1) CPI for food away from home (closest to concession food) rose about 19.7% from 2022 to 2026.

2) PPI for food services rose about 21.4% in the same period.

This suggests producer costs increased slightly more than consumer prices, which could indicate margin pressure.

3) All-Brand Supplies Distributor, Inc. pricing was found to be 70% lower than the next responsive bidder Hybrid Billing Solutions LLC.
