SUBJECT: No CBE Goal IoT Sensor Project

The Broward County Resilient Environment Department is seeking to piggyback on a pre-existing contract to procure goods and services needed to establish a weather monitoring network. The goods and services include sensor stations to monitor storm drainage systems and roadway flooding, software and training required to install, maintain and manage data.

The contract on which the Using Agency intends to piggyback is DOT-ITB-25-2005-JB, Road Weather Information Systems for FDOT RTMC. Since this contract will be based on obtaining services through a pre-existing contract with a non-Broward County agency, no CBE goal is recommended for this project.

If you have any questions or concerns regarding this assignment, please contact our office at (954) 357-6400

This service **is not** subject to the Broward County Workforce Investment Program.
This service **is not** subject to the Broward County Construction Apprenticeship Program.
