Summary Explanation/Background

THE RESILIENT ENVIRONMENT DEPARTMENT, THE ENVIRONMENTAL PROTECTION AND GROWTH MANAGEMENT DEPARTMENT LOCAL PLANNING AGENCY (LPA), AND THE URBAN PLANNING DIVISION RECOMMEND APPROVAL OF THE ABOVE MOTION.

Florida Statutes Section 163.3178(2)(f) requires that local government comprehensive plans include provisions to eliminate development in coastal areas that may be inappropriate and unsafe due to potential flooding. The legislation is commonly referred to as the “peril of flood” legislation. As part of the BrowardNEXT comprehensive planning process, a new objective and policies were added to the Coastal Management Element to reflect Broward County’s commitment to address the peril of flood legislation. The proposed amendments address the peril of flood requirements, as such relate to the Broward Municipal Services District (BMSD) and regional infrastructure and facilities. Consequently, amendments are being proposed to multiple elements of the comprehensive plan, including the following:

- Broward Municipal Services District Element
- Capital Improvement Element
- Coastal Management Element
- Intergovernmental Coordination Element
- Port Component
- Recreation and Open Space Element
- Transportation Element
- Water Management Element

On July 23, 2021, the Environmental Protection and Growth Management Department Local Planning Agency found the proposed amendments consistent with the Broward County Comprehensive Plan.

On September 21, 2021, the Board of County Commissioners transmitted the proposed amendment to the Florida Department of Economic Opportunity and other required state agencies. No objections were received from state agencies; however, some objectives and policies have been refined in response to comments received (Exhibit 4).
