1. The Water and Environmental Licensing Section of the Environmental Permitting Division has not yet conducted a site inspection on this project; however, aerial photographs and light detection and ranging data (LIDAR) indicate that this property may contain County jurisdictional wetlands. The applicant must request a wetland determination from the Water and Environmental Licensing Section prior to any land clearing or filling. If the site is determined to contain wetlands, an Environmental Resource License will be required prior to any dredging, filling, or other alteration of wetlands. Contact the Environmental Permitting Division at 954-519-1483 or AWRLicense@broward.org for specific code requirements.
2. This proposed development contains or abuts water bodies or will be creating same. Excavation or filling of lakes or canals, or installation of headwalls, end walls, or outfalls is regulated under Chapter 27, Article XI of the Natural Resource Protection Code and may require an Environmental Resource License. Design criteria shall be in compliance with Section 27-337 which requires that lake slopes be a minimum of 4:1 (H:V) to a depth of two (2) feet below the average dry season low water elevation as demonstrated by water management district or county maps. Littoral areas should be constructed and designed to encourage the growth of native, aquatic vegetation to improve filtration of runoff and to increase biological productivity per South Florida Water Management District and Broward County surface water management requirements. Contact the Environmental Permitting Division at 954-519-1483 or AWRLicense@broward.org for specific code requirements.
3. The Water and Environmental Licensing Section of the Environmental Permitting Division encourages all invasive exotic vegetation including Melaleuca, Brazilian pepper, Australian pine and others as listed in the Exotic Pest Plant Council's List of Florida's Most Invasive Species to be removed during the development process, and a management plan may be necessary to control re-invasion of same. In addition, landscape material should not include any plants considered to be invasive of South Florida's native plant communities. The Florida Exotic Pest Plant Council's List of Florida's Most Invasive Species is available at Florida Exotic Pest Plant Council (invasive.org).
4. Other activities regulated under Chapter 27, Article XI of the Natural Resource Protection Code (e.g., lake or canal excavation, installation of headwalls, end walls, or outfalls) may require an Environmental Resource License. Prior to undertaking surface disturbing activities, contact the Environmental Permitting Division at 954-519-1483 or AWRLicense@broward.org for specific code requirements.
