Re: FCABC support for the Record Management Software and Pre-Fire Planning Software

Hello Ms. Cepero:

On behalf of the Fire Chiefs' Association of Broward County (FCABC), we want to express our full support for the Broward County Commission to facilitate a new record management system and pre-fire planning software system to continue to support the "Fastest Unit Response" (FUR) initiative that is currently being implemented today.

The FCABC requests that Broward County purchase the ESO Suite – which is inclusive of the fire and emergency medical service record management software – for record managing services and First Due Size-Up for the pre-fire planning software, in which such software will facilitate FUR when agencies respond outside of their primary response areas. These two platforms are nationally recognized platforms that are in place in several agencies currently operating in Broward County today and will further enhance the fire and emergency services delivery system serving the residents of Broward County, Florida.

Should you need any further information from our association, please do not hesitate to contact us accordingly.

Sincerely (on behalf of the Executive Board):

John K. McNamara
President

Cc: Michael Ruiz, Assistant Broward County Administrator
