Form 725-000-02 STRATEGIC DEVELOPMENT OGC 03/25

EXHIBIT A

Project Description and Responsibilities

- A. Project Description (description of Agency's project to provide context, description of project components funded via this Agreement (if not the entire project)): UPLAND FACILITY IMPROVEMENTS [NEW PUBLIC WORKS FACILITY]. This Agreement provides for the Department's financial participation in Port Everglade's upland facility improvements initiative. This capital project consists of the design and construction of a consolidated maintenance facility, with the goal of centralizing functions that support the Port's core revenue-producing lines of business (i.e. cruise, cargo, etc.). Port Everglades is a 'landlord port', by which lands, and buildings are rented and leased to ports and maritime related initiatives.
- B. Project Location (limits, city, county, map): Fort Lauderdale, FLORIDA
- **C. Project Scope** (allowable costs: describe project components, improvement type/service type, approximate timeline, project schedule, project size): This Project includes the environmental work, design work, and construction work required to complete the upland improvement activities described in the Project Description, including: air quality and emission services; asphalt paving activities; backfilling; cable protection systems; compaction; concrete; construction inspection services; construction management services; construction services; consulting services; contractor stand-by; cost estimates; demobilization; demolition; drainage systems; earthwork; economic assessments; electrical components and systems; engineering services; environmental assessments; feasibility studies; fencing; final plan development; fire protection services; form work; gate installation or reconfiguration; geographic analysis; geotechnical services; ground covering; historical resource studies; installation and testing; lighting systems; mitigation assessments; mobilization; permitting; plan development (e.g. 30 / 60 / 90 / 100% and as-builts); precast concrete; preconstruction engineering and design; procurement cost; rail materials; rebar installation; refrigerated container racks; roadway medians; security systems; signage; soil management work; stormwater management; striping of roadway or storage areas; structural components; surveying; temporary structures; and utilities.

D. Deliverable(s):

The project scope identifies the ultimate project deliverables. Deliverables for requisition, payment and invoice purposes will be the incremental progress made toward completion of project scope elements. Supporting documentation will be quantifiable, measurable, and verifiable, to allow for a determination of the amount of incremental progress that has been made, and provide evidence that the payment requested is commensurate with the accomplished incremental progress and costs incurred by the Agency.

- E. Unallowable Costs (including but not limited to): Travel costs are not allowed
- F. Transit Operating Grant Requirements (Transit Only):

Transit Operating Grants billed as an operational subsidy will require an expenditure detail report from the Agency that matches the invoice period. The expenditure detail, along with the progress report, will be the required deliverables for Transit Operating Grants. Operating grants may be issued for a term not to exceed three years from execution. The original grant agreement will include funding for year one. Funding for years two and three will be added by amendment as long as the grantee has submitted all invoices on schedule and the project deliverables for the year have been met.
