conservation, Coastal Management, et. al.).

POLICY 2.1.3: The City shall discourage development, within or adjacent to unique natural areas, where such activity will have significant detrimental effects on the aesthetic and environmental quality of the unique natural areas.

POLICY 2.1.4: The City shall follow standard design guidelines for all recreational and open space adhering to current Natural Resource Protection Areas (NRPA) and Crime Prevention Through Environmental Design (CPTED) concepts/guidelines.

POLICY 2.1.5: The Parks Division shall utilize native plant materials where appropriate in development of new parks, redevelopment of existing sites, and at other public locations to achieve the benefits associated with such materials (lower maintenance costs, habitat provision, drought tolerance, etc.). POLICY 2.1.6: The City shall upgrade and modernize parks through the implementation of maintenance standards and the ongoing five year Capital Improvement Program.

GOAL 3: Provide and maintain diverse parks, recreation facilities, and activities of high quality for all residents.

POLICY 3.1.1: The City shall continue and expand the use of cooperative agreements with public and private schools, surrounding jurisdictions nonprofit agencies, churches and the private sector to assure facilities for active recreational opportunities year-round.

POLICY 3.1.2: The City shall allocate sufficient funds to adequately supervise and maintain existing parks and recreational facilities in order to protect the public investment.

POLICY 3.1.3: Every five years the City shall reassess the ability of existing sites and facilities to meet the changing needs of the population to be served.

POLICY 3.2.1: The City shall centrally locate new park and recreation facilities in the neighborhood area to be served whenever possible.

POLICY 4.1.4: The City shall maintain and improve the existing recreation lands and encourage the dedication of properties for recreation and open space uses through appropriate incentives.

POLICY 4.1.5: Proposed park sites, and existing park sites scheduled to be renovated, shall be evaluated as to their existing and potential environmental quality, the preservation of historical, cultural or archeologically significant neighborhood and community park. This assessment shall include community input.

The City of Fort Lauderdale shall consider the following as park projects are undertaken, particularly projects utilizing or attempting to obtain federal and/or state grants:

- 1. The project's ability to maintain or improve park levels of service;
- 2. The protection of Endangered and Threatened Species and Species of Special Concern, including rare or threatened vegetative communities;
- 3. The enhancement or restoration of natural areas and shoreline ecosystems, and the removal of nuisance and/or exotic vegetation;
- 4. The creation or continuation of green way systems utilizing environmentally sensitive lands or designated Brownfield areas;
- 5. The preservation of large canopy trees;
- 6. The protection or improvement of groundwater quality and/or surface water quality;
- 7. The protection of natural resources from potential adverse impacts associated with uses or activities on adjacent lands, including a land use compatibility

analysis and the provision of wetland buffers and buffer yards in the Growth Management Plan and Land Development Code. Where applicable, the City shall ensure that the environmental systems mentioned above are protected, preserved, and/or enhanced.

8. To provide for coordination between the local government and other federal, state and local agencies or nonprofit organizations in acquiring or managing natural areas or open space.

In support of the goals of the City's Comprehensive Plan as outlined above, the Parks Division shall utilize native plant materials and shall incorporate *NatureScape* practices, where appropriate, to achieve the associated benefits such as a reduction in the amount of irrigation utilized, as well as fertilizer and pesticide use.

The *NatureScape Broward* program focuses on the following nine (9) principles for "Florida Friendly" landscapes:

- 1. Right Plant, Right Place: Select plants that have adapted to minimal amounts of water, fertilizer, and pesticides.
- 2. Water Efficiently: Irrigate only when your lawn and landscape need water. Efficient watering is the key to a healthy Florida yard and reducing runoff.
- 3. Fertilize Appropriately: Less is often best. Over-utilization of fertilizers is hazardous to the environment. Choosing the correct combination of minerals for soil and plant needs is important.
- 4. Mulch: Maintain a 2-3" layer of mulch to help retain soil moisture, prevent erosion, and suppress weeds.
- 5. Attract Wildlife: Plants in your yard provide food, water, and shelter and help conserve Florida's diverse wildlife.
- 6. Control Yard Pests Responsibly: Use pesticides wisely. When improperly used, these chemicals can harm people, pets, beneficial organisms, and the environment.
- 7. Recycle: Compost grass clippings, leaves, and yard trimmings to return nutrients to the soil and reduce waste disposal.
- 8. Reduce Storm-water Runoff: Help prevent pollution from reaching waterways by reducing soil, debris, fertilizer, pesticides, and household contaminants that run off your property.
- 9. Protect Waterfront: Waterfront property, whether on a bay, river, canal, pond or beach should be protected as a natural treasure.

The City shall incorporate all applicable principles into the development of the park and shall apply for either a *Backyard Wildlife Habitat* certification through the National Wildlife Federation or the *Florida Yards & Neighborhoods* certification through the University of Florida IFAS Extension within three (3) months of opening the site to the public.

2.2 Land Use Designation and Zoning

The site is zoned CF – Community Facility. The City's land use and zoning designations and maps will be amended to be consistent with the County land use for designation as "Recreation and Open Space."

2.3 Identification of Site and Funding Sources

The site will be identified as being publicly owned and operated as a natural conservation and outdoor recreation area, acquired with Broward County Safe Parks and Land Preservation Bond Program funds.

3. Natural and Cultural Resources

3.1 Natural Communities

The major vegetation located on site primarily consists of the following: palms, live oak, gumbo-limbo, strangler fig, and slash pine. A table listing the plants and their species is included in Section 3.5. The site contains no animal communities.

3.2 Unique Geological Features

No unique geological features of relevance are present on site.

3.3 Wetlands and Water Quality

There are no surface waters and/or wetlands on or hydrologically connected to the project site. The groundwater hydrology of the project site is integrated with the surrounding storm water network.

3.4 Site Disturbance and Restoration

There are no known disturbances by feral animals or any evidence of ferals on the project site. The City of Fort Lauderdale Parks Division will continue to monitor the site for signs of feral animals. If evidence of feral animals is found in the future, a plan will be developed to humanely remove them from the site and to maintain the site free of feral animals.

Disturbance of the site is limited to the invasive plant species as listed in Table 3 and as referenced by the most recent Florida Exotic Pest Plant Council (FLEPPC) list of invasive and exotic plant species. The most recent FLEPPC Invasive Species is included as Appendix B.

The City of Fort Lauderdale Parks and Recreation Department will remove all invasive and exotic plant species. Following the manual and/or mechanical removal of the exotic

and invasive plant materials, the site will be replanted with native species within one year.

Native vegetation shall be incorporated into the park landscape design utilizing xeriscape landscape design methods where appropriate to conserve water. At least twenty-five percent (25%) of the total project area, excluding park access infrastructures such as parking areas and entranceways, will be landscaped with native species and maintained in such a manner to ensure their viability.

Scientific Name	Common Name
Tre	ees
Chrysophyllum oliviforme	Satin leaf
Simarouba glauca	Paradise Tree
Coccoloba diversifolia	Pigeon Plum
Cordia sebestena	Orange Geiger
Acer rubrum	Red Maple
Morus rubra	Red Mulberry
Thrinax morrisii	Thrinax palm
Shrubs & G	round Cover
Chrysobalanus icaco	Cocoplum
Capparis cynophallophora	Jamaican Caper
Callicarpa americana	American Beautyberry
Zamia pumila	Coontie
Psychotria nervosa	Wild Coffee
Morella cerifera	Wax Myrtle

Table 1. Potential plant species to be used in landscaping

Once development is complete, the Parks and Recreation Department will prevent reinfestation of the site by the removal of the invasive and exotic plants and will ensure the viability of the area through ongoing preventative maintenance. This plan will include a program of routine mowing of the open areas to limit the introduction of invasive and exotic plants, exotic/invasive plant retreatments, and the replanting of dead plant material.

3.5 Listed Species

No plant or animal species, as listed by county, state and/or federal governments as endangered or threatened species are located on the project site. If future monitoring of the site reveals the presence of a listed plant or animal species, they will be reported to the Florida Natural Areas Inventory (FNAI) on FNAI forms (Appendix D).

The forms may also be assessed at the following website locations:

http://www.fnai.org/PDF/Natural communities form.pdf http://www.fnai.org/PDF/Plant form.pdf http://www.fnai.org/PDF/Animal form.pdf

Table 2. Plant species found on site

Existing Species	Native/ Exotic
Sabal Palm/ Sabal palmetto	N
Live Oak/ Quercus virginiania	N
Areca Palm/ Chrysalidocarpus lutescens	E
Sea Grape/ Coccoloba uvifera	N
Gumbo Limbo/ Bursera simaruba	N
Satin leaf/ Chrysophyllum oliviforme	N
Paradise Tree/ Simarouba glauca	N
Crape Myrtle/ Lagerstroemia indica	E
Boston Fern/ Nephrolepis exaltata	N
Ixora/ Ixora spp	E
Virginia Creeper/ Parthenocissus quinquefolia	N
Strangler Fig/ Ficus aurea	N
Slash Pine/ Pinus elliottii v. densa	N
Coral Tree/ Erythrina variegata v. orientalis	E
Coconut Palm/ Cocos nucifera	E
Silk Floss Tree/ Chorisia speciosa	E
Dragon Tree/ Dracaena spp	E
Bromeliad/ genus species unknown	E
Croton/ Codiaeum variegatum pictum	E
False Aralia / Dizygotheca elegantissima	E
Mahogany/ Swietenia mahagoni	N
Cocoplum/ Chrysobalanus icaco	N
Dwarf firebush/ Hamelia patens compacta	N
Crown of Thorns/ Euphorbia millii	E
Indian Hawthorn/ Rhaphiolepis indica	N
Black olive (gregorywood)/ Bucida buceras	E
Laurel Oak/ Quercus laurifolia	N
Golden Dewdrop/ Duranta erecta	E

Table 3. Exotic invasive plant species identified for removal

Existing Species			
Surinam Cherry/ Eugenia uniflora			
Oyster Plant/ Rhoeo spathacea, Tradescantia spathacea			
Pothos/ Epipremnum aureum			
Sword Fern/ Nephrolepis cordifolia			
Asparagus fern/ Asparagus aethiopicus			
Melaleuca/ Melaleuca quinquenervia			
Guava/ Psidium guajava			
Ligustrum/ Ligustrum lucidum			
Hibiscus/ Hibiscus tiliaceus			
Lantana/ Lantana camara			
Bowstring hemp/ Sansevieria hyacinthoides			

3.6 Archaeological, Cultural, and Historical Resource Protection

There are no generally known archaeological, cultural, or historical resources of relevance on the project area. If future evaluation indicates the evidence of or the likelihood that such resources are present on, or in the project site, the City will obtain an archaeological survey of the site. The City will also immediately notify the Broward County Land Preservation Section as well as coordinate with the Florida Department of State, Division of Historic Resources (FDOS/DHR), and the Broward County Historical Commission (BCHC) to assess the find and obtain guidance on the management of the resources. Adequate protection measures will be implemented immediately by the City to protect all such resources. The collection of artifacts or the disturbance of archaeological, cultural, or historic resources on the project site will be prohibited unless prior authorization has been obtained from the FDOS/DHR and BCHC. In addition, the management of such resources will comply with the provisions of Chapter 267, Florida Statutes, specifically Sections 267.061 (2)(a) and (b).

4. Site Developments and Improvement

4.1 Acknowledgement Sign

A temporary sign will be erected at the entrance to the site that acknowledges the partnership of the City of Fort Lauderdale and the Broward County Board of County Commissioners. The sign will state that the site was purchased with funds from the Broward County Safe Parks and Land Preservation Bond Program. The sign will be at least two feet by three feet in size and will include both City and Broward County logos.

The City will install and maintain a permanent recognition sign at the entrance of the park upon completion of the park's development and prior to the park's opening. The permanent signage will comply with the aforementioned standards.

4.2 Existing Physical Improvements

The property was formerly an elementary school and is currently being used to provide administrative office space. The site contains existing buildings, portable buildings, parking areas and recreation areas. The adjacent existing Hortt Park, located on the south end of the parcel, contains a clay baseball field, asphalt basketball court, and playground. The park is being maintained by the City of Fort Lauderdale Parks & Recreation Department.

4.3 **Proposed Physical Improvements**

In order to adhere to the directives as stated in Section 4.03 of Resolution 2000-1230, this project will comply with the following Broward County Standard for active recreation and impervious surfaces for lands acquired through the Land Preservation Program:

Impervious surfaces and surfaces requiring intense fertilization and pest control, such as ballfields, shall not exceed 30% of the project area, excluding park access infrastructures such as parking areas, entranceways and restroom facilities.

Less than thirty percent (30%) of the site will be dedicated to active recreation. Some of the amenities being proposed for the park during this phase of construction consist of: park benches, picnic tables, native plant landscaping, a drinking fountain, modifications to the existing parking lot, jogging trail, and trash cans to be placed at appropriate locations within the park. A future phase of construction may include a pavilion, community garden plots, beach volleyball court, tennis court, and basketball half courts. As expressed by the wishes of the neighborhood, one building may remain on site to be used as a community center building.

The proposed site improvements are intended to enhance public access to and use of the park site. The site contains an existing asphalt parking loft with spaces designated for handicapped vehicles in compliance with the Americans with Disabilities Act (ADA). Modifications to the parking lot will include pervious material wherever feasible. Bicycle racks will also be included to encourage non-motorized vehicular transportation to the park.

The construction of the project will not compromise the integrity of the site nor impact native plant species. Additionally, NatureScape Broward principles will be utilized to reduce the amount of irrigation, fertilizer, and pesticides used on site. The City will apply for certification under the Florida Yards & Neighborhoods or Backyard Wildlife Habitat program once site development has been completed.

A community planning process will be completed before undertaking any physical improvements addressed in the Final Management Plan. It is noted, that according to Bond Program covenants, that any proposed modification and/or undertaking of any site alteration or physical improvement not addressed in the approved management plan requires prior County review and approval.

A map of the restoration area and proposed amendments is included as Appendix C.

4.4 Environmental Education Program

If environmental educational programming is anticipated for the site, the City will install interpretive signage or kiosks to educate visitors about the natural environment. Such signage will also indicate the presence of archeological, cultural, or historical resources if they are found on site.

4.5 Permits

Water Use Permit

The City of Fort Lauderdale will obtain all required permits for any work proposed on site. Any necessary permits will be obtained before the work is performed. A list of potential required permits is included in Table 4 below.

Type of Permit	Regulation Entity
Environmental Deseuros Lisones	Broward County Environmental Protection
Environmental Resource License	and Growth Management Department
	Broward County Public Works and
Permits to work in right-of-ways &	Transportation Department, City of Fort
creation of road cuts & turn lanes	Lauderdale Public Services Department,
	Florida Department of Transportation
Standard Canaral Environmental	South Florida Water Management District
Standard General Environmental	or Florida Department of Environmental
Resource Permit	Protection
	Broward County Public Works and
Stormwater Treatment System	Transportation Department, City of Fort
	Lauderdale Public Services Department
Structural landscening cleatrical	Broward County Building Department and
Structural, landscaping, electrical, irrigation and zoning permits	City of Fort Lauderdale Building
ingation and zoning permits	Department
Surface Water Management Permit	Broward County Environmental Protection
	and Growth Management Department
Tree Relocation/Removal Permit	City of Fort Lauderdale Landscaping
	Department

Table 4. Permits required or potentially required for development

4.6 Easements, Rights-of-Way, Concessions or Leases

At present, no easements, rights-of-way, concessions or leases are associated with the site.

South Florida Water Management District

It is noted that no easement, concession, or lease can conflict with Article 5 of the approved Interlocal Agreement executed for this project by Broward County and the City. If the project site is to remain subject after its acquisition to any of the below listed activities or interests, the County will be given at least sixty (60) days written notice of any such activity or interest prior to the activity taking place:

- Any lease of any interest in the project site to a non-governmental person or organization.
- The operation of any concession on the project site to a non-governmental person or organization.

- Any sales contract or option to buy things attached to the project site to be severed from the project site with a non-governmental person or organization.
- Any uses of the project site by non-governmental persons other than in such person's capacity as a member of the general public.
- A management contract of the project site with a non-governmental person or organization.
- Such other activity or interest as may be specified from time to time in writing by the County to the City.

5. Management Needs

5.1 Coordinated Management

The project area is located adjacent to the existing Hortt Park site. The entire 5.9-acre site will be maintained by the City of Fort Lauderdale Parks & Recreation Department as one park.

5.2 Trails and Greenways

The project is located on SW 14th Court, south of the Davie Boulevard exit off of I-95 and is accessible from SW 17 Ave. The park is also located a short distance from the New River. As this section of the greenway is located within a residential community (see map), the proposed site will enhance pedestrian access bv providing an area for bicyclists and pedestrians to rest, picnic, and enjoy the greenway by providing expanded access to public amenities. The park is also

located within a short distance of a future proposed Broward County Greenways System priority trail and will enhance the proposed recreational trail system by closing gaps in the existing recreational trail system and providing new trailside facilities. A map of the Broward County Greenway System and the proposed future priority trail is included as Appendix E.

5.3 Maintenance

The site will be cleared for development and wastes or illegally dumped items on the project site will be removed.

The project will continue to be routinely monitored and maintained free of such materials through fencing and proper disposal methods. If any hazardous materials are discovered on site, the City will immediately notify the Broward County Environmental Protection and Growth Management Department.

The City of Fort Lauderdale Parks and Recreation Department will be responsible for all aspects of property maintenance including items such as mowing of the turfgrass, weeding of plant beds, maintenance of trees, removal of trash, and maintenance of the park's amenities. The City will perform regular maintenance of the project site and amenities as indicated in Table 5 below.

Time Frame	Activities	Responsible Agency
Daily/Weekly as needed	Maintain public use	City of Fort Lauderdale
	amenities	Parks & Recreation Dept
Quarterly	Monitor site aesthetics	City of Fort Lauderdale
		Parks & Recreation Dept
Quarterly first	Monitor and treat for	City of Fort Lauderdale
year/annually thereafter	invasive and exotic plants	Parks & Recreation Dept
or as needed		
Annually or as needed	Remove vines from trees	City of Fort Lauderdale
		Parks & Recreation Dept
Every 5 years or as	Update management	City of Fort Lauderdale
needed	plan	Parks & Recreation Dept

Table 5.	Operational	plan of maintenance and	I monitoring activities
----------	-------------	-------------------------	-------------------------

5.4 Security

The City of Fort Lauderdale Police Department, as well as Parks and Recreation Department Park Rangers, will perform surveillance of the site. The City's Parks and Recreation staff will also provide regular park inspections as necessary to maintain the integrity of the park and its amenities. Parks and Recreation Department staff will also either respond to public complaints and concerns, or forward such matters to the appropriate and responsible party.

6. Cost Estimates and Funding Sources

A table of the estimated costs associated with the implementation of the management plan for the project site over the five-year period is attached below.

	F		
Activity	Fund	Cos	st Over 5-Year Period
Initial Site Clean-up & Reveg		ሰ	050 104
Demolition	CIP	\$	253,124
Fencing	CIP	\$	30,000
Trash and debris removal	CIP	\$	5,000
Exotic plant & vine removal	CIP	\$	10,000
Landscaping	CIP	\$	70,000
Sod	CIP	\$	20,000
Irrigation	CIP	\$	35,000
Total		\$	423,124
Site Development (Design, C		latio	n)
Engineering fees, plans,	CIP	\$	200,000
permits, rezoning and land			
use amendments fees			
Park signage	CIP	\$	5,000
Trail (ADA Mulch Path)	CIP	\$	75,000
Picnic tables (10)	CIP	\$	9,000
Trash cans (10)	CIP	\$	4,000
Benches (10)	CIP	\$	7,500
Bike racks (2)	CIP	\$ \$	1,000
Playground expansion	CIP	\$	50,000
Pavilion	CIP	\$	40,000
Park lighting	CIP	\$	60,000
Drinking fountain (2)	CIP	\$	8,000
Fitness stations	CIP	\$	20,000
Community garden plots	CIP	\$	5,000
Basketball court (2 1/2 courts)	CIP	\$	30,000
Tennis court surfacing	CIP	\$ \$	40,000
Volleyball court	CIP	\$	15,000
Optional Community Center	CIP	\$	300,000
Construction Total		\$	869,500
	GRAND TOTAL	\$ 1 ,	,292,624
Ongoi	ng Park Operating Activi	ties	
Site security		\$	20,000
Grounds maintenance		\$	80,000
Maintenance supplies		\$	30,000
Total		\$	130,000

Table 6. Estimated costs of implementation

7. Priority Schedule

A priority schedule as developed for the implementation, development, and management of the activities of this management plan is provided in Appendix F.

Park signage	CIP	\$	5,000	
Trail (ADA Mulch Path)	CIP	\$	75,000	
Picnic tables (10)	CIP	\$	9,000	
Trash cans (10)	CIP	\$	4,000	
Benches (10)	CIP	\$	7,500	
Bike racks (2)	CIP	\$	1,000	
Playground expansion	CIP	\$	50,000	
Pavilion	CIP	\$	40,000	
Park lighting	CIP	\$	60,000	
Drinking fountain (2)	CIP	\$ \$ \$	8,000	
Fitness stations	CIP	\$	20,000	
Community garden plots	CIP	\$	5,000	
Basketball court (2 ½ courts)	CIP	\$ \$	30,000	
Tennis court surfacing	CIP	\$	40,000	
Volleyball court	CIP	\$	15,000	
Optional Community Center	CIP	\$	300,000	
Construction Total		\$	869,500	
	GRAND TOTAL	\$ 1	,292,624	
Ongoi	ng Park Operating Activi	ties		
Site security			20,000	
Grounds maintenance			80,000	
Maintenance supplies		\$	30,000	
Total		\$	130,000	

The playground replacement cost of \$50,000 was included in the initial plans under the CIP funding but was later removed in FY2020 in anticipation of the project being funded by the Parks Bond. However, a grant was since awarded in the amount of \$50,000 from the Florida Recreation Development Assistance Program (FRDAP) to assist in funding the total project cost for the development of a new playground at Hortt Park. Outlined below in Table 6.1 is a breakdown of the playground replacement cost.

Notes

The Clay County Contract #18/19-2 provides a 2% discount on LSI product. The maximum price for installation is 50% of the product price. (Installation does not include site prep, slabs, footings or engineering).

The Clay County Contract #18/19-2 provides a 2% discount on VitriTurf product. Installation is included in the price of the product.

Basis of Proposal

Our proposal is based upon our discussion and Plan Sheet L-1, dated 10/11/2019

Estimated project completion schedule

(This schedule starts when all needed information to direct engineering has been gathered.)

- 4 Weeks: Engineering
- 4 Weeks+/- Permitting, finishes, etc.. 4 Weeks Longost manufacturing load time. (Typical for scheduling.) 1 Week Shipping 5 Weeks Installation of equipment and surfacing
- 18 Weeks TOTAL WEEKS

Note that RSI is committed to do all it can to meet the needs of your project.

- To be provided by the customer, as applicable: Permit Fees assessed by the Building Dept.not included with Rep Services Scope of Work.
 - · Site Plan or Survey, signed and sealed for Building Dept to process permits
 - · Soils testing If applicable and will need to be supplied by the City
 - . Tree Survey If applicable and will need to be supplied by the City

Scope of Proposal

Please note the vendor requirements itemized below.

Landscape Structures:

When placing an order, please select colors from those shown on pages 262-269 of the catalog. Protective surfacing material must have a critical height value to meet the maximum fall height for the equipment and be accessible (ref. ASTM F3101).

Vitriturf Poured in Place Surfacing:

This quotation is for material, freight and installation.

Owner or Owner's contractor is responsible for:

Accuracy of project dimensions and product quantities prior to ordering. Please specify product depth and color when ordering.

Installation:

Installer Providing a locked security storage to prevent theft and/or vandalism. Unless otherwise noted, the following items are to be PROVIDED BY CUSTOMER prior to installation:

Installation Charges on this proposal are based on NO UNFORESEEN conditions in the area, above or below the surface. If unforeseen conditions arise, the installation charges will change to reflect additional costs associated with dealing with those circumstances. Examples of this include, but are not limited to: site not ready upon installer's arrival, underground utilities, or difficulties with footers due to coral rock or ground water in the holes.

8. Monitoring and Reporting

The site will be regularly monitored for compliance with the management plan. An annual report detailing the progress of the project and success of management plan activities will be submitted to the Broward County Land Preservation Section as required. The annual report will include an update on the status of the project site, as well as discussion on the progress made during the year toward meeting the goals in the priority schedule of the management plan.

9. Literature Cited

No relevant documents were used or cited in the preparation of this management plan.

ORIGINAL APPENDIX

Appendix B. FLEPPC List of Invasive Species

Florida Exotic Pest Plant Council's 2009 List of Invasive Plant Species

Purpose of the List: To focus attention on --

> the adverse effects exotic pest plants have on Florida's biodiversity and plant communities.

- > the habitat losses from exotic pest plant infestations,
- > the impacts on endangered species via habitat loss and alteration,
- > the need to prevent habitat losses through pest-plant management,
- > the socio-economic impacts of these plants (e.g., increased wildfires in certain areas),
- changes in the seriousness of different pest plants over time,
- > the need to provide information that helps managers set priorities for control programs.

CATEGORY I

Invasive exotics that are altering native plant communities by displacing native species, changing community structures or ecological functions, or hybridizing with natives. This definition does not rely on the economic severity or geographic range of the problem, but on the documented ecological damage caused.

Scientific Name Common Name	FLEPPC Cat.	Gov. List	Reg. Dist.
Abrus precatorius rosary pea	1	N	C, S
Acacia auriculiformis carleaf acacia	1		C, S
Albizia julibrissin mimosa, silk tree	1		N,C
Albizia lebbeck woman's tongue	I		C, 5
Andisia crenata (A. crenulata misapplied) coral ardisia	1		N. C. S
Ardista elliptica (A. humilis misapplied) shoebutton ardisia	L	N	C, 5
Asparagus aethiopicus (A. sprengeri; asparagus-fern A. densiflorus misapplied)	L		N, C, 5
Bauhinia variegata orchid tree	L		C, 5
Bischofia javanica bishopwood	Ť.		C, S

Ligustrum sinense Chinese privet, hedge privet	1		N, C, S
Lonicera japonica Japanese honeysuckle	1.		N, C, 5
Ludwigia peruviana Peruvian primrosewillow	1		N, C, S
Luziola subintegra Tropical American water grass	1		S
Lygodium japonicum Japanese climbing fern	P	N	N, C, S
Lygodium microphyllum Old World climbing fern	i.	N	C, S

¹Does not include *Ficus microcarpa* subsp. *fayuensis*, which is sold as "Green Island Ficus" FLEPPC 2009 List of Invasive Plant Species – Fall 2009

FLEPPC List Definitions:

Exotic – a species introduced to Florida, purposefully or accidentally, from a natural range outside of Florida.

Native – a species whose natural range includes Florida.

Naturalized exotic – an exotic that sustains itself outside cultivation (it is still exotic; it has not "become" native).

Invasive exotic – an exotic that not only has naturalized, but is expanding on its own in Florida native plant communities.

Abbreviations:

Government List (Gov. List): P = Prohibited aquatic plant by the Florida Department of Agriculture and Consumer Services;

 N = Noxious weed listed by
 Florida Department of Agriculture & Consumer Services;
 U = Noxious weed listed by
 U.S. Department of Agriculture.

Regional Distribution (Reg. Dist.): N = north, C = central, S = south, referring to eachspecies' current distribution ingeneral regions of Florida (notits potential range in the state).Please refer to the map below.

Changes to the 2009 List:

Luziola subintegra, added to list as Category I

Luziola subintegra (rice grass) was first discovered in Lake Okeechobee by Mike Bodle in 2007. This equatic grass is spreading in the lake. It grows in water 2-3 m deep, spreads vegetatively and by seed, and aggressively outcompetes other native and exotic species. To date, 2,000 acres have been treated. Nymphoides cristata, moved from Category II to Category I Snowflake (Nymphoides cristata) is an Asian aquatic that became problematic in southwest Florida in the 1990s. It is now an abundant weed in canals and ponds in southwest Florida, and has spread throughout the peninsula where it has been documented in seven counties, from Collier to St. Johns. It has colonized the Big Cypress National Preserve where it is invading several strand swamps along Tamiami Trail, presumably introduced by fisherman using cast nets infested from waters outside of the preserve. Salvinia minima, added to list as

Category I

Water spangles (Salvinia minima), first found in Florida in 1928, remained a cryptic species during a period when opinions differed on its status as native or introduced in Florida. In 2001, a study of early herbarium voucher data revealed the introduction points and systematic spread of this free-floating fern into and throughout Florida. S. minima outcompetes more nutritive native duckweeds by overtopping their thinner fronds, which float flat upon the water surface.

Scleria lacustris, moved from Category II to Category I Wright's nutrush (Scleria lacustris) is an annual tropical sedge that was first collected in Florida in 1988. In Florida, its distribution extends to more than 20 distinct natural areas in eight counties within four major drainage regions of the central and southern peninsula. Its unique growth habit obscures open water and drastically alters the naturally sparse and upright structure of preexisting native vegetation. Such domination may even displace native prey for

the endangered Florida snail kite, a sight feeder inhabiting many locations where invasive colonization occurs.

Scientific Name	Common Name	FLEPPC Cat.	Gov. List	Reg. Dist.

FLEPPC 2009 List of Invasive Plant Species - Fall 2009

Callistemon viminalis, added to list as Category II	
Bottlebrush (Callistemon viminalis), a	
popular landscape tree, is now invading	
undisturbed short hydroperiod wetland	
communities in Miami-Dade, Collier,	
and Martin Counties, including those	
in Rig Cupress National Presence and	
in Big Cypress National Preserve and Everglades National Park.	
Dactyloctenium aegyptium, added to list as Category II	
Durban crowfootgrass (Dactyloctenium	
aegyptium) is an annual grass that is	
a widely distributed weed throughout	
the southeastern US. In Florida, this	
species has been documented in 54	
counties. While it is primarily a weed	
of disturbed areas, it also invades	
haach dung communities in couthorn	
Elorida including those located within	
Florida, including those located within Everglades and Dry Tortugas National Parks. Dense growth of this species	
Parks, Dansa growth of this species	
interferee with ground penting birds in	
interferes with ground nesting birds in Dry Tortugas and competes with state	
and federally listed plant species on the mainland.	
<i>Elaeagnus umbellata,</i> added to list as Category II	
Autumn-olive (Elaeagnus umbellata)	
is an aggressive shrub capable of	
replacing entire native ecosystems,	
which it has done in numerous locations	
in other states. There are three known	
native locations in the eastern Florida	
panhandle; two are local escapes	
from cultivation. The third is a mixture	
of mature upland sand hill and pine	
communities where a wildlife planting	
has escaped. The entire 2,081 acre site	
e infected. The infectation ranges from	
s infested. The infestation ranges from 100% (12.5 acres), to 50% (49.9 acres),	
to 25% (38.3 acres), to 10% or less	
(1,683.4 acres).	
Hyparrhenia rufa, added to list as	
Category II	
Jaragua (<i>Hyparrhenia rufa</i>) is an annual	
prass that is known from 14 Florida	
grass that is known from 14 Florida counties. In Miami-Dade County it nas been found in intact habitat in	
has been found in intact habitat in	
at least 12 pine rockland fragments,	
putcompeting native plant species.	
L andoltia punctata , added to list as Category II	
Spotted duckweed (Landoltia punctata)	
s a small floating aquatic plant that is	
native to Australia and Southeast Asia.	
Since it was first found in Missouri in	
he 1930s, it has spread to 22 states	
and been documented in 36 Florida	
counties. It invades a wide range	
of undisturbed aquatic habitats and	
outcompetes native species.	
Syzygium jambos, formerly Category II,	
removed from List	

The Committee has not been able to locate data showing this species behaves as a Category II invasive.

Use of the FLEPPC List

FLEPPC encourages use of the Invasive Species List for prioritizing and implementing management efforts in natural areas, for educating lay audiences about environmental issues, and for supporting voluntary invasive plant removal programs. When a non-native plant species is to be restricted in some way by law, FLEPPC encourages use of the List as a first step in identifying species worth considering for particular types of restriction. For more information on using the FLEPPC List of Invasive Plant Species, see Wildland Weeds Summer 2002 issue (Vol. 5, No. 3), pp. 16-17, or http://www. fleppc.org/list/list.htm

NOTE: Not all exotic

plants brought into Florida become pest plants in natural areas. The FLEPPC List of Invasive Plant Species represents only about 10% of the nearly 1,400 exotic species that have been introduced into Florida and have subsequently established outside of cultivation. Most escaped exotics usually present only minor problems in highly disturbed areas (such as roadsides). And there are other exotics cultivated in Florida that are "wellbehaved" --- that is, they don't escape cultivation at all.

FLEPPC Database — The Florida Exotic Pest Plant Database contains over 75,000 sight records of infestations of FLEPPC Category I and Category II species in Florida public lands and waters. 211 species are recorded. Nearly all of the records are from local, state, and federal parks and preserves; a few records document infestations in regularly disturbed public lands such as highways or utility rights-of-way. Natural area managers and other veteran observers of Florida's natural landscapes submit these records, with many supported further by voucher specimens housed in local or regional herbaria for future reference and verification. New and updated observations can be submitted online at www.eddmaps.org/florida/. This database, along with other plant-data resources such as the University of South Florida Atlas of Florida Vascular Plants at www.plantatlas.usf.edu, the Florida Natural Areas Inventory database at www.refini org, and The Institute for Regional Conservation Floristic Inventory of South Florida database at www.regionalconservation.org, provides important basic supporting information for the FLEPPC List of Invasive Plant Species.

Images and/or distributional data of FLEPPC-listed species may be found at one or more of the following websites: University of South Florida Atlas of Florida Vascular Plants, www.plantatlas.usf.edu; the University of Florida Herbarium collection catalog, http://www.flmnh.uft.edu/herbarium/cat/, and image gallery, http://www.flmnh.uft.edu/herbarium/cat/ imagesearch.asp; at Fairchild Tropical Botanic Garden's Virtual Herbarium, www.virtualherbarium.org/vhportal.html, The Robert K. Godfrey Herbarium at Florida State University, http://herbarium.bio.fsu.edu/index.php; the University of Florida's IFAS Center for Aquatic and Invasive Plants, http://plants.ifas.ufl.edu, and the USDA PLANTS database, http:// plants.usda.gov/. Please note that greater success and accuracy in searching for plant images is likely if you search by scientific name rather than a common name. Gommon names often vary in cultivation and across regions. For additional information on plants included in this list, see related links and pages at www.fleppc.org.

FLEPPC 2009 List of Invasive Plant Species - Fall 2009
