Summary Explanation/Background

THE TRANSPORTATION DEPARTMENT AND TRANSIT DIVISION RECOMMEND APPROVAL OF THE ABOVE MOTIONS.

This item supports the Board's Value of "Cooperatively delivering an efficient and accessible regional intermodal transportation network".

Staff is requesting approval of a Public Transportation Grant Agreement (PTGA) with the Florida Department of Transportation (FDOT) that will provide \$1,102,018 for capital improvements for the 95 Express Bus service which may include the purchase of buses, Park and Ride enhancements, signage, bus shelters, bus stops, and other costs deemed necessary by the project manager and approved in writing by FDOT.

As background, at its January 8, 2008 meeting (Item No. 56), the Board approved Broward County Transit Division's (BCT) participation as a key partner for the transit component of the I-95 Express Urban Partnership Agreement (UPA) between the US Department of Transportation's Federal Transit Administration (FTA) and FDOT Districts 4 and 6. Phase 1A of this UPA project converted the northbound high occupancy vehicle (HOV) lanes along I-95 in Miami-Dade County from I-195 to the Golden Glades Interchange into high occupancy toll (HOT) lanes. Tolls are variably priced based upon demand and collected electronically via "SunPass" transponders. Phase 1B converted the southbound I-95 lanes in Miami-Dade County from the Golden Glades area to just north of S.R. 836. Phase 2 converted the lanes from Golden Glades to I-595 in Broward County. As part of the overall project, BCT implemented an express bus system (I-95 Express) in cooperation with Miami-Dade Transit that transports commuters from Broward County to Miami-Dade County using the HOT lanes.

BCT now operates three 95 Express routes weekdays during peak morning and afternoon travel hours from four Park & Ride locations in western Broward County to downtown Miami and the Miami Civic Center Health District in Miami-Dade County. This premium express commuter transportation service feature comfortable over-the-road coaches with high-back seats, Wi-Fi, LED reading lights, electrical outlets and USB ports for passengers.
