Summary Explanation/Background

THE OFFICE OF REGIONAL COMMUNICATIONS AND TECHNOLOGY RECOMMENDS APPROVAL OF THE ABOVE MOTION.

Work Authorization No. 16 is being executed to purchase, install, and deploy 81 new Gen3 Power 911 Stations that will be used for 911 call processing at Broward County Regional E911 PSAP(s). The existing Power 911 Stations were installed in 2015, and are being replaced to improve performance, maintainability, and to provide compatibility and integration with Next Generation 911 standards.

The current System and Services Agreement with Intrado Life & Safety Incorporated (f.k.a. West Safety Solutions) was executed on December 5, 2017. The term of the existing contract expires in September 2023.

The First Amendment was executed on August 3, 2020, amending the Agreement to add a Service Level Agreement to account for the cloud-based Power Metrics Advanced Reporting System. In addition, the First Amendment incorporated the requirement for Intrado Life & Safety to initiate a failover of Broward County's VIPER Phone System should there be a system failure that warrants an immediate failover. The First Amendment also included newly defined service credit terms and conditions.

This Work Authorization No. 16 exceeds the Director of Purchasing's authority under Section 21.14 of the Broward County Administrative Code, and therefore requires Board approval.
