Director
Broward County Purchasing Division
115 South Andrews Avenue, Rm. 212
Fort Lauderdale, FL 33316

Re: Broward County Bid PNC2119168P1 Continuing Engineering Services for Traffic Roadway and Civil Projects; Response to Objection by Calvin Giordano & Associates, Inc ("CGA") to LSN on Behalf of BCC Engineering, LLC, including Attestation of Additional Information.

Dear Ms. Billingsley:

This letter shall serve as a Response to the purported Objection filed by LSN Government Affairs on January 27, 2020 for consideration by Broward County Purchasing Division (the "County." This Objection should be rejected as both procedurally and factually inadequate.

I. MANDATORY LEGAL PREREQUISITES HAVE NOT BEEN MET.

1. LSN Government Affairs ("LSN") and BCC Engineering, LLC ("BCC") have failed to comply with the procedural requires of Procurement Code 21.84. There are 4 requirements; only three have been met (arguably). BCC has (i) identified itself through LSN as the vendor submitting an objection; (ii) articulated certain convoluted grounds for the objection, which will be addressed below; and (iii) identified the relief sought, the award. However, BCC failed to comply with the requirement that all objections shall contain *"a statement attesting that all statements made in support of the submission are accurate, true, and correct. The vendor shall acknowledge that the determination of inaccurate untruthful, or incorrect statements made in support of this submission may serve as a basis for debarment of the vendor regardless of whether the submission is directly provided by the vendor or a representative on behalf of the vendor."*

The *vendor* is required to make this attestation regardless of who is filing this submission. The attorney (here, LSN/G. Pratt) cannot make the attestation on these points for their client. This is consistent with the attorney's role in such matters; the attorney cannot be testifying. *See AlliedSignal Recovery Tr. v. AlliedSignal, Inc.*, 934 So. 2d 675, 678 (Fla. 2d DCA 2006) (citing FL ST BAR

Rule 4-3.7 ("Combining the roles of advocate and witness can prejudice the opposing party and can involve a conflict of interest between the lawyer and client.")).

In this instance, BCC has not verified anything – not that the statements are correct and not that the determination of inaccurate, untruthful, or incorrect statements may serve as a basis for debarment. Only LSN has "attested" – without notary, or other required indicia – and that was only to the statements being correct, although LSN has not stated that the signatory has first-hand knowledge to make such an attestation. Thus the Objection fails as non-compliant with 21.84 under the express provision of that section.

2. The Objector lacks standing. By its own admission, BCC is ranked third. BCC then mischaracterizes the Request for Proposals, which notes that the County may award "up to two" contracts, but does not state that it will. Thus, while the solicitation identifies the power of the County to award "up to two" contracts, there is nothing in the record to indicate its intent to do so. As the third-ranked vendor, BCC lacks standing to challenge CGA. See *Preston Carroll Company, Inc. v. Florida Keys Aqueduct Authority*, 400 So.2d 524 (Fla. 3rd DCA 1981) (applying substantial interest test).

II. EVEN IF BCC HAD MET THE MANDATORY PREREQUISITES OF ATTESTATION AND STANDING, THE KNOWN FACTS DEMONSTRATE THAT THE DECISION OF THE COUNTY WAS CORRECT IN ITS RANKING, AND IS NOT ARBITRARY OR CAPRICIOUS IN ITS ACTIONS.

Even if the Objection were compliant with 21.84, which it is not, the Objection fails on its merits. The ranking is entitled to remain so long as the interpretation of the solicitation documents and procurement code in its applicability in the rankings is not arbitrary and capricious, an analysis that is controlled by the Request for Proposal itself.

In this instance, the ranking is neither arbitrary nor capricious, and is solidly supported by earlier, consistent, interpretations by the county attorney regarding locality, by the documents submitted by CGA and by the lack of specific evidence that is relevant on their part.

BCC's alleged new evidence is neither new nor pertinent evidence, and several statements are inaccurate at best and misleading at worst:

1. The insinuation that CGA does not have its local headquarters in Ft. Lauderdale is wrong. CGA is a separate, distinct corporation from SAFEbuilt, and CGA has a local headquarters in Ft. Lauderdale, Florida, squarely meeting the intent of the locality rule – which is a geographical preference, not a local preference, under the procurement documents at issue here. (See Bid p. 234).
2. The statement that SAFEbuilt provides these same services, while also not accurate, is irrelevant to the question of whether CGA will be providing the

- services for which CGA bid, and for which CGA shall provide from its own headquarters in Ft. Lauderdale. Further, SAFEbuilt does not provide the same scope of services as provided by CGA. Specifically, SAFEbuilt does not house the expertise, engineers, qualifiers or principals with the experience required by the Broward County RFP documents.
3. The claim that U.S. Supreme Court's Hertz decision is not at all on point. In *Hertz*, the Supreme Court abrogated earlier opinions applying the analysis within federal statutes relating to diversity, which provides jurisdiction to the Court. Jurisdiction is required under Art. III of the constitution, and cases cannot be heard that do not involve federal law but are based on the diverse citizenship of the parties, again, under federal law. This analysis is completely inapposite to any analysis to be applied by the County in interpreting its own procurement rules and documents.
 4. CGA pays Broward County Local Business taxes. (*See Broward County Business Tax Receipt at Bid p. 234*).
 5. The CGA Certificate of Liability Insurance submitted for Broward County Bid PNC2119168P1 designates the Insured as Calvin, Giordano & Associates, Inc., 1800 Eller Drive, Suite 600, Fort Lauderdale FL 33316. Notably, it does not list SAFEbuilt as a Named Insured. (*See Certificate of Insurance at Bid p. 258*).
 6. The Board of Professional Engineers for Florida has issued a license to CGA – not SAFEbuilt – at CGA's headquarters on Eller Drive, in Ft. Lauderdale, Broward County, Florida. (*See PE License at Bid p. 261*).
 7. The State of Florida Department of Business and Professional Regulation Board of Landscape Architecture has issued a license to CGA – not SAFEbuilt – at CGA's headquarters on Eller Drive, in Ft. Lauderdale, Broward County, Florida. (*See Landscape Architecture License at Bid p. 263*).
 8. The Florida Department of Agriculture and Consumer Services has issued a Professional Surveyor and Mapper Business License to CGA – not SAFEbuilt – at CGA's headquarters on Eller Drive, in Ft. Lauderdale, Broward County, Florida. (*See Mapper & Surveyor License at Bid p. 264*).
 9. Since 2010, CGA has banked with Suntrust Bank, located at 515 E. Las Olas Boulevard, Ft. Lauderdale, Broward County, Florida 33301. (*See Letter from SunTrust Bank at Bid p. 243*).
 10. Numerous other official documents reflect Eller Drive, Ft. Lauderdale, as the headquarters for CGA. (*See generally Bid*). SAFEbuilt has nothing to do with the provision of these services at the location in Broward County in which CGA maintains its headquarters. The Department of State recognizes CGA as Florida corporation – not a Colorado corporation – organized under the laws of Florida. (*See Department of State printout attached hereto as Exhibit A*).
 11. Again, contrary to the rumors submitted as an Objection ("there is sufficient information that suggests CGA and SAFEbuilt share resources . . . and we have also learned that back- office, etc.") CGA herein attests that it has its own Human

Resources employee, IT employee, and Financial Services employee. Once again BCC attempts to be imputing and conflating – these are separate entities, and only CGA is responsible to the County on this submission, for this contract, and CGA is located, with its headquarters, in the County.

The following key personnel are located in CGA's headquarters in Ft. Lauderdale, along with IT, Human Resources, and administrative personnel:

- Dennis Giordano, President – reports to 1800 Eller Dr. in Ft. Lauderdale – current and only residence is located in Broward County.
- Chris Giordano, Vice President & Treasurer – reports to 1800 Eller Dr. in Ft. Lauderdale – current and only residence is located in Broward County.
- Curt Keyser, Vice President – reports to 1800 Eller Dr. in Ft. Lauderdale – current and only residence is located in Broward County
- Tammy Cook-Weeden, Vice President – reports to 1800 Eller Dr. in Ft. Lauderdale
- Steve Watts, Vice President – reports to 1800 Eller Dr. in Ft. Lauderdale – current and only residence is located in Broward County
- Dawn Hopkins, Secretary – reports to 1800 Eller Dr. in Ft. Lauderdale – current and only residence is located in Broward County
- Arelis Valero PhD, Director of Human Resources – reports to 1800 Eller Dr. in Ft. Lauderdale
- Robert Reyes, Talent Acquisitions Partner – reports to 1800 Eller Dr. in Ft. Lauderdale

Indeed, the documents submitted by the objector confirm that CGA is located in Ft. Lauderdale (e.g., p. 40 of objection submitted by LSN/BCC and attached as Exhibit B demonstrating on the change of registered agent form appointing CT as a registered agent that the "principal office address" is 1800 Eller Drive, Suite 600, Fort Lauderdale, FL 33316). The location of SAFEbuilt is a red herring, and if the interpretation urged by LSN/BCC were adopted, the location would make no sense. For example, if the parent corporation was located in Ft. Lauderdale, but the office bidding on the project and performing the work was in Wyoming, the locality points would still be awarded to that entity because the parent company was in Ft. Lauderdale. Here, the County's interpretation of the solicitation is reasonable and the only logical

interpretation: where is the principal office of a distinct corporate entity that will be performing the work. This distinct corporate entity, CGA, is located and staffed in Fort Lauderdale, Florida. SAFEbuilt did not bid on this project and is under no legal obligation to perform services, as it is a separate corporate entity.

CGA is a separate entity under the law, and attributing the characteristics of the parent company merely because the parent company holds some portion of CGA stock would be inconsistent with applicable law. See *Gasparini et al v. Pordomingo*, 972 So.2d 1053, 1055 (3rd DCA 2008) ("A general principle of corporate law is that a corporation is a separate legal entity, distinct from the persons comprising them.") In order to conflate these two corporations, there must be some aspect of fraud; the separate identify of corporations is sacrosanct. *Ocala Breeders' Sales Company v. Hialeah, Inc.*, 735 So.2d 542, 543 (3rd DCA 1999). None is at issue here.

Accordingly, this Objection should not be considered as it was not properly attested, and if considered raises no new evidence of anything that would hold the County in arbitrarily interpreting its procurement documents. This is not a new question, and nothing in the record undermines the earlier legal opinion of the County Attorney's Office in applying the locality criteria. Indeed, the failure to adhere to this precedent, without cause, could itself be challenged. Further, BCC through LSN conflates local preference (which is not allowed) with locality – which is specifically required under the Procurement Code as a factor, and the conditions of which are met. CGA operates out of a local office, in Fort Lauderdale, Broward County, Florida, and thus is in close proximity to the Broward County public works department. Ultimately, CGA has a principal place of business in Broward County, which is reflected in the on Exhibit A, and which has been confirmed.

Past Projects In Broward

CGA has a long history with the community of Broward County. In fact, a large majority of CGA projects have been located in Broward County including *inter alia*:¹

Additionally, I wish to make note that BCC Engineering, LLC disingenuously indicated its Proposed and Attested Nerve Center as being located in Ft. Lauderdale. During Broward County's due diligence – and confirmed by the Florida Department of State, Division of Corporations registry – it was determined that BCC Engineering, LLC's principal place of business and nerve center is in fact located in Miami.

For the above reasons, the Objection should be rejected, and the ranking should proceed according to the County's process.

Sincerely,

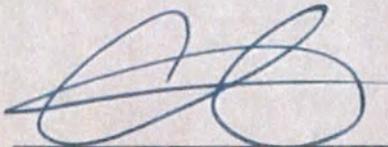

Chris Giordano, Vice President & Treasurer
Calvin, Giordano & Associates

VERIFICATION BY VENDOR CALVIN, GIORDANO & ASSOCIATES:

I attest and confirm, under penalty of perjury, that any and all supporting documents (attached), are true and correct copies and I attest that all statements made in support of this Responsive submission are accurate, true, and correct. I acknowledge that the determination of inaccurate untruthful, or incorrect statements made in support of this submission may serve as a basis for debarment.

Subscribed and sworn to (or affirmed) before me this 7 day of February 2020,
by Chris Giordano, who is personally know to me or who has produced
_____ as identification.

Chris Giordano, Vice President & Treasurer

Sara R. Blumkin

Subject: FW: Local Headquarter Determination

Importance: High

Nan,

I have heard about the Calvin Giordano effort to twist the County procurement policy of awarding extra points for a company that has its HQ in Broward. They were purchased by a national firm out of Colorado a number of years ago. I do not understand how purchasing is giving them Local Headquarter points. Here is a brief White Paper which summarizes the situation. I not involved in this procurement so have no cone of silence issue. I am hopeful you will weigh in on this abuse of the system. In this time of a potential down turn in economy, we need to be sure our local firms are protected and our \$ stay in Broward County as much as possible.

I would love to chat w you on this.

Dodie

White Paper

The Dangerous Hijacking of Broward's Local Headquarters Preference

The Broward County Commission, following the action of Miami-Dade County, adopted an ordinance which awards extra points in an RFP to companies which have their national corporate headquarters or nerve center in Broward County. The purpose of the Broward ordinance is to protect Broward-based firms to ensure that they receive a fair share of County-awarded projects.

Whether a company claiming to be headquartered in Broward County is in fact entitled to those extra points is typically a fact-driven analysis undertaken by County Purchasing staff and the County Attorney's office.

A recent RFP (PNC 2119168P1 Continuing Engineering Services for Traffic Roadway and Civil Projects) has raised serious concerns about how Broward County Staff may be interpreting the local headquarters determination.

In this RFP, the County intends to select two firms. Calvino Giordano & Associates, Inc. ("CGA") claimed that its corporate nerve center and national headquarters are in Broward County. CGA certified in writing that it was not a wholly owned subsidiary of another firm headquartered outside of Broward County. None of the other shortlisted firms responding to this RFP claim to be headquartered in Broward County.

When the final votes of the Evaluation Committee were totaled, CGA finished first having received the automatic extra 25 points (5 points for each of the five Committee members). Had CGA not received those 25 points, it would have finished third. Thus, the award of the local preference points to CGA was outcome determinative. The County Commission has not yet approved the rankings.

If CGA were in fact a company whose headquarters/nerve center were truly in Broward County, one might say that the local preference ordinance had in fact achieved its objective. The problem is, however, that CGA was acquired in February 2018 by SAFEbuilt, Inc., a national operating company which has its headquarters and has its nerve center in Loveland, Colorado.

After the ranking by the Evaluation Committee, LSN Government Affairs, LLC submitted an Objection Letter containing extensive factual detail about the SAFEbuilt, Inc. 2018 acquisition of CGA and detailing how SAFEbuilt, Inc. has both ownership and corporate control of CGA and its corporate policies and major human resource decisions. In our letters, we included not only information from SAFEbuilt's website and press releases, but also a package of information contained in the SAFEbuilt Acquisition Welcome Package presented to the CGA employees as part of the SAFEbuilt, Inc. acquisition.

CGA not only provided misinformation when it certified that it **was not** a wholly-owned subsidiary of a company headquartered outside of Broward County, it also submitted a contorted response in an effort to preserve its ill-begotten award of local preference points. Sadly, the Director of Purchasing rejected our objection to CGA's receipt of the preference points.

If this decision is allowed to stand, it will make a mockery out of the local headquarters preference. Moreover, it will create an incentive for other companies which have been or will be acquired by outside firms, to game the County ordinance and defy the intent of the policy. This may be good business for lawyers and their creativity for structuring such deals, but it will be bad business for Broward County's policy of seeking to protect its real locally-based firms.

Please contact us if you want copies of the information that was submitted to Purchasing. You will see clearly that the CGA nerve center, as that term is legally defined is no longer based in Broward County. In its Welcome Package for CGA employees, the following Q&A is most revealing in addressing the SAFEbuilt, Inc. acquisition of CGA from Dennis Giordano and the other CGA principals:

“Why does CGA want SAFEbuilt’s investment?”

The time had come for Dennis to start thinking about his succession and transition plan to ensure success and opportunity continued for all employees and clients. Dennis found SAFEbuilt to be the best fit due to similarities and alignment in services, culture, clientele and growth plans. Your company will benefit almost immediately from SAFEbuilt’s training, HR and IT support, expanded sales and marketing resources and purchasing power.”

We remind you that this issue is not about the quality of CGA or its parent company, SAFEbuilt, Inc. It is about seeking a fair, rationale and legitimate interpretation of an ordinance that is expressly intended to provide a preference to truly local companies whose nerve center/headquarters are based in Broward County. While we appreciate the fact that there may be a time for locally grown companies to transition ownership and control to an out-of-county company, it is a transition that should involve the surrender of the local headquarters points when reflected by the real facts. It is doubtful that the Broward County Commission intended the illogical result of a local company surrendering ownership and control but having its cake and eating it too by continuing to gather local preference points.

We anticipate that this item will be on the County Commission Agenda on May 19, 2020.

If you want to support the integrity and intent of a preference for locally headquartered companies, please let the County Commissioners know where you stand. Feel free to share this document with others. Let us know if you have any questions.

Thank you for your interest in these important issues.

Re: your Email regarding a "White Paper" on local preference and the upcoming Commission meeting re: Award of Contract on Bid PNC2119168P1; Objection

Dear Ms. Clark-Forbes:

Thank you for forwarding the document identified as a "White Paper" to us. We object to the consideration of this "White Paper" which is nothing more than a challenge to this Bid award outside of the proper procurement procedure. Allowing persons to comment and argue against a Bid Award by labeling their late-filed brief as a "White Paper" will turn the procurement process from the present one where the Procurement Department evaluates the bids, and recommends to the Commissioners, into a last minute matter in which Commissioners are given "White Papers" by anyone who wants to challenge the award without following the process. We therefore urge that this document not be distributed until after the agenda item on our bid award to avoid interfering with the proper procurement process.

In the event that you go forward with distribution, however, our earlier submission counters these arguments and demonstrates our compliance, and we urge that the Commissioners be presented with our arguments in our Response and in this objection. To summarize a few of the key points: Calvin Giordano & Associates, Inc. (CGA) employs numerous persons in the Ft. Lauderdale office, making the Broward County location the actual nerve center of our business: CGA employs over 220 persons with their home address in Broward County, over 88% of our staff reports to locations within Broward County, with most of those – well over 150, working with[in] our Headquarters. The facts are clear – we comply with the terms of the bid documents, and there is no credible evidence to the contrary – because the facts are present in those very employees who work and live here. On behalf of those 200 plus employees who reside in Broward County, and who depend on CGA for their livelihood, we urge the Commission to reject these outside considerations and award the contract to CGA as recommended by the Purchasing Division.

For your convenience we have also enclosed a copy of our Response, timely filed in February, which provides additional, incontrovertible, evidence of that compliance.

Sincerely,

Chris Giordano, Vice President & Treasurer
Calvin, Giordano & Associates

Re: **Legal Opinion for Continuing Engineering Services for Traffic
Roadway & Civil Projects – Principal Place of Business**

This is a **supplement** to my prior legal opinion regarding the question raised by the Purchasing Division as to whether Calvin Giordano and Associates (“CGA”) qualifies for location points for RFP No. PNC2119168P1. The question arose because LSN Government Affairs (“LSN”), which represents the third-ranked vendor BCC Engineering, LLC, asserted an objection contending that CGA should not have received five points (per evaluator) for location since CGA is a subsidiary of Safebuilt, a corporation headquartered out of state.

I had previously opined that CGA complies with the Code definition of a local business. This opinion was based on my analysis of the Board’s intent behind the local preference policy. It appears the Board intended local preference points be awarded based upon the “nerve center” of the vendor, rather than on technicalities that could be subject to abuse or misapplication. In light of that intent, I recommended construing the attestation statement at issue in favor of the vendor, given that the vendor otherwise meets the Code requirements for a local business.

The primary issue arose in connection with the fourth numbered statement in the location attestation form, which states: “Vendor has not merged with another firm within the last six months that is not headquartered in Broward County and is not a wholly owned subsidiary or a holding company of another firm that is not headquartered in Broward County.” This attestation statement (like other statements on the form) is susceptible to multiple interpretations. The intended interpretation is presumably that (1) a vendor did not merge with another firm within the prior six (6) months that is not headquartered in Broward County, and (2) the vendor is not a wholly owned subsidiary or holding company of another firm not headquartered in Broward County. However, a somewhat strained but grammatically-correct construction of the sentence is that a vendor did not merge with another firm within the prior six (6) months that (1) is not headquartered in Broward County and (2) is not (referring to the other firm) a wholly owned subsidiary or holding company of another firm not headquartered in Broward County. Because the plain

Brenda J. Billingsley, Director of Purchasing

Page 2

language is susceptible to two interpretations (albeit, one of them is somewhat strained), I resorted to my understanding of the Board's intent when I opined that CGA's attestation is accurate under the facts presented.

It should be noted that, unlike the attestation form, the currently codified local bidder preference provision does not contain any language that would prohibit vendors that merge with, or become a wholly owned subsidiary or holding company of, a firm not headquartered in Broward County from receiving location points. Additionally, the language in the attestation form could produce unintended results, such as where a local business merges with a nonlocal firm but the surviving entity is located in Broward County and continues to function as the firm's nerve center. The attestation form at issue appears to have arisen from a June 2014 agenda item that was primarily directed towards applying local business points to joint ventures. Fortunately, these issues will be addressed in the currently pending proposed amendment to the applicable provisions.

For the above-stated reasons, we do not believe there is a legal prohibition against Purchasing allocating location points to CGA under these facts. CGA's response dated February 7, 2020, supports a finding that it meets the "nerve center" test for location point purposes under the applicable code provision. However, as with all of the other guidance we provide to Purchasing, my opinion here is merely advisory. A determination by Purchasing that CGA would not be entitled to receive the location points would also appear to be nonarbitrary and therefore legally sustainable.
