2023 BROWARD COUNTY EMS GRANT APPLICATION

"Funding to improve or expand prehospital EMS Systems"

- 8. Problem/Unmet Need Description:** Provide a narrative of the problem or need and the population affected by describing the present situation and management (if any) and the potential adverse consequences if not addressed.

Systematic and quality pre-hospital care is a vital component to a healthcare delivery system and essential in improving the lives of patients. Broward County EMS leaders are continually seeking opportunities to provide education and training on dynamic patient trends and cutting edge treatment modalities for their pre-hospital emergency medical service providers.

Research by De Lorenzo et al. and Lantman et al., support that directed continuing education (CE) programs can not only help first responders to retain knowledge but also improve pre-hospital skills (De Lorenzo, and Lantman). No consolidated and collaborative EMS focused continuing education program or conference is readily accessible to all of the over 3,000 + EMS providers in Broward County and several thousand additional EMS providers across South Florida. The closest opportunity for education is offered biannually elsewhere in the state in locations such as Orlando and Daytona. This creates a significant and direct financial expense to all Broward EMS agencies, as well as governmental and private sector participants. Traveling to conferences outside of the area limits the ability of partnering local EMS agencies to send a large number of providers to learn and work together during these educational offerings.

EMS providers in Broward County need a local conference and large educational structure to collaborate within the 18 EMS agencies (plus 4 private EMS agencies) in Broward County and local healthcare providers to fulfill the educational needs while maximizing reach with limited funds.

The First There First Care EMS conference has been the solution and successful collaborative opportunity for our Broward County EMS and healthcare agencies for the last 25 years.

9. EMS Improvement and Expansion to Resolve Problem or Address Needs:

Describe proposed solutions to the problem and/or need (question #8 – problem description). State the improvements that are reasonably foreseeable and measurable. Use data, scientific, or anecdotal information to support the agency's request. Explain how the project will improve and/or expand prehospital EMS in Broward County. Be specific.

The Chiefs Association of Broward County (FCABC) in conjunction with the Broward County EMS Council has, during the past 25 years, successfully hosted the Annual 1st There 1st Care EMS Conference & Mike Haygood Advanced Life Support Competition. Both the Council and Fire Chiefs have jointly provided direct financial assistance via grants and supplemental funding for event development, coordination, support services, and staffing for this three day event.

The 25th Annual Conference hosted over 1,050 + honored registered participants from throughout Broward, Miami Dade, Palm Beach, Monroe and other counties for the three day long events. In addition, over 150 nursing registrants from area hospital emergency departments, EMS physicians, politicians, administrators and guests were in attendance. The FTFC EMS Conference has improved steadily since its inception in content, value and participation.

This conference and ALS/EMS competitions will improve the skills and teamwork of Paramedics and EMT's, by continuing to improve and advanced patient care needed of all the citizens and visitors in Broward County. The conference and competitions will help keep all EMS providers at the forefront of the pre-hospital care.

Therefore, in an effort to address the need for ongoing EMS education, decrease morbidity and mortality, and increase competency with pre-hospital and emergency skills, we propose a continuation of grant funding to support the education and training needs for each of the 18 municipal Broward EMS agencies as well as some of the local healthcare providers and private ambulance providers. Each EMS agency as well as local healthcare providers will have the opportunity to send pre-hospital and emergency care providers to participate in offered trainings.
