1. Summary of the proposed ordinance (must include statement of the public purpose, such as serving the public health, safety, morals, and welfare):

The proposed Ordinance would require any person or entity performing a calcium score test in Broward County to obtain and retain a copy of the patient's signature on a disclosure stating that a calcium score test (coronary computed tomography scan without contrast) does not detect soft plaque, but only detects hard plaque.

2. Estimate of direct economic impact of the proposed ordinance on private, for-profit businesses in Broward County, including, if applicable:

- a. Estimate of direct compliance costs that businesses may reasonably incur;
- b. Any new charge or fee imposed by the proposed ordinance; and

The direct additional compliance costs, if required, for each affected business is assumed to be nominal, given that this type of information is routinely collected. In certain cases, computer systems may have to be updated, but the extent and cost of such changes is uncertain.

There is no fee associated with the proposed ordinance.

The County is assumed to perform any enforcement activity on a complaint-only basis, and the associated costs of the assumed minimal number of complaints should be minimal. The fines would be \$500 per violation.
