Subject: re:

To: Mark Bogen

Commissioner Bogen:

As the Past-President of the Society of Cardiovascular Computed Tomography, I have become aware of the Ordinance that you have recommended in Broward County, Florida.

Your statement that CT scans that do not utilize contrast cannot detect the more dangerous soft plaque is accurate. If an individual goes for a CT scan and no contrast is used, the radiologist or Cardiologist will not be able to determine the presence of soft plaque, which is the more dangerous plaque.

As the Past-President of the Society of Cardiovascular Computed Tomography; the former Professor of Medicine and Radiology at Weill Cornell Medical College; the former Director of the Dalio Cardiovascular Imaging Institute at the new York-Presbyterian Hospital and the Past Editor-in-Chief of the Journal of Cardiovascular Computed Tomography, I support your proposed Ordinance which will can only provide more education to each consumer or patient who undertakes a CT scan.

Dr. James Min
