Summary Explanation/Background

Every Congressional Session (two years) IABS develops a federal legislative and executive platform

addressing Commission Principles and Policies as well as other Policy Proposals. Various county departments, divisions, offices, and sections have submitted policies and general funding requests, which IABS aggregates into the Federal Program that is used to advocate and lobby Congress and the Executive Branch during the 117th Congressional Session. This document is distributed to the Commission, Administration, Broward Delegation Members, and the contract lobbying team for reference and use. The Federal Program is attached as Exhibit 1. Each new and updated proposal is identified in the Federal Program.

The Federal Program also endorses the Southeast Florida Regional Climate Change Compact's 2020-21 Federal Legislative Priorities and the 2021 Federal Energy, Climate, and Resilience Legislative Principles. The Compact Leadership Committee approved its priorities and principles on August 20, 2020 and both are combined into one document as Exhibit 2.
