Re: Tara Plat  
Modification #2 to County License No. DF04-1042

To Whom it May Concern:

Pursuant to your request dated June 25, 2019, this letter certifies that County Environmental Resource License No. DF04-1042 is hereby modified. This modification authorizes the remaining wetland preserve area of 0.50 acre, authorized in modification #1, to be impacted by the proposed development and mitigated at Loxahatchee Mitigation Bank with the purchase of 0.15 credits. The total wetland impact area for this project is 2.46 acres which shall be offset by a total credit purchase of 0.74 credits at the Loxahatchee Mitigation Bank.

The attached drawings, showing details of the modification and previously licensed work, shall supersede the corresponding drawings of the original license. All other specific conditions and technical elements of the license and modification, including the June 2, 2020 expiration date, remain as previously authorized.

Changes from the original license shall be modified as follows (deletions are shown with ~~strikethrough~~ and changes are **bold**):

B.1. Construction and installation of the Area shall be in accordance with plans dated ~~6/2/08~~ **6/21/19** by the County (attached) and associated information. ~~The Area shall be installed concurrently with licensed construction.~~

~~B.2. Upon completion of the Area, the following documentation shall be submitted to the County: (a) certification of elevations in relation to design, (b) verification of actual acreage, and (c) the time-zero monitoring report. This documentation is required within 30 days of completion of the Area and prior to any Certificate of Occupancy being received for any structure on the site.~~

~~B.3. A viable wetland system shall be established that replicates a natural reference wetland in basic structure and function. In order to assure that the Area becomes self-sustaining, the following criteria shall be met:~~

- ~~a) A minimum of 80% coverage by desirable wetland species after a two (2) year period and demonstration of persistence for three (3) additional years.~~
- ~~b) Less than 2% coverage by invasive exotic and undesirable species is allowable if plants are dispersed and not concentrated in any particular area. Exotic and undesirable species include, but are not limited to, melaleuca, Australian pine, Brazilian pepper, bischofia, torpedo grass, primrose willow, and cattail. Treatment efforts must be tailored to prevent these species from becoming reproductively mature.~~
- ~~c) A minimum of 80% survival of each planted species. This rate shall be maintained each quarter except where species composition, density of planted and recruitment species and~~

~~overall wetland condition, growth rates and viability of the Areas are of higher quality, as determined by the County.~~

~~d) Hydrologic conditions and soil characteristics are in general conformity to those specified in plans. Data from the staff gauges must be collected every two weeks and submitted with the quarterly monitoring reports.~~

~~The Area shall be monitored and reports submitted quarterly for five (5) years describing in detail the condition of the Area relative to the reference wetland and the criteria listed above (B. 3.a-d).~~

~~B.4. Should the County determine that the Area is not achieving the listed criteria during some portion of the monitoring period; the licensee shall prepare plans that demonstrate clearly how the problem(s) will be corrected and submit such plans immediately to the County for approval. Those plans shall then be implemented within thirty (30) days of the County's written approval.~~

~~B.5. Introduction (direct or indirect) of Grass Carp (*Ctenopharyngodon idella*) is strictly prohibited. The Licensee shall properly employ and maintain Grass Carp exclusion devices as necessary to prevent entry into the area.~~

~~B.6. A Conservation Easement over the Area was approved by the Broward County Commission on 3/5/04.~~

~~B.7. A Letter of Credit for the sum of \$ 62,827.82 has been submitted by the applicant to cover construction, monitoring and maintenance costs of the mitigation area. The document is presently under review, however, should the document be found unacceptable to the County, a replacement document shall be submitted in a form acceptable to the County and the County Attorney's Office within thirty (30) days of the County's written notification that the document was unacceptable.~~

~~C.1. Mitigation for impacts to 1.52 acres of wetlands shall be the purchase of 0.45 freshwater herbaceous credit from the Everglades Mitigation Bank (WATER= 0.29) pursuant to a modification of Florida Department of Environmental Protection (FDEP) Environmental Resource Permit No.132637449. Proof of the modification to the FDEP permit shall be submitted to the County's Development and Environmental Regulation Division prior to wetland impacts. Wetland impacts are prohibited until the County is in receipt of this information.~~

Changes from modification #1 shall be modified as follows (deletions are shown with ~~strikethrough~~ and changes are **bold**):

~~B.6. The Joint Deed of Conservation Easement previously recorded on 06/28/15 in OR Book 39951, page 1517 shall be amended to reflect the 0.50 acre wetland that shall remain on site (form attached). Since there have been no impacts to the site and the mitigation area has not been constructed, additional mitigation for the amendment of the Conservation Easement shall not be required.~~

~~B.7. The Amended Conservation Easement documents shall be submitted to the Department within 30 days of license issuance or prior to any impacts on site, whichever comes first. The Amended Conservation Easement must be completed and approved to form by the County Attorney's office prior to the mitigation area being turned over to other parties or the property sold.~~

~~C.2. Proof of payment in full for 0.59~~ **0.74** mitigation credit shall be submitted to the Department prior to any impacts on site or within 30 days of license issuance, whichever comes first. Wetland impacts are prohibited until the Department is in receipt of this information.

~~C.3. Mitigation for the additional 1.7~~ **2.46** acres of unavoidable wetland impacts shall be the assignment of ~~0.59~~ **0.74** credits in the Loxahatchee Mitigation Bank pursuant to a modification of the

Florida Department of Environmental Protection (FDEP) Permit No. 0140969-001. Proof of the modification shall be submitted to this Department within 45 days of license issuance.

Attach this letter and drawings to the original license as they become a part thereof. These approved modifications are specific to the County Environmental Resource License for this project; therefore, it is the Licensee's responsibility to make sure that the changes are incorporated in other sets of project-related plans or permits, as necessary, for proper execution by on-site personnel.

If you have any questions regarding this modification approval, please feel free to contact Michelle Decker at (954) 519-1205 or [mdecker@broward.org](mailto:mdecker@broward.org).

Sincerely,

*Linda Sunderland*

1. Sec. 27-14 Administrative Review Procedures (4 pages)
2. One copy of revised stamped drawings (8 pages)

cc:

1. USACOE-PBG (via e-mail)
2. Brandon Justice, Broward County (via e-mail)

Sec. 27-14. Administrative review of EPGMD determinations.

- (a) A person with a substantial interest may file a petition to request review of or to intervene in a review of a final administrative determination made pursuant to this chapter concerning:
  - (1) The requirement that a facility or activity obtain a license or environmental review approval.
  - (2) Interpretations of license or environmental review approval conditions.
  - (3) Interpretations of variance conditions.
  - (4) The decision to suspend or revoke a license or environmental review approval.
  - (5) The requirement of certain license conditions.
  - (6) The issuance of a license or environmental review approval.
  - (7) The denial of a license or environmental review approval.
  - (8) The scope of a license or environmental review approval, geographic or otherwise.
  - (9) The scope of a variance, geographic or otherwise.
  - (10) The issuance of a stop work order.
  - (11) Similar final administrative determinations.

This administrative review procedure shall be the only means of review available for the above final administrative determinations by either the petitioner or the intervenor (the parties).

- (b) person may not obtain review by this procedure of:
  - (1) The issuance or adjudication of or other matters involving a notice of violation or a citation.
  - (2) Internal policy decisions
- (c) A person desiring a review of a staff determination made pursuant to this Chapter shall first bring the determination to the attention of the appropriate section supervisor to attempt to resolve the matter. If a resolution cannot be reached, then the decision shall be reviewed by successive supervisory levels until the issue is resolved or reaches the level of the director or his or her designee for the final determination.
- (d) A person desiring administrative review of a final determination made by the director or the designee shall file a petition with the director for review by the hearing examiner. The petition shall be filed within ten (10) days from the rendition of the action taken or of the decision made by the director. An entity whose license or approval is being challenged shall be a party to the action.
- (e) The review shall not be heard until the provisions of subsection (f) are met. Upon motion to the hearing examiner, an insufficient petition shall be dismissed with or without leave to refile. If a petition is determined to be insufficient by the hearing examiner and the petitioner has been given leave to refile by the hearing examiner, unless otherwise ordered by the hearing examiner, the petitioner must refile within ten (10) days of the rendition of the order of dismissal or the petition will be dismissed with prejudice.

- (f) A sufficient petition for review or petition for intervention in the review shall, at a minimum, contain the following information:
  - (1) The nature of the determination sought to be reviewed.
  - (2) A short, plain statement of the facts which form the subject matter upon which the determination was made as asserted by all parties of record at the time that the petition is filed; a statement of the material facts in dispute, if any. If any party is unable to state the matters in sufficient detail at the time initial petition is filed, the petition may be limited to a statement of the issues involved; and thereafter, upon timely written motion, a more definite and detailed statement shall be furnished not less than seven (7) days prior to the date set for the hearing.
  - (3) The specific determination for which the review is sought.
  - (4) The specific legal grounds upon which the parties seek review of the determination.
  - (5) A short statement of the petitioner's or the intervenor's substantial interest in the matter to be reviewed.
  - (6) The specific section of this chapter on which the decision is based, if known, and the specific section that the parties allege should control the decision, if known.
  - (7) A copy of the director's or the designee's written final determination.
  - (8) A statement of the relief requested stating precisely the action that the petitioner wants EPGMD to take with respect to the final determination.
- (g) All pleadings or other documents filed in the proceeding must be signed by a party, the party's attorney, or the party's qualified representative. The signature of a party, the party's attorney or a party's qualified representative constitutes a certificate that he or she has read the pleading or other document and that to the best of his or her knowledge, information, and belief formed after reasonable inquiry, it is not brought for any improper purposes, such as to harass or to cause unnecessary delay or for frivolous purpose or needless increase in the cost of litigation. If a pleading or other document is signed in violation of these requirements, the hearing examiner, upon motion or his or her own initiative, shall dismiss the matter.
- (h) A petitioner or intervenor may request an emergency hearing to stay all activities or work conducted pursuant to the challenged license or approval. Such petitioner or intervenor has the burden of proof to show by a preponderance of the evidence that the continued activities would cause substantial pollution or degradation to the environment. An emergency hearing shall be scheduled by EPGMD and be held within five (5) days of said request or as soon thereafter as possible subject to the availability of the hearing examiner. The petitioner or intervenor shall comply with the notice provisions of section 27-14(j)(2)a. and c. and section 27-14(j)(3) and (4) of this chapter.
- (i) The petition for review will not stay environmental protection activities required for the remediation or mitigation of a site or facility, the protection of the environment or the health, safety and welfare of the citizens of Broward County, or the prevention of further environmental degradation. The person responsible for these activities must take all necessary steps to prevent environmental degradation and must conduct the remediation or mitigation activities required by this chapter. The director may allow these activities to be delayed until after the hearing examiner's decision by certifying to

the hearing examiner that, by reason of facts stated in the certificate, a delay in the initiation or completion of these activities would not cause substantial environmental degradation or peril to life or property. The delay for conducting these activities may be subject to appropriate terms to ensure protection of the environment. The person responsible for these activities shall be responsible for any environmental damage or any violation of this chapter caused by the delay.

(j) Notice and Scheduling Requirements:

(1) The hearing on the review shall be scheduled within a reasonable time. It shall be the responsibility of the petitioner to request through EPGMD that the hearing date be scheduled. It shall also be the responsibility of the petitioner to give notice in accordance with this section at least ten (10) days prior to the hearing.

(2) The petitioner shall give notice of the hearing by:

- a. Giving personal notice to all proper parties; and
- b. Publishing notice on two (2) days in a newspaper of general circulation in the county; and
- c. Posting notice at a location determined by the Broward County Administrator's Office.

(3) The petitioner shall bear the cost of giving notice.

(4) The notice shall contain, at a minimum:

- a. A description and location of the facility or the activity to be conducted by the petitioner; and
- b. The time and place of the hearing.

(k) The petitioner shall bear the cost of accurately and completely preserving all testimony and providing full or partial transcripts to all parties.

(l) The hearing shall be a quasi-judicial hearing.

(1) The applicant/petitioner requesting the administrative review, any intervenor/petitioner and EPGMD shall have an opportunity to respond to and to present witnesses, other evidence and argument on all issues involved, to conduct cross-examination and submit rebuttal evidence, to submit proposed findings of facts and orders, and to be represented by counsel. Members of the general public who are not intervenors as set forth in Section 27-14 of this chapter are not parties to the proceeding.

(2) When appropriate, the general public may be given an opportunity to present oral or written communications. If the hearing examiner proposes to consider such material, then all parties shall be given an opportunity to cross-examine, challenge or rebut it.

(m) Denial, protest of, revocation, or suspension of a license, environmental review approval, or any other approval:

(1) In regard to denial or protest of approval of a license and any other review of an administrative decision, notwithstanding (2) below, the petitioner shall have the burden of showing, by a preponderance of the evidence, that the determination of the director was an arbitrary and/or capricious abuse of discretion, not supported by competent, substantial evidence or not in conformance with the

essential requirements of this chapter. The hearing examiner shall not substitute his or her judgment for that of EPGMD on an issue of discretion even though the hearing examiner may have reached a different conclusion based on the same facts.

- (2) In an action to revoke or suspend a valid license or approval, the burden shall be upon EPGMD to prove, by a preponderance of the evidence in an administrative hearing, the grounds for revocation or suspension. The license holder or approval recipient shall be provided notice of the hearing and a copy of the petition stating the grounds for revocation or suspension as provided in section 27-63 of this chapter. The petition shall state with specificity the acts complained of in order to allow the license holder or approval recipient an opportunity to prepare a defense. The hearing shall be conducted in accordance with the provisions of Section 27-37 of this chapter.
- (n) Findings of fact shall be based exclusively on the evidence of record and on matters officially recognized.
- (o) If the hearing examiner finds that the director or his or her designee has erroneously interpreted a provision and that a correct interpretation compels a particular action, he or she shall remand the case to the director or his or her designee for further action under a correct interpretation of the provision.
- (p) The hearing examiner shall complete and submit to the director and all parties a final order consisting of his or her findings of fact and conclusions of law.
- (q) A party to the hearing may obtain appellate review of the final order as provided by section 27-42 of this chapter.
- (r) A petitioner or intervenor shall pay a filing fee at the time the application for review is filed. The amount of the filing fee shall be set by resolution of the Board.

## Field Notes:

### Wildlife Utilization (WU)

Minimal evidence of wildlife utilization.  
Birds + small mammals.

### Wetland Canopy (OS)

No desirable wetland overstory. Canopy vegetation consisted of Melaleuca, Brazilian Pepper, Australian Pine, Bachofia, Myrsine + Lead tree

### Wetland Ground Cover (GC)

Minimal desirable vegetative ground cover consists of royal fern, sawgrass + Spikerush. Approximately 50% of undesirable vegetation consists of Ludwigia, Typha, Torpedo grass Brown sedge, water plant, dogfern etc

### Habitat Support / Buffer

25% - Road.  
75% - Low density residential

### Field Hydrology (HYD)

Hydrologic regime is inadequate to maintain a viable wetland system.

### WQ Inlet & Treatment (WQ)

75% - Swales with dry detention  
25% - Wet + dry

Request for Withdrawal of Mitigation Credits  
Akai Estates LLC (Downey Ranches)

**REF:** Environmental Resource Permit No. 0140969-001, and  
Specific Condition 19 – Mitigation Credit Withdrawal

Dear Mr. Wilson:

This letter is a request for withdrawal of 0.74 freshwater herbaceous credits from the Credit Ledger for the Loxahatchee Mitigation Bank in association with Akai Estates LLC (Downey Ranches) project located in Broward County, Florida. This request is made under the provision of Specific Condition 19 of our approved Environmental Resource Permit. In support of this request, the following information is provided:

- ◆ Impact Permittee: Akai Estates LLC (Downey Ranches)
- ◆ ERP No: 06-07153-P
- ◆ Mitigation Requirement: 0.74 freshwater herbaceous

Attached is our updated "draft" credit ledger reflecting the requested withdrawal transaction. Copies of the salient pages from the impact project permit also are attached.

We appreciate your consideration of this credit withdrawal request. If you have any questions about this request, please contact me at (772) 781-3414.

Sincerely,

A handwritten signature in blue ink that reads 'Kristin K. Bennett'.
