**SUBJECT: RFP NO. PNC2126774P1 – CONTINUING ENGINEERING SERVICES FOR STUDIES AND REPORTS
ACCEPTANCE OF MULTIPLIER RATE AND OPERATING MARGIN**

Staff's experience with national firms that provide consultant services related to water and wastewater treatment includes higher overhead and fringe percentages than local firms due to the specialty and expertise of these firms and the fact that these firms provide national research in these areas which, local, smaller firms do not. The overhead and fringe percentages provided were based on 2023 audited overhead and fringe percentages. A review of similar firms' contracts with the County indicates that the multiplier ranged from 3.06 to 3.20. Attached is a spreadsheet that demonstrates the difference in multipliers of local and national firms for water and wastewater projects including treatment plant, master planning, and distribution system projects.

**RE: RFP NO. PNC2126774P1
CONTINUING ENGINEERING SERVICES FOR STUDIES AND REPORTS
ACCEPTANCE OF SAFE HARBOR MARGIN**

Staff's experience with local, minority, small, specialized firms that provide consultant services related to water and wastewater treatment, such as McCafferty Brinson Consulting, LLC (MBC) and CSolutions, Inc. (CSolutions), is that they are unable to provide FAR-compliant accounting history to complete the County requested audit. MBC and CSolutions accepted Safe Harbor rates for overhead and fringe at a combined 110%. The Operating Margin was negotiated at 24%, resulting in a 2.60 multiplier. Both MBC and CSolutions are Certified Business Enterprise firms with specialties in water treatment process and pump stations and add value to this agreement that justifies their higher multiplier. The 2.60 multiplier allows for Maximum Billing Rates over the potential five-year agreement that are more competitive with the flat rate fees the firms have negotiated with other municipalities. Attached is a spreadsheet that compares the Maximum Billing Rates negotiated for PNC2126774P1 with the flat rates.
